

# The Coulomb Law Misconception

Ilija Lakicevic

Les Fontenettes 6, 2019 Rochefort, Switzerland

Email: [teslastyle101\[at\]gmail.com](mailto:teslastyle101[at]gmail.com)

**Abstract:** *The Coulomb law which says that opposite poles attract and like poles repel, is not true to Nature and it is one of the multitude sense deception. The true basic underlying law in Nature is: same conditions attract each other. Both plus and minus electric poles of a “bar magnet”, which must be properly called a “gravity bar” because gravity controls all motion, consist of high electric potentials, which are high imbalanced conditions, and that’s why these same conditions attract each other. When they meet, they VOID their polarities, exchange it and continue the same game from the beginning. Gravity is not a physical force, but a mental force which is measure of Mind desire for creative expression through manifestation by action. Gravity is the same as magnetism, the same as God, who controls material universe which is made entirely of motion.*

**Keywords:** Coulomb law, electricity, gravity, magnetism

## 1. Introduction

The Coulomb Law raises the most momentous questions of all time, questions which the greatest logicians of history have been unable to solve. Mathematics will not solve them with equations which are but assumptions. No human can solve that supreme mystery except one who KNOWS the Cosmic Source and CAUSE of ALL things [1-27].

## 2. Like Seek Like

If I'd ask an eight to ten years old child who has no idea about the Coulomb law "Do opposites attract each other?", I'd get the quantum answer "Why do you call them opposites if they attract each other, or if they are opposite, as you claim, how can they attract each other?!"

Opposite conditions ARE opposing conditions. Likewise, they are opposite effects caused by each pulling in opposing directions. It is not logical to say that opposites fulfill any other office than to OPPOSE. Nor is it logical to say that opposing things attract each other. Logical and true is to say that the same things attract each other, so that the basic underlying law in nature is: SAME CONDITIONS ATTRACT EACH OTHER!

In this entire universe like conditions seek like conditions. Gases and vapors seek gases and vapors by rising to find them. Liquids and solids seek liquids and solids by falling toward them.

From the other side there is indisputable sense observation that plus and minus opposite poles of a so-called bar magnet move quickly to each other as soon as they are near enough to each other and void their “magnetism” when they meet.

**Figure 1:** *When opposite poles of two bar magnets are near enough to each other, they quickly move to each other and*

*meet by voiding their “magnetism”- from two bar magnets one bar magnet will be made. In the middle between poles is zero point*

The challenge is how to solve this riddle, i.e., how to find the truth.

The logical conclusion from the above consideration is that the Coulomb Law statement that ‘opposite poles attract’ and ‘like poles repel’ IS NOT TRUE TO NATURAL LAW!

Also, the logical conclusion from the above consideration is that there MUST BE something common, something same, in these so-called “opposite poles” which is forcing them to move quickly to each other and to void their “magnetism”. The fact that they void their “magnetism” when they meet is very important one.

Let me begin the search for truth by explaining how these so-called bar magnets are made and which materials are used, using the common scientific language.

“A magnet is a material that can exert a noticeable force on other materials without actually contacting them. This force is known as a magnetic force and may either attract or repel. While all known materials exert some sort of magnetic force, it is so small in most materials that it is not readily noticeable. With other materials, the magnetic force is much larger, and these are referred to as magnets. The Earth itself is a huge magnet.

Some magnets, known as permanent magnets, exert a force on objects without any outside influence. The iron ore magnetite, also known as lodestone, is a natural permanent magnet. Other permanent magnets can be made by subjecting certain materials to a magnetic force. When the force is removed, these materials retain their own magnetic properties. Although the magnetic properties may change over time or at elevated temperatures, these materials are generally considered to be permanently magnetized, hence the name.

Other magnets are known as electromagnets. They are made by surrounding certain materials with a coil of wire. When

an electric current is passed through the coil, these materials exert a magnetic force. When the current is shut off, the magnetic force of these materials drops to nearly zero. Electromagnet materials retain little, if any, magnetic properties without a flow of electric current in the coil.

All magnets have two points where the magnetic force is greatest. These two points are known as the poles. For a rectangular or cylindrical bar magnet, these poles would be at opposite ends. One pole is called the north-seeking pole, or north pole, and the other pole is called the south-seeking, or south pole. This terminology reflects one of the earliest uses of magnetic materials such as lodestone. When suspended from a string, the north pole of these first crude compasses would always "seek" or point towards the north. This aided sailors in judging the direction to steer to reach distant lands and return home."

Some materials can retain these properties for very long time (AlNiCo - AluminumNickleCobalt), even for centuries (Neodymium).

In 1926 Walter Russell blessed this civilization with the right Periodic Chart of the Elements of matter, where 126 elements of matter are classified into nine octaves each having an inert gas as its seed and four pair of elements, from which four elements are made of the compressing spirals of light waves which belong to the red side of spectrum, and other four elements are made of the expanding spirals of light waves which belong to the blue side of spectrum.

The element iron - like cobalt - is formed almost at the very amplitude of the wave. Its position is almost at the collision point where mates find unity in each other. Also, iron is on the red side of the spectrum division, and the red side bores within the blue when they seek unity. Cobalt is at wave amplitude and nickel and copper are on the blue side of the same octave. Because of this position in the wave, iron and cobalt are so constructed under high compression and high melting points that they can accumulate the power of electric potential to which they were exposed. After that source of electric power is removed, the spinning effect still continues within them, and will still continue for many years unless they are heated to a sufficiently high temperature to explode the power of electric potential, which these poles have accumulated. Conversely, cold multiplies that accumulated electric power which heat destroys. At absolute zero, polarity and conductivity are both more intense. It should be sufficiently convincing that the "magnetism" attributed to this **electric effect** could not be an existent force. This fact Factually, *cold multiplies electric potential, and heat divides it* (I define electric potential as measure of unbalance). of Nature should bring to an end this unnatural concept which attributes electrical effects to something other than electricity, like to magnetism.

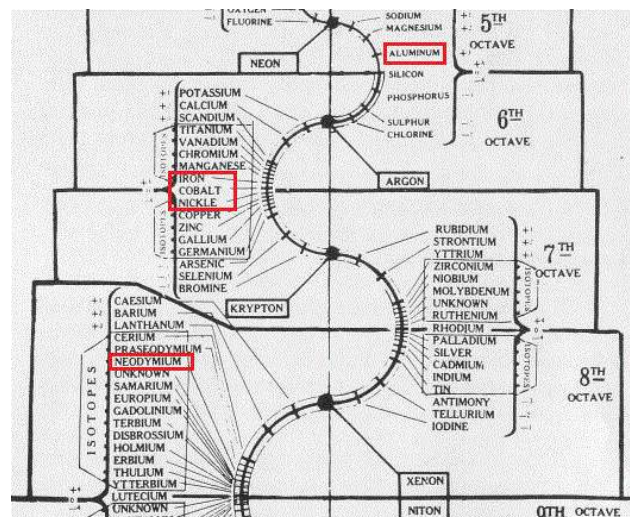

Figure 2: An excerpt from the Periodic Chart of the Elements of matter given by Walter Russell

Copper and nickel occupy the same position on the blue side of their octave that iron occupy on the red side, yet neither of them are able to accumulate the power of electric potential to which they were exposed. The reason for that is because the blue side seeks the outside of mass and, therefore, has lower densities, with consequent less power to retain a power of the motion (every motion is an electric potential).

### 3. The Secret of Seed and Growth

Now we arrived to the point where we could rightfully call this bar an electric bar, because its poles are actually points of very high electric potential. But, we still don't know the reason why these electric vortices are located at the very ends of the bar and why opposite poles of two electric bars vigorously move to each other and void their electric polarization, not "magnetism".

In order to find the right answer to this challenge let us start with the growing process from a seed, because electric bar is a prototype of the growing process which is division of stillness into polarized motion. Science has never been able to measure anything material that could be attributed to seed.

To me the morning light of day which walks toward noon is the same light which walks away from noon to again be the morning light to walk again toward noon. Knowing the cause of undivided Light of the sun which has no morning, noon or night in its eternal unchanging oneness, and knowing that the divided, ever changing day of earth is but extended from its undivided cause, I know both life and death for what they were, and not for what they seemed to be.

To you, however, who read these immortal words without that knowing, they are but words until your Soul knows their meaning in God's plan which simulates eternity by dividing One WholeGod's idea into pairs of opposite expressions which eternally repeat their opposite expressions to create an illusion of continual change.

That is what confuses you and all mankind. You see the continual change in every moment of the day, and every

form in it, and of every event in it. Something is moving and changing during your whole day and night of life to force you to think complexly. You cannot evade that confusion while your senses record naught but changing.

Confusion of the senses disappears through knowing the changeless Source of all illusion. To the extent that you KNOW the Source the confusion of senses will disappear.

In order to give you that knowing you must discard age old concepts which your senses have built up from the confusion of change and replace them with new concepts formed from knowing the changeless Source of undivided Oneness from which the divided universe of many changing, moving forms extend.

In order to build these new concepts we must become thoroughly familiar with the way God extends all changing forms of divided idea from their changeless Source in His Light. We will do that by the repeated use of diagrams and word pictures of simple examples of forever changing things which manifest eternal Life by Life's division into seeming life and death.

In beginning to explain the principle which lies behind life and death let me remind you that **Creation is the extension of God's One Whole Idea divided into countless many FORMS of many ideas imagined by Mind thinking.**

The form of any idea is not the idea thus extended. It is but the material body of the idea.

Idea is undivided and changeless. Idea has no body. Thinking takes idea apart and gives it thought bodies which are then manifested in material bodies.

Idea does not come and go. It is but the bodies of ideas which come and go. It is but the formed bodies of ideas which appear, disappear and reappear in what we call life, death and rebirth. These transient bodies simulate idea by form and motion but transient moving form cannot be the eternal idea which it manifests in forever repeating cycles.

Remember then, that it is the repeating cycles of manifested ideas which confuse you into thinking life and death, and not the idea itself. Idea is eternal and has no cycles. The BODIES of ideas only are pressed in cycles.

Cycles come and go - they begin and end, and begin again where they end - they appear and disappear to reappear - as bodies of PATTERNED thoughts.

We will clarify this life-death mystery going through the **process of building bodies from the eternal zero in the Light of their beginning, through the cycle of their appearance, and back into their disappearance in their eternal zero of equilibrium from which they emerged.**

We will first build the body of a tree from its beginning as a part of God's One Whole Idea of Creation.

We plant an acorn seed in the ground. In that seed is a million years of repeated life-death cycles. In that seed is the record of every stage of unfolding of that idea from its

beginning as a mold, or fungus, up through the stages of desire to become what it desired to be, which was in that seed a million years ago.

Examine it with the finest microscope and you will not see one trace of the body of an oak, yet out of it grows the full oak of many branches and leaves, no two of them alike.

That seed is the undivided father-mother idea of the eternal oak, which is about to be divided into pairs of opposite father and mother conditions, which produce bodies by interchanging their conditions.

**All creating bodies begin from a zero point of balance which become their equators.**--extend to allotted measures limited by desire - and return to the zero of their equators to give back the bodies they have borrowed from each side of it.

Let me impress upon you the fact that the **seed is but the Soul record of Mind idea.** It has no material body but it has a thought body which is patterned in the image of the thought. It is the Mind concept of an oak tree not yet conceived as a body in its mother's womb.

By saying that it is not yet conceived in its mother's womb I mean that it has not yet begun to be divided from its spiritual ONENESS of FATHER-MOTHERHOOD into its physical manifestation of The Divine Trinity as expressed by the division into father and motherhood.

Fig. 3 represents the beginning of this division by planting the patterned seed into the womb of mother earth.

Fig. 3

Fig. 4

Fig. 4 represents the static measure of desire for extension which is in the seed. The zero of the seed centers the two equilibrium zeros extended from it. The seed is the still fulcrum from which the tree will borrow its power to become a tree, as the lever likewise borrows its power from its fulcrum.

It must be thoroughly known and comprehended that the dimensions of the full grown tree, including the duration of its life cycle, are as meticulously recorded in its seed as are the patterns of its wood and foliage. **That which appear to exist in the visible universe really exists in the invisible universe.** The invisible idea is eternal.

The moment the division of the seed takes place the dimension of its former "incarnations" are already surveyed by the magnetic Surveyor of Creation and invisibly marked out for it upon both sides of its equator.

Fig. 5, therefore, represents the dimension of the two-way dynamic diameter extending at 90 degrees from the static diameter of earth. The dynamic diameter is the equator which is being prepared in earth and space which divides, balances and reverses the halves of the growing body. To review this idea in your mind pay attention to Fig. 6.

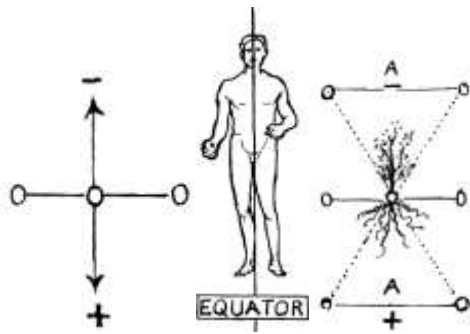

Figure 5

Figure 6

Figure 7

Fig. 7 represents the two extended static diameters which bound the predestined dimensions of the tree in accord with the dimensions of desire which have been registered in its seed. It can go beyond these dimensions if new desire is added to the seed, such as extra favorable soil, and weather conditions. This added desire can be given to it by human who adds his desire for a better tree to that of the desire of the tree.

In Fig. 7 the division has already taken place and the newborn tree has extended from its womb in the negative direction of motherhood toward space, while its roots have extended in the positive direction of gravitation toward fatherhood.

The important facts for you to take note of at this stage are these:

- 1) The division which begins to take place in the seed by the electric pumping action develops a negative and positive (polarized) condition above and below the equator where the division begins.
- 2) The positive direction of concentration (compression) is inward toward gravity. The roots of the tree follow that direction. The negative direction of deceleration (expansion) is outward toward space. The growing tree follows this outward direction.
- 3) Now carefully note the fact that positive electric vortex and negative electric vortex turn their backs to each other and pull away from each other as hard as they can to divide a static condition into a dynamic one. This is a very important point for you to take note of because science believes just the opposite of what Nature so obviously and plainly demonstrates. In fact, the Coulomb electric law states that opposites attract and likes repel. As we proceed you will see how utterly unlike Nature that law is.

*Electricity is the divider of one balanced, unchanging condition of stillness into two unbalanced conditions of ever changing motion which interchanges constantly to balance those unbalanced conditions to express LIFE--and to void them to express DEATH.*

Positive electric vortex and negative electric vortex are diametrically opposed to each other. **Positive electric vortex charges by multiplying motion into higher electric potential to manifest LIFE, and negative electric vortex discharges that electric potential by dividing it to manifest DEATH.**

If you will look at an electric bar you will find that it does just what the seed of the tree does. The electric current which divides the seed at its equilibrium point to pull one half of the tree inward to the positive center of the earth and the other half outward toward the negative area of the skies, does exactly the same thing to an electric bar.

Fig. 8 represents an electric bar with the electric current which polarized the electric bar by pushing both poles away from each other as far as they would go. Positive and negative electric vortices turn their backs upon each other at their starting point. That is what polarity is--a division into pairs of opposite directions of motion, which create opposite conditions--and opposites oppose. If they attracted each other their opposite poles would be in the middle of the bar - not at its ends.

Figure 8: Electric bar with positive and negative electric vortices

Now we know that bar poles are actually electric vortices: positive electric vortex which charges motion into higher electric potential by multiplying it into the smaller volume, and negative electric vortex which discharges that electric potential by dividing it into the bigger volume.

The next step in our journey to discover the complete truth about the electric bar is to answer the question of what these electric vortices are made.

#### 4. The Truth about Electricity

Science believes that electric current is a stream of charged particles, such as electrons or ions, moving through an electrical conductor or space. There is also belief in science that there is so-called "electrostatic unit of charge" which is imagined as a small ball, small sphere, filled with a phantom quality called "charge", which nobody can explain what it is, and the whole scientific theory of electricity and electric current is based on this electrostatic unit of charge.

As already explained above, there are two universes: the still universe at rest which God Is, and the Mind imagines material universe of motion, so that motion simulates stillness by the mental activity of thinking. In clear words, this material universe is made entirely of motion, so that "electrostatic unit of charge" cannot exist in the universe of motion. Everything that is static belongs to the still, motionless universe at rest. With that being said, the whole scientific theory of electricity and electric current fails in water.

To 'charge' means to be added to. The meaning of the word "negative" is to negate, to void, to empty or become minus. So, "negative charge" means literally "added to by

**subtraction**?! Does it make sense?! What does “negative charge” mean at all? How can something be “negatively charged”?

There is **charge** and **discharge** ONLY! In clear words, the negative charged particle, called **electron** in science, **does not exist!**

In order to clear this issue, let us look at some indisputable experimental results (see Fig. 9). Instead of electrons (balls or spheres) shooting out of the cathode (left side on the Fig. 9), as science believes, we see clearly light rings spinning in the parallel planes which are normal to the cathode-anode axis. Each of these light rings has its own center of gravity located in the geometric center of a ring, so that all these light ring centers build a gravity shaft.

**Figure 9:** Gas discharge: light rings with own centers of gravity spinning in parallel planes which are normal to the gravity shaft, i.e., cathode-anode axis

**The center of gravity is a still point which centers a light ring and which is source of energy from which light ring borrows energy in order to be able to spin.**

When these light rings are compressing a huge volume of space into the small volume of matter, we call them positive electric vortices, because they charge motion into higher electric potential by multiplying it into the smaller volume, and when these light rings are expanding a small volume of matter back into the huge volume of space, discharging that electric potential by dividing it into the bigger volume, we call them negative electric vortices.

**Both positive and negative electric vortices are actually high imbalanced states and that is the common (the same) in them which forces them to move to each other and meet in order to void their imbalances and find the balance.** But as soon as they find balance, they lose it, exchange their polarities and start the same game from the beginning.

With that beings said, we have found the answer to the mystery of electric bar, except one point which is not yet cleared. That is, namely, the role of gravity in this entire process. But, before we devote our attention to that issue, let us clarify the issue of the present belief in science.

The workings of electricity have been grossly misunderstood, which is very strange, for human has known

how to use it wonderfully, but has practically no knowledge of what it is or the WHY of it.

It is just as necessary for each of YOU to fully understand its workings as for the greatest scientist in the world, because electricity is the pump which motivates your body - and it is what you use to think with.

Electricity manifests the basic principle of Creation - the LOVE principle of equal giving and regiving--which is the principle of balance upon which your every thought and action is based.

## 5. Foundation of the Present Belief

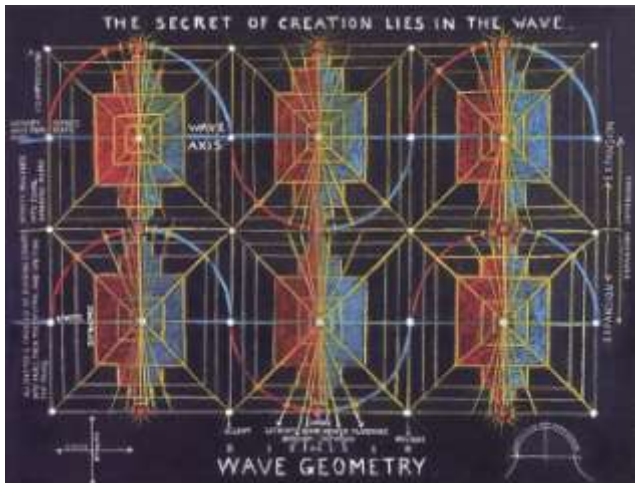

This refers to "International Science". It is strange but true that so little a thing as a wrong terminology adopted by science can be blamed for the tragedy of human even as so little a thing as a flaw in a rail can throw a whole trainload off its course and destroy many human lives. **That wrong terminology is based upon the concept of an electromagnetic universe.** The international science has reached its high pinnacle of success in commanding matter to do its bidding and obey its will without knowing the WHY, and yet being very skilled in knowing the HOW. One without the other is the most destructive element introduced into a civilization for it causes chaos and havoc with no means of correcting same nor rebalancing that which is unleashed with only ignorance of controlling the consequences.

In order to comprehend the power of motion in its desire to create heat and visible light out of the cold invisible Light at rest, which Mind is, Creation must henceforth be looked upon as a universe of Mind-imagining having no reality and be known as **OPTICAL UNIVERSE OF GRAVITY-CONTROLLED LIGHT**, for **God is Light and God's Mind THINKS in waves of light.**

The Christ, the consummate Illuminate of all time, told you that two thousand years ago but you didn't comprehend its meaning. The Krishna of the Bhagavad-Gita also told you that three thousand years ago but only the people of the Eastern culture faintly comprehended it. The "Ancients" always knew it and handed it down since the "beginning" through the oral tradition of holding knowledge - and now their offspring have all but "forgotten" also. I shall now tell you WHY human has not yet comprehended those teachings, for which he is paying the dreadful price by sinking into long ages of periodic mental darkness. We will begin at the beginning and clarify each step briefly and expand on them later.

The secret of Creation lies within the light-waves of motion which gravity compresses into rings of light in which density first increases toward the outside by thrusting outward from within until the centering holes have been closed into hot spheres. Density then increases in the inward direction. This is accomplished by the octave-wave process which multiplies power by projecting it from the stillness of its Mind-source by dividing it into mated pairs which science calls the elements of matter (See Fig. 10). This constitutes the sex-principle of life which science has so strangely neglected

to observe as being the BASIC FACTOR OF MOTION. This clarifies the meaning of the divided curved universe of motion from the undivided universe of rest which the Illuminates, sages and prophets of the ages have tried to define.

**Figure 10:** Waves compress the invisible Light of cold space into visible light of incandescent suns. They then expand it to return visible light back into cold space. This they do by means of gravity-controlled curvature which is God Aton's only tool to work in creating this universe of motion

Human's science has already unknowingly conquered this principle, as you shall see. You shall also see that **knowledge of the wave** is human's measure of his power to command matter.

**Figure 11:** The Sex Principle

It is a failure not to recognize the secret of life as being the sex principle which lies within the motion of light-waves. The alternating sequences of compression and expansion are the very cause of motion, as indicated by their sequential equally interchanging in-breathings and out-breathings. It is these very generative, compressive in-breathings from the cold of space which cause the multiplication of heat in your body or in the body of the sun. Radiative out-breathings then divide it by expansion. To designate this effect of compression-expansion sequences by electric terminology such as positive and negative charges is totally unlike Nature's processes of creation of matter. It overlooks the fact that these action-reaction sequences are interchanging between the heat and cold of the divided spectrum of matter. Human's laboratories are unaware of the fact that they are

unknowingly on the way to discovering the transmutation process, for that process demands the power and knowledge to control gravity in such a manner that they can compress or expand it to high limits.

Why, therefore, relate effect to electricity when light and power companies have only light and heat to sell? Why, also, relate them to magnetism when they have no magnetism to sell? Power companies can produce light and heat only by resistance to motion, which induction accomplishes. **Friction, induction and compression ARE ONE.**

If a human scrapes his feet on a rug and touches metal, he will produce a light only. **Why call it electricity?** If a meteorite, or a spacecraft, springs into visible light by the friction of resistance through the atmosphere, it produces light only. **Why call it electricity or electromagnetism?** One can produce visible light and great heat by focusing centripetal rays upon cold bodies through biconvex lenses, **but that would not justify the light thus produced to be termed opticy.**

The term "magnetism" is also unjustifiable. The word GRAVITY would be used instead, for **gravity both multiplies and divides by thrusting inward from without to compress and outward from within to expand.** In this manner, *gravity controls light by controlling its curvature, and Mind also controls gravity by limiting both outward thrusts to the cube mirror planes of zero curvature* (see Figs. 12, 13, 14, 15). This is in complete opposition to the Newtonian law of gravity which claims that gravity pulls inward toward a center and that matter attracts matter. It is also in opposition to the second law of thermodynamics which claims that energy cannot run uphill but only downhill.

Factually, there is no inward pull of light toward a center nor are there such effects as attraction or repulsion of matter (meaning light) to other matter. I know that this statement will cause a storm of protest from scientist and layman alike, but if both will withhold judgment until we analyze the laws of Coulomb and Newton, I will dispel that mystery.

No scientist can create energy by pulling in inward from within.

cold, it can also multiply the power of conductivity of such soft metals as aluminum to equal that of harder metals such as copper.

Many laboratories have already done this, and the Du Pont Company has created what it terms new non-conductive substances by the opposite direction of expansion. All of these laboratories have been on the way to a solution of the principle of transmutation but, unfortunately, are unaware of it. Furthermore, they have also been on the way to the control of gravity, which a certain distinguished scientist said would climax all discoveries by giving human an unlimited command over matter. **Science has long ago been in control of gravity but is, unfortunately, also unaware of that.**

It is a small wonder that Newton was deceived. His senses perceived that an apple fell **TO** the ground. He did not perceive that as the apple fell, its equal in potential arose simultaneously **FROM** the ground and sequentially the entire apple arose **FROM** the ground and its equal potential fell **TO** it.

Coulomb uses the term "magnetism" under the "ASSUMPTION" that this universe is an electromagnetic one, but that means "matter" which is the term used by Newton. **Both of them overlooked the vital fact that there is a zero of attraction and repulsion between stars or planets and between poles of a bar magnet. Astronauts find that zero position but they do not call it "magnetism"; they call it "GRAVITY" and that is what it is.** Iron filings will not adhere to the center of a bar magnet. Textbooks show that they will adhere only to the poles.

It seems as illogical for Coulomb to have assumed that the iron filings were **attracted** to the bar magnet--which should properly be termed a "**gravity bar**"--as it is for Newton to have assumed that the falling apple was **attracted** to earth. To have told either of them that both the apple and the filings were projected there by the **force of compression** exerted from the **outward toward the inward direction**, instead of **pulling inward from without**, would have been met with a blank stare and not listened to.

That is the right explanation of it, however, and it is our responsibility to explain it so clearly that any open-minded present-day scientist WILL SEE how consistently it fits into Nature's simple pattern.

A greater knowledge of the light-wave and its cycles is, therefore, necessary because **the secrets of the universe lie within the wave. As light-waves have their nine-octave multiplying power to bring invisible Light of negligible heat into visible intensely hot suns and nebulae**, and as International Science is still unaware of that process, we are revealing it as our step-by-step way of completing our road map into knowledge. Heretofore we have said that the universe consists of THE UNDIVIDED UNIVERSE OF REST AND THE DIVIDED UNIVERSE OF MOTION. The first known Illuminate, the Krishna of the Bhagavad-Gita, used the term over and over again. It is not complete, however. It accounts for but half of the wave cycle.

Recent discoveries in world laboratories have indicated that Science is now ready for some new input for the ones who recognize the mechanisms have developed some pretty gross and spectacular things through this comprehension. Remember-- truth of a scientific fact works for the just and the unjust and thus far, the higher technology has been thrust to deceit and delusion, destruction and the furthering of evil intent. It is time for Human to wake up and take control and return KNOWLEDGE into the LIGHTED INTENT.

There are some real "miracles" appearing to come forth from the laboratories and honest scientists who dare to speak out confirm the fact that this totally new Cosmogony is gradually being comprehended in scientific circles. It is a major reason WHY THE MEDIA AND PRESS HAD TO BE PLACED UNDER TOTAL CONTROL AND BE SILENCED.

The complete description of the wave is description of THE UNDIVIDED AND THE DIVIDED MULTIPLIED UNIVERSE. This completes the cycle. The DIVIDED UNIVERSE accounts for but one swing of the cosmic pendulum. **It does not account for its countless repetitions which have given you a universe which had no beginnings and has no endings.**

**This new two-way principle accounts for the simultaneous invisible swing of the pendulum from its zero of stillness to its compression focus and back again through expansion. It also accounts for the voidance principle which makes of this universe an imagined one in which every happening anywhere is voided by its equal "unhappening" everywhere.**

It accounts for the motion picture universe of illusion which many great thinkers have suggested as a probability for if the light of human's cinema were turned off, the sequential stills which constitute the illusion of motion would disappear. So, also, would the sequential waves of light of the Cosmic Cinema of the Creator's thinking disappear into blank space.

**God's cinema changes pattern constantly because God's thinking changes constantly, but as changing only seems, likewise, motion only seems.** When you stop thinking, the patterns of your imagining also cease. Can you not readily comprehend that Creation is but a record of continuous thinking? Can you not also see that everything which seemingly happens "unhappens" simultaneously, to coin an expressive word for better understanding?

Your body and every moving thing in Nature are walking constantly into a mirror of yourself. As your body appears, it simultaneously disappears but the sequences of it deceive your human senses by giving a feeling of continuity which is not justified.

There is so-called "Law of Illusion" or "Voidance Principle" which reads: **Every action-reaction of wave motion is voided as it occurs, is repeated as it is voided, and is recorded as it is repeated, or: EQUAL AND OPPOSITE ACTIONS AND REACTIONS ARE SIMULTANEOUSLY CREATED AND SEQUENTIALLY REPEATED.**

All effects of time, dimension, sound, and sequences of night and day from which the illusion of time springs are, likewise, the result of seeming motion.

The spiraling though light waves of Creation revolve around the Zero Stillness (Gravity) centering, controlling, balancing point. The mental Force of Gravity is compressing from outside toward inside, not pulling from within. Gravity is not a physical force, but a mental force which can be defined in this way:

**Gravity is a measure of Mind desire for creative expression through manifestation by action! Gravity is scientific term for Love which God Is.**

Figure 16: Gravity Bar

Let's call it a gravity bar, not a bar magnet. It has four pairs of gravity poles that focus spiraling light into wheels of compressed light spectrum (elements of matter).

Figure 17: Mind knows, but senses deceive!

Radiating matter seeks a radiating condition in the outward direction of radiation. Gravitating matter seeks the inward radial direction of condensation to find its like condition.

Opposite poles of a gravity bar push away from each other as far as they can go. That is the very purpose of the electric current which divides the universal equilibrium. If opposite poles attracted each other they would have to be together in the middle, instead of pushing away from each other to the very ends.

When depolarization takes place the poles seem to draw closer together, but that is because of their lessening vitality. They still pull away from each other until devitalization is complete. When motion ceases, the matter, which it manifests, ceases to be.

Scientific observers have been deceived by their senses into thinking that opposites attract each other because of seeing the north pole of one magnet pull toward the south pole of another magnet.

The fad that opposite polarities void each other when thus contacted has not been considered as a factor in the matter. It is a fact, however, that when two opposites are thus brought together by their seeming eagerness to contact each other, both poles cease to be. Each one has voided the other as completely as the chemical opposites, sodium and chlorine, void each other and leave no trace of either one after that contact.

If the Coulomb Law were valid it would not be possible to gather together one ounce of any one element. We would be not able to find anywhere in Nature one gram of the same element, but thanks God it is not so, as we know.

Gravity controls the moving universe but human has never known, nor even suspected, that his own immortality and gravity are ONE in their centering of her/his sensed body. Nor has (s)he ever known that gravity extends to a shaft as his body extends from thought-ring planes to mass, and as equators divide to become pairs and united to lose their division. These things Human must know together with the omnipresence of gravity which but seems to the senses to extend into shafts made up of many points, which are all ONE. When Human overcomes this illusion of the senses (s)he, likewise outgrows the possibility of forming sensed conclusions such as the nuclear atom, which violates all principle of this electric universe, which Nature is.

## 6. Polarity

You see the positive pole of a compass needle pointing toward the negative pole of a magnet and the negative pole of the magnet pointing toward the positive pole. This evidence is one of the bases of conclusion. That is what your eyes see. **What actually is happening is that they are voiding each other's unbalanced condition to seek balance through each other.**

Opposite poles get as far away from each other as they can, until their opposition is voided by balance in their fulcrum and they cease to be.

When the positive pole of a magnet is brought into contact with the negative pole of another magnet, that effect which you think of as attraction is one of avoidance. It is a cessation of opposition or power to manifest anything. Polarity utterly ceases extending at that point as each opposite extends to each opposite end, each getting away from the other and through the other, spirally, as far as it can.

If opposite poles attracted each other, they would be together in the middle of a magnet instead of at its ends.

## 7. Polarity Periodicity

Nature is engaged in the making of but **one form--the cube-sphere--**which means the same as though we said female-male of Human. **The sphere is the positive centering sun.**

*The cube is the invisible surrounding wave field. All matter is thus divided into positive solids surrounded by negative space.*

As matter begins its formation into spheres its first shape is disc-like, for it begins as the base of a cone. In a series of efforts which constitute the octave wave, the first disc-like effort gradually prolates until the perfect sphere is formed at wave amplitude. **This is the process by means of which "matter emerges from space" (Fig. 18).**

**Figure 18:** The generative compressing phase of the process of creation

**Figure 19:** The degenerative expansive phase of the process of creation

During this process the balance poles which control all matter move gradually toward the pole of rotation. When the sphere is perfected, as it finally is at carbon, the two poles coincide with the pole of rotation and the equator of the perfected sphere is 90 degrees from the wave's axis. Likewise, the wave field becomes a true cube. Likewise, any element which reached its true sphere status will crystallize as a true cube. Likewise, any divided pairs of elements which unite as one on wave amplitude--such as sodium and chlorine--will crystallize in the true cube shape of its wave field.

Conversely, as true spheres oblate (Fig. 19), the two balancing poles move away from the pole of rotation and toward the wave axis, until depolarization is completed and gravity poles disappear in the plane of the wave axis. **This is the manner in which "space swallows up matter".**

The mechanics of this process of polarization and depolarization, under the guiding control of **two pairs of**

**gravity poles** has already been more fully described in [1-27]. This process of polarization takes place with increasing intensity for one half of every cycle, the ether of one breath, the cycle of a day, the year, or a lifetime.

A human of forty will have reached his fully polarized strength to manifest life in the first half of her/his life-death cycle. Depolarization then assumes control as polarity reverses at the wave amplitude of Human's life cycle. Devitalization then begins and from there on Human manifests the death half of the cycle.

This process takes place in every creating particle of matter or any combination of particles, whether in Human, ant, electron, or nebula.

As polarization **increases** in intensity, the strains and tensions set up by the desire of opposite of polarity to pull away from each other, increase in their intensity. This fact is exactly the opposite effect from conclusion stated in the Coulomb Law.

As polarization decreases, the strains and tensions of electric opposition relax, until polarity disappears in the rest condition of the equipotential plane of the wave axis. This fact should not be interpreted as opposite polarities attracting each other, for depolarization means that the ability to oppose lessens as each pole voids the other in the rest condition, but they still pull away from each other until their end. The entire process of polarization and depolarization of every action-reaction of Nature could well be described as a lever reaching out in opposite directions from its fulcrum until it could reach no farther, then reversing those directions and **unwillingly withdrawing into its fulcrum** where motion ceases to again begin, and again reverse.

To account for this unnatural phenomena The Coulomb Law was adopted, which says that opposites attract, meaning oppositely sexed mates; and likes repel, meaning similarly sexed pairs. This law is **invalid**, for oppositely sexed mates **do not attract**. They are forced into collision by the electric action of dividing Oneness into unit pairs. The instant that they do collide they use their utmost endeavors to re-attain the sex-divided condition by recharging their discharged condition. Nature helps in this process by assisting to recharge with every heartbeat, every breathing cycle, and the food one eats.

The purpose of this writing does not allow further amplification of this process in the nature of electricity, for enough has already been given in the high points of essentials to serve the purpose of this writing. It is not well, however, to leave this mystery of how "magnetism" picks up iron nails and "attracts" steel needles, unexplained, for the entire electrical engineering world is paying heavily for lack of this understanding in many ways, the more expensive one being the vast wastage caused by building improper coils, solenoids, armatures, step-up, step-down transformers and electronic tubes.

Wire coil creates an *electric* field, not a *magnetic* one. *There are no magnetic fields in Nature. There are electric fields of curved motion, which are bounded by magnetic planes of*

*non-motion and zero curvature.* It must be borne in mind always that any expression of motion anywhere, is omnipresently repeated everywhere. The human consciousness has not quite acquired that sense of omnipresent repetition as yet but familiarity with it through TV and radar is developing it. Any experiment is, therefore, not a local happening which is taking place in a laboratory and nowhere else. The electric field provides for it to happen there but the magnetic geometry of the zero universe provides for it happening universally by Nature's radar system of extensions from zero points of stillness, which become mirror planes of stillness invisibly formed in space, to repeat the divisions and multiplications of motion in any part of the universe to every part of it.

Regarding the compass needle which seeks the point of north at one end and the point of south at the other end, the principle is the same. Every compass needle is a miniature bar magnet. If you place a lot of iron filings on paper, in the familiar way shown in all text books, and shake them over a magnet, those filings will form curved lines. These curved lines are called magnetic lines of force on that paper, and also in the so-called magnetic field of a planet. They are not magnetic lines of force. They are merely the curved planes of opposing pressures which electricity is causing in its efforts to compress. The vortex of gravity which is in the compass needle will follow these pressures. Every effect of motion in this universe is an electrical effect caused by electrical force acting under the control of the invisible universe. The invisible universe entirely dominates and controls the visible universe, but motion is entirely electric.

So, we have briefly given the essentials of the construction of matter and the true nature of electricity, gravitation, radiation, and magnetism. Even though the entire process is as simple as we stated, its aspects are many, for its effects and its divisions are many.

In the turn of this century, a couple of persons conceived the idea of atomic construction as being based upon the firm belief in the Coulomb Law, which says that matter attracts oppositely "charged" electrical matter, and repels similarly "charged" matter (Rutherford and Bohr). Nothing could seem more convincing, for one pole of a magnet seemingly "attracted" its opposite and "repelled" its like. It never occurred to them that **males and females do not unite with their own sexes**. If the sex idea, in relation to electricity, had occurred to them there would never have been a Coulomb Law, nor a nucleus in an atom. Nothing could be more convincing to sense-reasoning than the very self-evident fact that there must be two kinds of electricity--even if the electric current did run but one way, but with an unproved suspicion that it ran two ways.

In the Mind of **any creator of any product is the IDEA of the formed body which Mind desires to produce. Also the KNOWLEDGE, ENERGY AND METHOD OF PRODUCTION** are in the Mind of the creator of that product and NOT in the product. The architect does not say that the energy, idea, or construction methods are in the temple of her/his conceiving, nor would Human say that they are in the temple of God's conceiving. Thus the claim that energy is a property of matter is to deprive The Creator of

HER/HIS omnipotence and omniscience.

The entire universe MANIFESTS power, but the universe is NOT THE POWER which it manifests. Not one particle of matter which constitutes the material body of any product can move of itself. **It can move only through desire and command of the Mind of its creator.**

The powers of attraction and repulsion which science mistakenly attributes to matter are electrical effects performing their one and only function of dividing equilibrium into two opposing conditions, which extend equally from a dividing equator. The magnetic Light controls the balance of these two opposing conditions, which interchange two-ways in their endeavor to void their opposing conditions, but the stresses and strains which **seem** to make matter attract and repel matter are electric effects.

**Electric effects of motion can be insulated from each other--but the magnetic Light of The Creator, which causes those effects, cannot be insulated from matter by matter.**

**All matter is electric. Electricity conditions all matter under the measured control of the ONE MAGNETIC LIGHT which forever balances the TWO electrically divided, conditioned lights of matter and space.**

Divided matter strains to find balance in the zero of equilibrium from which it was divided. The senses of human are mightily deceived by the illusions of appearance, which cause him to conclude otherwise.

Newton's apple was not attracted to the ground by gravitation. The high electric potential condition of that solid apple sought a similar high electric potential condition. **That is to say it "fell" toward earth to fulfill Nature's law of like seeking like.**

**Had Newton sat with the apple for a week or two he would have seen that same apple "rise" unto the heavens as a low electric potential gas seeking a like low electric potential position to balance its electrically divided state. The "rising" of the decaying, expanding apple again fulfills Nature's law of like seeking like. This is a most important point to consider regarding GRAVITY!**

All polarizing bodies add to their densities and electric potentials. The apple which fell to the ground was a polarized body. All polarized bodies must reverse their polarities and depolarize. They then lose their densities and electric potentials. The depolarized apple returned to the zero of its beginning.

The Newtonian Law is, in this respect invalid, for it accounts for but one half of the apple's growth-decay cycle. This is a two-way universe of opposed effects of motion-- not a one-way universe.

## 8. The Principle of Unfolding-Refolding

Electricity is the servant of Mind. It does all of the work of Creating this light-wave universe in unfolding-refolding

sequences which Mind desires. **The universal Mind has two desires--the desire for creative expression through the action of concentrative thinking and the desire for rest from action through decentrative thinking.**

One desire is for separation from Oneness into unbalanced multiplicity and the other is a voidance of multiplicity into balanced Oneness. *One desire is for action and the other for rest.*

These two desires of Mind constitute the give for re-giving principle by means of which all things in nature grow or unfold by appearing from the void of rest in the kingdom of heaven from which all creating things appear, reappear and disappear in sequential cycles.

The electric expression of the two desires is reflected in the pulse beat of the universe. One pulsation compresses, the other expands. The compressive pulsation gives form to idea by seeking rest at wave amplitudes through centripetal action. The destructive pulsation voids form to seek rest at wave axes through centrifugal reaction. These two opposite desires are characteristic of all effects of motion. All animal, vegetable and mineral life seeks action and rest alternately. All effects of motion manifest that principle. A ball thrown in the air seeks rest from its action and returns from its unbalanced condition to seek out rest through reaction.

After a day of work Human rests from action so that (s)he may repeat her/his day of action.

Because of these two opposite desires of universal Mind-thinking, all creating things appear on earths from the void of their heaven, disappear from their earths into their void in the heavens and reappear from that void to repeat their desires. **This explains the mystery of "matter appearing from space to be alternately swallowed by space".**

The two opposite electric expressions of desire of Mind unfold all idea of Mind from its pattern in the seed into imaged forms to simulate the idea of Mind and refolds it back into its recorded pattern in the seed, for again unfolding. Each one unbalances the other in order that each may seek balance in the other to disappear and reappear as the other.

Positive electric vortex is the father-light, which gravitates toward a point of rest which centers all creating things.

Negative electric vortex is the mother-light which radiates toward planes of the One Light at rest, which bound all wave fields of motion.

Positive electric vortex winds the light of motion into dense solids around points of still magnetic Light. It compresses motion into incandescent spheres surrounded by the vacuity of negative electric vortex.

Negative electric vortex unwinds the light of motion from dense solidity to tenuous vacuity by expanding it into cubic wave fields of space.

Positive electric vortex pulls inward spirally from without

against the opposing resistance of negative electric vortex which thrusts outward spirally from within.

This two-way radial universe of seeming motion is the product of these two opposed electric conditioners of matter which pass through each other in opposite direction. Each interchanges with the other in sequential pulsations as they pass through each other from points of gravity to wave field boundaries and back again in endless cycles. Each becomes the other at halfway rest-points of their cycles.

Large scale examples of this process can be seen in any of the spiral nebulae, notably Nebula 74 Piscium. Two fiery spiral arms of radiating mother-light reach out from the equator of its central sun to born its countless other suns and earths by unfolding them from its centering seed.

Two black arms of gravitating father-light pull spirally inward from the heavens toward the pole of the centering giant sun to generate the sun in incandescent oneness of all form. The father-light of gravity refolds all unfolding forms from Creation's seed.

Radiation is the female principle of Creation. Radiation unfolds from the seed. Radiation is light outwardly bound from the seed.

Gravitation is light inwardly bound toward the seed.

Outwardly bound light manifests the unfolding of patterned light from the seed. It is the mother of Creation. Inwardly bound light manifests the refolding of patterned light into its seed. It is the father a Creation.

The generative light of gravitation and the degenerative light of radiation are projected through each other from rest to rest in pulsing sequences to manifest idea by borning father-mother forms of idea through their voiding interchange. **This principle of rhythmic balanced interchange between father-mother lights of gravitation and radiation is fundamental in all creating things. It is the principle of two-way equal giving which manifests the quality of Love in the Light of the ONE.**

Pairs of opposites are drawn into each other's vortices where they void each other, passionately. Each is then nothing, a zero simulating that Zero of their Source from which they sprang--but they are also seed for another seeming two which emerge from the Oneness of their Source.

One of the great illusions of the senses is that matter attracts and rebels matter. It is also believed that oppositely charged electrical particles attract each other and like charges repel. If a scientist cannot get beyond this illusion--there will be no fulfillment of free energy, devices used in healing, nor any other TRUTH IN INVENTION.

There is much evidence of the senses to justify such a conclusion, but it is of the same illusive nature as the evidence which deceives the senses that railroad tracks seem to meet upon the horizon.

You see the tides rise toward the moon on one side of the

earth and away from it on the other. You conclude that the moon attracts the earth and thus pulls the ocean toward it, but that does not account for the fact that the tides rise on the opposite side of the earth away from the moon. **What is actually happening is that all conditioned matter is constantly seeking to balance its condition with all other matter.**

The moon and the earth center their own respective wave fields surrounded by space. All wave fields are bounded by planes of zero curvature, and a zero pressure condition which insulate each field in the universe from every other field. The very shapes of wave fields of earth and moon are forever changing to adjust their balance as the moon revolves around the earth. As a result, the mutual equators of both fields must lengthen, disc-like, on a plane which intersects the center of gravity of each body. Naturally the tides rise toward, and away from the moon. If the earth were all liquid instead of solid, it, likewise, would lengthen appreciably at its equators, disc-like, and flatten at its poles to meet the interchange of balance between the fields of the moon and sun, as Jupiter and the outer planets are so noticeably doing. It would also throw off rings from the equatorial plane as Saturn and all the stars of heaven are doing, and for the same reason.

So, God is the Soul of His universe of creating things. Within God's Being is desire for manifesting God's Being. Desire in God is Soul in God. That which is Soul in God desires to manifest in form thought light. From Soul in God light extends and returns to Soul in God, the extension and returning being two seeming lights of God.

Again I say, God Is the seed of God's unfolding-refolding universe. Within God's Light all formless seed of planned idea are enfolded in God's Being at rest in God. And again, repeating, all things extend from God and return to God. From God all things are born from seed of thought in God, and born again, with each pulsation of God's thinking.

There is nothing but birth in God's imagining. There is no death in God, for endings and beginnings are one in God. Nothing but life reaches out from God, and nothing but life meets returning life for rebirth in God.

## 9. Matter is Powerless to Attract

Matter neither attracts nor repels other matter. Unbalanced conditions in matter seek balanced ones. All matter is motion constantly seeking rest. This it can find only by balancing its condition with matter similarly conditioned by voiding the tensions of its sexed condition. That alone is the cause of motion and the reason for its continuance or discontinuance.

## 10. All Matter in Motion Seeks Rest

**This is a universe of ONE THING.** All matter which is electrically separated from that oneness seeks it. This is a fundamental principle and underlying desire of all Creation. It is as true of humans and their emotions as it is of matter.

We again repeat that electricity is a division of the One Light into two extensions of the Light projected-through each-

other, each becoming the other alternately. The One Light is a pressure-less and sexless condition. The two lights which are extended from the one are opposed pressure and opposed sexed conditions.

**Thus there are but two conditions of matter--either expanding from stillness or contracting toward stillness.** Each condition arises from the other. The instant it becomes its own opposite it gets as far away from that opposite as is necessary to find balance in a like condition. It seeks its like condition to find rest in a balanced condition and not because the matter of it is attracted by the matter it seeks. A log floating down stream is seeking a balanced condition and is not being attracted by the dam or by other logs.

These opposites represent the compression-extension father/mother principle which integrates light into solids and disintegrates it into vapors and gases.

## 11. All moving Masses are Unbalanced

I trust all you would-be scientists are taking note of this writing--for within lies the total "secret" of ALL things. The utilization of this material is for you who read this material to decipher.

To say that these opposites attract each other is equivalent to saying that north attracts south, that inward attracts outward, that wetness attracts dryness, or that darkness attracts incandescence.

Water, for example, is a compressed condition. When water vaporizes it expands into its own opposite condition. It then seeks rest in clouds of like condition. When it thus finds rest in a balanced condition, its motion ceases and its opposition also ceases.

## 12. Illusive Evidence

Another effect of motion which has misled the senses into believing that opposites attract is that hot air is said to rise toward cold and cold air to descend toward heat. That is not what is happening, for like seeks like. **Cooling air is expanding and rising toward cold, and heating air is contracting and falling toward heat.**

Negative oxygen bubbles gather at the positive pole of a charging electric battery and positive hydrogen bubbles gather at the negative pole. What is actually happening is that the positive pole is taking the positive condition out of the water, leaving the negative oxygen as residue. The negative pole is, likewise, taking the negative condition out of the water, leaving the positive hydrogen as residue. Again like seeks like.

The outstanding demonstration of the principle of like conditions seeking like is in the elements of matter. If opposites attracted opposites according to present concepts, it would be impossible to gather together one ounce of the same elements. All elements seek their kind. In any chemical decomposition of compounded mixtures, each element seeks and finds similarly conditioned elements--preferentially "identical".

Nature's gyroscopic principle does this automatically. Every element has its own gyroscopic relation to the axis and amplitude of its wave. Each seeks that relation of pressure and moves until it finds itself in the orbit of its own gyroscopic plane of pressure. This is simple balance and cycling of the Universe (as Creation's physical laws of balance.)

It is time that Human gets the translation of God's thinking--for her/his guidance. God Is Balance. In God all God's imaginings are totally balanced in their seeming unbalance. God adds, but that which God adds to one pulsation of God's thinking, God subtracts from the other one.

God divides; but that which God divides, God multiplies. So the nice saying goes like this: Love is God and Love adds and multiplies as you divide it with others--subtracted it always leaves a void which, if left unfilled--will destroy the whole.

God's pairs of opposites are equal; but again God says that they are opposites, and opposites oppose in God's universe.

**Opposites VOID opposites, while likes RETAIN their friendly orbits side by side.** All the suns of heaven give light of each to each, while the dark voids the light and the light, likewise, the dark.

God's two lights move in opposed ways to avoid the other's path, but find these paths to be lanes leading into and out of vortices centered by but one rest pole where the two poles are nothing, having never even met as two.

*So again: Pairs of opposites are drawn into each other's vortices where they void each other, passionately. Each is then nothing, a zero simulating that zero of their Source from which they sprang--but they are also seed for another seeming two which emerge from the Oneness of their Source.*

**It is not possible for this age of human to comprehend God unless false conceptions of electricity, magnetism, gravitation, energy and the construction of the atom, as now conceived, are eliminated and replaced with Nature's way and processes.**

All of Human's fundamental conceptions have been the result of forming conclusions which have been based upon the outer-vision of the senses, and not upon the inner vision of the Mind. The senses see illusion and are mightily deceived. Mind-vision does not deceive for CAUSE begins there, and EFFECT is but its product.

Now, I herein remind you that we are speaking of "inner-vision", not "visualization" as practiced by most "New Age" or "Positive Thinkers".

The truth of all fundamentals of Nature are just the reverse of the conclusions of science, just as the reflection in a mirror are the reverse of their cause. These conclusions began with someone rubbing amber and glass with wool and silk, and progressed through Newton and other very much deceived observers up to the fantasy of Neils Bohr's impossible atom, which has no resemblance to Nature, whatsoever. The gravity concept at least resembles Nature in

reverse, but the Rutherford-Bohr atom has not even that virtue.

The familiar model of the atom, which shows electrons moving in orbits of many intersecting planes around one centering nucleus, is an utter impossibility in Nature. It defies every principle of the electric current and the wave, and should, therefore, be relegated to pure invention. It is difficult to describe the shocking effect such a concept has upon an Illuminate who can "see" into the atomic or stellar system without microscope or telescope, while the outer-vision cannot even discern what holds matter together with twenty million dollar cyclotrons. When you know Nature's working principle you will comprehend what a shock it is to know that it is possible for an enlightened age to believe that electrons in certain numbers revolve around inert gases. When you know what the office of inert eases is in Nature, you will be even more shocked.

To exemplify my meaning let me remind you of the familiar belief that magnetism is a force, separate and apart from electricity, which has the power to pick up nails on a bar magnet and tons of iron on a giant magnet. Scientific terminology is redundant with references to such effects as magnetic lines of force, the earth's magnetic field, and electro-magnetism, when every effect attributed to magnetism is solely electric. Furthermore, there is no such separate force as magnetism which performs the work of Creation. **That which Human thinks of as a magnetic force is spiritual Light of Mind and not a physical working force of Creation.** Likewise, you hear constant references to negative electricity, negative charge, and negatively charged particles, which I have already pointed out, ARE IMPOSSIBLE in Nature--as silent sound is impossible.

Perhaps the most fundamental of misconceptions is the Coulomb electric Law which says that opposites attract, and that gravitation also is a force which pulls inward from within, and that it attracts other bodies, when in fact, both of these belief are just the opposite from the facts of Nature upon which they were misconceived, as we also have pointed out prior to this. One of them is GENEROACTIVE, which multiplies compression. That is Nature's "uphill flow", which charges. The other is RADIOACTIVE, which multiplies expansion, and that is its "downhill flow", which discharges. For this reason it is time that you begin to know the true nature of electricity and magnetism as we have given it to you, rather than theorize from what your senses seem to tell you.

When the true nature of electricity is comprehended it will then be possible to comprehend why the Rutherford-Bohr atom concept is utterly unlike Nature. You will gradually understand that all Nature is based upon the love principle which is expressed by **giving and regiving**. Nature never TAKES. The present concept of gravity is based upon TAKING for it supposedly pulls inward from within itself. Nature does not work that way. Nature does not even "absorb from within", nor are there inward explosions in Nature, nor is there such a force as attraction or contraction. This seems to be an amazing statement but it is a true one, nevertheless,

as you will see when you go back to **cause** and are no longer deceived by the illusions of **effect**.

Human's concept of gravity as being an attractive force, which pulls inward from within, is diametrically opposed to the facts of Nature. *Gravity is the controlling center of a compressive electrical force which is exerted from the outside of matter instead of within it.* As you gradually understand the electric wave and its enclosing cubic wave field, and the balance principle upon which all motion is based, you will have different concepts in relation to attraction, contraction, absorption, balance and the universal equilibrium. When you fully comprehend what the invisible Light is, and the two divided lights are, you will also have a different concept of matter.

I can now proceed to build true concepts as a basis for your comprehension of God and God's process for creating the pairs of units of divided light in motion, which are known as matter. So fully has science been deceived by the illusions of motion that it has built up a great field of its own in the scientific world which is commonly known as nuclear physics. As its name implies, this concept is based upon the belief that the atom is held together from its inside by a nucleus, and that nucleus is composed of certain particles which act upon each other in some mysterious and unexplained way to hold themselves together and cause oppositely charged particles, known as electrons, to revolve around them. These electrons supposedly revolve in shell-like layers around the nucleus. By adding one more electron to each element it becomes the next element in the series.

There are no particles, or groups of particles, which hold the atom together as nuclei. Gravity does not work that way. All creating matter is centered by holes of space except one element in each octave. **The energy of Creation centers each note. That centering, invisible, omnipotent Energy is God's mind and your Mind. Naturally you cannot see it, but you can KNOW it, for it is your Identity, and your Intelligence. It is the Source of your creations as it is the Source of all Creations. That is what was meant when Emmanuel told Human that the Kingdom of Heaven is within. That also, is what He meant when He said: "My Father and I are ONE."**

*The time has come in human history when all men must know exactly what these teachings of the great Illuminate really meant. The time has come when human's spiritual unfolding shall awaken the Light of genius--Cosmic Consciousness and Christ Consciousness--in all men. Human will never know the happiness and peace of One World of Universal Brotherhood until that day shall come. Furthermore, the adversary who would keep you in ignorance will utilize the very words necessary for understanding and destroy them in meaning--usually producing a directly opposing definition.*

The impossibility of a centering nucleus in the atom is because of the fact that **the atom is not pulled together from the inside, it is compressed together from the outside. This is one more example of the deception which motion practices upon those who look upon reflected effects with their outer-senses instead of upon the cause**

**of those effects with the inner-Mind. Remember that a "mirror image reflection" gives opposite perception.**

Herein I must repeat a fact that **electricity** does only ONE thing - **it divides equilibrium into EQUAL and opposite pairs and compresses them until they unite to create an explosive condition around a still point of gravity. When that purpose has been completed, electricity slowly dies in all masses until all motion has ceased in them.**

### 13. The Oneness of Gravity and Magnetism

We have now arrived at a point where the relationship of gravity and magnetism can be more easily comprehended. They both belong to the zero universe at rest. They are both one, but each has a different connotation in common usage which requires two words to define their separate meanings, just as an armchair and a rocking chair are both of them chairs, but require two words to differentiate them. **Gravity really means a point, or shaft, that can be located in the invisible universe, where Mind desires to concentrate thought, and thought-power.** You cannot see gravity but you can locate it at the very center of every creating thought-ring, which constitutes what we call bodies of matter. You cannot SEE Mind either, but you can locate Mind also, for Mind is also that center which balances, controls, surveys and motivates its electric thought-rings in their effort to simulate the Idea existent within that stillness, by fast or slow motion.

There is not **more** gravity or **less** gravity anywhere. The seeming increase of the power of gravity is electric potential, which means faster motion in smaller circle, in smaller volume. Gravity shaft and centers of gravity are the omnipotent zero of the Mind Universe. It is the same everywhere. It is all-powerful everywhere. The nearer that motion can come to that zero point, the greater the power which can be drawn from it. **In Human that power is desire. Desire for closeness to God gives one that power in the measure of Human's desire. The measure of power which Human takes from it is the measure which is dependent upon her/his own desire for omnipotence, and her/his willingness to multiply her/his thought-power and action into electric potential BY ACTION. In so doing (s)he decentrates thought to the Source of where gravity multiplication begins in order to conceive Idea and gain knowledge. (S)he then concentrates thought to manifest God's omnipotence in her/him.**

Let us look at this for that which it really is: Gravity and the Magnetic Light are ONE, but the connotation of gravity differentiates it from the word God. They are the same, however, for God is the universal Soul while Soul in Human means Identity, or Being, as a unit of the Universal Being. The moment that electricity divides the One changeless condition into pairs it is necessary to balance and control those pairs. Gravity is the Magnetic control and balancer, although its power never multiplies or divides. **Where gravity is, stillness is. An area of stillness always surrounds gravity shafts.** These areas are the holes which center the rings of electric potential which continually multiply compression, or divide it by expanding, in accord with the desires of Nature, or Human, to manifest that all-

power which is within, and omnipresent in all things. The "meaning" of "gravity" is a most often asked question for it is not well understood and is NOT that which the science books explain it to be.

**The one most important thing to burn into your consciousness is to realize that wherever motion is, it is centered by stillness, and that stillness is its CAUSE.** The universe is composed of electric light thought-rings of motion. Each light thought-ring is centered and controlled by the Creator of that light thought-ring. God creates Her/ His universe in that way. **You create your universe that way, also.** It is God who sits there. It is the Magnetic Light of all-knowing, all-powerful Mind which sits there. We call that centering point GRAVITY. The reason why we call it gravity is because there are adjacent light thought-rings which have united together so closely that we think of them as mass, instead of light rings. Each added light ring of the mass has its Mind-center in its own plane. In a mass, therefore, there are seemingly so many Mind-centers of stillness that they constitute a shaft. The word "gravity" arises from this fact. **Gravity is a shaft of Mind-controlling stillness. In that sense, gravity and God are one.** Now you-have the whole story except for one thought to complete it. **Every point of that gravity point is the same point, for God's zero universe is omnipresent.**

It may take you a while to fully grasp the above, but you can never comprehend it by reasoning with your brain as a sense basis, for in that process is the motion of "thinking". You must learn to "be still and KNOW". The inner thinking of deep meditation will take you into the zero world of REALITY where illusion does not exist. Moreover, neither will the smatterings of incorrect perceptions as given to you before now be forever inhibiting your learning and KNOWING. The more you are able to find that center where the Light of Creation dwells, the more you will be able to discover the Light of your Self, and that is the greatest miracle that can happen to anyone. **When you find your Self you also find God in His Kingdom within you.** You certainly do not need to go running about the globe searching for Self for; if you do so, you will NEVER FIND SELF. When you have thus acquired full awareness of your own omniscience, omnipotence and omnipresence you can then knowingly, and authoritatively, say: "I and my Father are ONE!"

Human's unfolding power increases in the measure in which God-awareness in him increases. As your power increases through that greater comprehension, your command over motion, and over your own destiny, increases in proportion. **The main thing for you to fix into your consciousness is the fact that this is a Mind and motion universe, and that Mind centers motion.** In the Mind is all-Knowing and all-power. In the motion is the image form of Mind-knowing which manifests mind-power without being that power. In that sense it would be more exactly definitive to term it a Mind and Mind-thought universe--for all electric motion is but the record in motion of Mind-thinking. It would be even simpler to think of our universe as a Cosmic cinema, for it parallels the cinema of human in every respect.

## 14. Magnetism, corrected Conception

It is necessary to correct the popular conception regarding what is meant by the term **magnetism**, which is now popularly regarded as a physical force, closely related to electricity. Some do pretty well in considering that ones have "personal-magnetism" but even that is misunderstood. You hear much about magnetic fields, electromagnetism, magnets, magnetic lines of force and such phenomena. You hear about the power of magnetism to pick up needles, tacks and small iron objects with weak magnets, and the power of lifting tons by strong magnets. You often hear of the universe being referred to as an electromagnetic universe. It could properly be so termed but only in the sense which you would apply to a Mind and matter universe, or the term Creator and Creation.

You also hear it said that the earth is a huge magnet, such as the bar magnet made within an electric coil. It is not like a bar magnet, however. The middle of a bar magnet IS "DEAD". The center of the earth is alive. Earths and suns are the result of collisions which occur between polarized pairs where two bar magnets come close together. These polarized pieces of steel should not be called magnets, however. Like the earth, they are electrically created. They are electrical effects controlled by Magnetic stillness, which means Mind stillness. It is popularly believed, however, that magnetism comes from matter which is endowed with magnetic qualities. It has ever been claimed that all of such material must be in the earth's crust not more than fifty miles deep, and that influence creates a magnetic field for earths and suns. It, also, presumably created magnetic fields and magnetic lines of force, which bend around from equators to poles. There are many such theories, all of which are groundless, for they are all of them perfectly explainable electric effects which we will yet enlarge upon.

Much confusion has been set up in world laboratories because of this concept of magnetism. The physicist deflects electrons from their paths in vacuum tubes by holding a magnet near their path, and sincerely believes that the power of magnetism does that instead of electric polarity. (S)he does not realize that the polarized condition in his "magnet" is an electrically divided equilibrium which has created two strong electric vortices, which his electrons are being pulled into just as particles floating in your bath tub are pulled into its spirally turning outflow.

Hundreds of other misinterpretations of what electricity is doing fills all research laboratories and not only slows their progress but gives them a tremendous amount of unnecessary work in experiment after hopeless experiment, at tremendous cost, to find out things which are quite simply predictable to one who knows CAUSE and WHY of things.

Before passing this subject it may be well to give one more example of misinterpretation where electric effects are attributed to magnetism. In the astronomical laboratory they use an instrument called a spectroscope which tells what the stars are composed of in lines of colored light. Michael Faraday "discovered" a relation between "magnetism" and light. Later a scientist, named Zeeman, used that principle to detect the "magnetic fields" of stars by applying a magnetic

control to the spectroscopic light lines of the stars. As a result he succeeded in splitting one line into two, making it look like a tuning fork. With a stronger, "magnetic field" he again split those two so there were four, which then looked like a table fork. The result is interesting, and valuable, but it is not what it is claimed to be. It is a division of one fixed condition into pairs, and octaves of pairs, and that is the sole office of electricity. **So why call the polarizing principle of the electric current a "Zeeman effect"?**

The word magnetism should in no way be used, for it connotes a **physical** attribute. A proper way to connect it to this electric universe of motion would be to term it the **Magnetic-electric universe**, meaning the **spiritual-physical universe**, or the Mind-thinking universe, in the sense that the zero Magnetic universe is the Creator, and the motion universe is Creation. Likewise, you should never use the term **matter** in relation to the visible universe, for the word matter connotes substance, and there is no substance in the entire motion universe. You must someday remodel your concepts to the realization that the God Light of all-knowing and all-energy is All There Is in this omnipresent universe of Mind. **Mind thinks its knowing, however, and electrically records the imaginings of that thinking by two-way divided effects of motion.** Motion simulates that which it seems to be, but that is all it does. **It creates a motion-sound-picture by the light which is projected from Mind.**

What observers think of as **magnetic power is the measure of electric potential which is created around gravity shafts and centers.** The multiplication of electric potential around gravity shafts is--in reality--the manner in which Mind-thinking concentrates.

It is not gravity, or Mind, or stillness, which multiplies, however. That which multiplies and divides is electric potential only, and that means fast or slow centripetal or centrifugal motion. The gravity which evidences Mind-concentrative power is changeless. Motion surrounding it changes alone.

If you wonder why you are so far behind in coming into understanding of Truth of your universe, you must look to the scientific "method" of "proving" everything in a "physical" manner. Many scientists do not accept God or Creator as a truthful entity and therefore CANNOT POSSIBLY FIND THE CORRECT CAUSES AND RESPONSE. SINCE GOD IS GRAVITY AND ALL LIGHT AND ALL-KNOWING AS WELL AS ALL-ENERGY, YOU CANNOT HAVE THE WHOLE WITH ONLY HALF THE EQUATION.

## 15. Two-Way Universe

Electricity is forever winding light up into hot spheres, surrounded by cold cube wave-fields of space, and likewise sequentially unwinding them for rewinding. While winding them into compressed light masses, they are simultaneously unwinding to a lesser extent. Conversely, while unwinding they are simultaneously rewinding to a lesser extent.

**Every opposite of a pair charges in excess of its discharge for one half of its cycle. It then discharges in excess of its**

**charging.** Life and death are good examples. Life charges a body in excess of its discharge for one half of its cycle and death discharges it in excess for the other half. Likewise, the sun charges the earth during half of its twenty-four hour cycle in excess of its charge on the night side of the planet. The night side sequentially becomes the day side. The discharge of night then reverses to a preponderance of charge.

The father/mother principle is fundamental in every expression and both are simultaneously manifested in every expression, each being preponderant sequentially during half of each cycle. The father principle multiplies light into density and high electric potential. The mother principle divides it into vapors and gases of lower electric potential. Light is thus multiplied and divided into suns and planets surrounded by "space".

The "matter" of earth is the same as the matter of heaven with but one difference, VOLUME. And therein lies **the secret of the universal pulse beat.** Space is a division of solidify into tenuity. It is also a multiplication of volume at the expense of electric potential. Interchange between these two unbalanced opposites is the basis of all motion in this rhythmic universe. It is also the reason there will be errors in mathematical calculations by anyone who does not fully understand that which I just said.

You ones must all come to realize that it is at the point where at you begin to move into perceived "thinking" within the compression called physical that the errors flow. As long as you operate within the KNOWING, come the answers--for they shall never be found in the physical. The solutions only exist in the thought which IS and is of God. Therefore you will find no answer where they are NOT.

Compression can never expand but expansion is born from expansion. Conversely, expansion can never compress, but compression is born from expansion. They can interchange with their opposites with every pulse beat, and they do. Each opposite is born from the other. Each pulse beat brings each opposite nearer to voidance of each and complete interchange into the other. It becomes the other sequentially at the halfway point in its cycle, but it is still an opposite. **Opposites oppose. They never perform any other office than to oppose. Opposition alone produces the idea of separateness in a universe of one inseparable thing.**

The opposite of water is water vapor. Water is a compressed condition. It is of the father-light. Water vapor is the expanded condition of water. It is of the mother-light. They are two halves of one which never can be one. The mother-light unfolds from the father-light. The father-light refolds the water vapor into water. Each has been born from the other. Each IS the other but they can never unite to become one. Moreover, from the water you will not get juice vapor--you will get water vapor. Nor will you get juice from pure water vapor--ever.

All idea of Mind is thus divided into sex pairs of opposite mates. Matter is divided into solids and gases. The gases are the solids outwardly bound toward the heavens. Solids are those same gases inwardly bound toward gravity. Heat and

cold are opposites. Inwardly bound light rays degenerate heat from cold by compressing cold. Outwardly bound light rays degenerate heat into cold by expanding heat. It is said that cold is less heat. One might as well say that east is less west. East and west are two opposites just as cold and heat are opposites. Ah so--some of you are smitten by an inkling idea--is it possible that where all opposites meet in that one brilliant collision is God? Insight is a bit breathtaking, is it not? It follows that it **MUST BE SO FOR OUT OF GOD'S THOUGHT AND IMAGINING CAME THE "TWO" IN THE FIRST PLACE**. Even perceived time of past and future meet in the NOW which is actually all there is. Do you begin to see how simple is the whole thing? Isn't it nice to know that you can't pass from one opposite or anything into its other without passing through God? Therefore, does it not seem intelligent to get on with getting to God as quickly as you can, since that is your ultimate destination under all circumstances?

## 16. Opposite Sex Conditions born each other

Matter and space likewise are sex mates. Each has become what each is by opposing the other to attain the appearance of separateness. Then each interchanges with each by breathing into and out of each other until space disintegrates matter and becomes what the other was. Space disintegrates suns and earths by the way of equators and generates them by way of poles. Heat generated by cold by the way of poles is radiated by the way of equators. Suns thus turn inside out. Cold bores black holes right through their poles and great suns become light rings, like those in Lyra and other ring nebulae which are plentiful in the heavens. But you ones cannot seem to come to the **KNOWING** that at the center of each is God and thus will come the burst of glory as the cycle is finished.

All matter is generated by the degeneration of its opposite. Likewise, all generated matter is sequentially degenerated by the generation of its opposite.

**Compression in matter is balanced by an equal evacuation in space.** Every unbalanced condition in Nature must be balanced by an equal opposite. All borrowings from the bank of nature are debited with an amount equal to the credit extended just as money borrowed from Human's bank is debited and credited--excluding the Federal Reserve System, that is.

## 17. Desire for Rest follows Desire for Motion

The two are always two and never can become one--for when they become ONE they become God, although the desire for oneness is with each during the entirety of its cycle. It is this desire for oneness which causes them to interchange. When credits and debits are balanced by interchange with each other, they cease to be. They do not become one. When electrical opposites thus cancel each other out by interchange of their plus and minus conditions, they do not **NEUTRALIZE** each other, as commonly believed-- **THEY CEASE TO BE**.

## 18. Motion cannot be neutralized

There is no exception to this process of Nature. All idea is recorded electrically in equal pairs of opposite expressions. Each of the pair cancels the other out in cyclic periodicities. Each then becomes what the other was.

**Generation of any idea exceeds radiation during the first half of its cycle. Radiation then exceeds generation for the second half of the cycle.** Both of these simulations of the idea, as expressed by motion, disappear. The idea still exists, however. The idea is at rest in its seed from which it can again appear in form of idea. The two points of rest which are the fundamentals of every cycle are: **the point of beginning at the wave axis, and the point of interchange between positive and negative opposites at the wave amplitude**. At these two rest points, motion has utterly ceased. It has not been neutralized into a condition of rest.

## 19. Principle of Sex Reproduction

All creating things are paired as unbalanced equal and opposite sex mates. Reproduction of two unbalanced mates cannot be repeated until balance has first been restored. The calm surface of the ocean may be broken up into waves, but those waves cannot be repeated until the calm surface of the ocean has been restored to the equilibrium of its rest position, even though that rest position is not maintained.

Reproduction begins at the rest point where the previous wave cycle ends. Reproduction of unbalance must find a fulcrum from which the wave lever may leap into wave expression for repetition of pattern. That is what Creation is, merely the **repetition of pattern with added pattern forever**.

This is a universe of waves within waves and waves without waves; pulsing waves of dual light, extending forever outward to the ends of mirrored space and reflecting back again to microscopic centers of rest from which they may again spring from rest to seek rest through dual motion, but never finding it. This is a sex-divided, opposed, two-way electric universe which creates and voids through unbalanced pairs but repeats (reproduces) through voided ones.

## 20. Sexes do not unite

Reproduction of dynamic sexed pairs does not come through the union of dynamic sexed pairs, but from the *voidance of sex condition*, and with it, the power of dynamic sex expression reproduction.

Reproduction is not the unity of two opposite halves of one patterned thing; it is the voiding of the power of dynamic expression which all unbalanced opposites express. Reproduction is the cessation of those two unbalanced conditions which restores a balance from which similarly patterned negative forms reverse their expressions and become positive forms.

## 21. Sex Opposites Reproduce through Sex Voidance

In this manner all patterned forms repeat their patterns sequentially. All pairs of unbalanced opposites come from God, the One, and return balanced as One, to God. All unbalanced pairs of separately conditioned things must first find voidance of unbalance and voidance of opposition. **They must then become their own opposites to again acquire an unbalance necessary for another voidance and consequent repetition.** All "twos" must become "voided" in the ONE in order to again become two. Reproduction of unbalanced opposites, by unbalanced opposites, is impossible. Opposition must first be voided. **The dynamic must emerge from rest and it must be voided in rest in order that it may again become dynamic.**

## 22. Desire for Balance

All things seek balance. Two opposed, unbalanced halves of one are forever seeking to balance their opposition. Two children on a seesaw are balanced when they are on a level with their centering fulcrum. When they are on two different levels they are then unbalanced with their centering fulcrum. They are then dynamic. The fulcrum no longer centers them although they are balanced in themselves. In such a position they are obliged to move. Repetition of their motion is impossible while they are in balance with their fulcrum, but is imperative when the fulcrum no longer centers them.

A sexless condition is imperative before a sexed condition can be repeated. Just as all motion starts from rest and returns to rest, so does a sexed electric condition arise from a sexless one. The two sexes, therefore, cannot be united to cause reproduction. They must first be voided.

Unbalanced condition and change cannot unite to reproduce unbalanced condition and change. The unbalanced condition and change must be voided in order to repeat unbalance and change.

## 23. Sex Opposites do not neutralize – they void

The sexes, like the two opposites of motion, cannot "neutralize" each other by so-called "union". The dynamic cannot be "neutralized". Likewise, it cannot become static. But it can be voided. The static condition does not **then** take its place, for the static condition is eternal. It was there before the dynamic condition arose.

The dynamic condition of sound, for example, arises from the static condition of silence, but sound does not **become** silence. **Sound is voided**; silence is eternal.

The dynamic condition of sodium and chlorine do not unite to become the static condition of sodium chloride, nor are they neutralized. They must be voided before they can be repeated.

## 24. Pressure Direction Determines Sex

Opposites are not **things**; they are **conditions of things**. Just as heat and cold, or east and west, or inward or outward, or compression and expansion cannot **unite** to become one, so also, the opposite sexes cannot unite for they are but inward-outward **pressures**.

Sex opposition is a difference in the pressure **condition of things**. The male condition is one of compression, the female is one of expansion. The sexes are thus differently conditioned by the two directions of electric pressures, in accord with the two opposite desires of the Creator. The difference of conditioning makes basically similar substances appear to be different things and different substances.

All things are sex divided. When, therefore, any two opposed and unbalanced sex halves of one conditioned thing balance their opposed conditioning through motion, they appear to become another thing or substance.

This appearance is a deception of the senses for they do not become another thing. They become voided and another thing, from which both are extended, appears in their place. In chemistry you call these pairs stable elements, such as the salts.

Water, for another example, is a voidance of oxygen and hydrogen, for there is no oxygen or hydrogen in water. For there is actually no hydrogen or oxygen in water. Nor do oxygen and hydrogen **become** water. *Water is the result of the voidance of two unbalanced and opposed conditions caused by equalizing opposed pressures at static equators.*

Consider the static condition of the calm ocean. A storm transforms that surface into a dynamic condition. Waves which spring from the static ocean surface toward crests and troughs do NOT *unite* to reproduce another wave; they *withdraw* into the ocean surface. They disappear entirely and then reappear from it in reverse to repeat the next wave.

**Absolute voidance of one condition must take place before repetition can follow. HEREIN, FURTHER, LIES THE TOTAL SECRET OF THE WORKINGS OF THE UNIVERSE.**

Voided motion is recorded in the stillness from which it was unfolded in order that it can be repeated from that record. Records of motion are seed for repetition of motion. In the seed is desire for manifesting imaged forms for idea. All forms are wave forms. All wave forms unfold from seed records of those wave forms.

And so have God said, The One Light of God desires to be two. Two sensed warring divisions of the One spring forth from God's un-sensed Oneness into an imaged space. Two voiding lights of God's One White Light spring from their Rest in unity to find rests of their own, but find not two but one, for two rests there cannot be in God's universe of ONE.

For God says that each light seeks rest in each where wave of God's pulsed thinking meets wave, and at that mutual point of rest each void each in the One from which another

two spring into their mirrored infinities.

Hear God when God says that all things which flow from GOD are sex-conditioned pairs of two, even to the cosmic dust of space which forms new worlds and even to the heart of blazing fires of hottest suns.

Nothing is there in God's divided universe which is not sex-conditioned, sex-interchanging and sex-balancing. Thus these moving pairs seek balance in voidance forever to repeat the thought-patterns of God's thinking in the sex-balancing voidance of their "conditioning". And yet, the Truth and function has always eluded Human and (s)he continues on the path of misuse, misunderstanding and ignorance of the very laws of the Cosmic Universe of which (s)he is a part--ALL that Is within Creation.

## 25. The Message in Point

You have forgotten the message in point? Well, let me refresh you a bit with a couple or more statements to which I refer that are all part of the same.

In the heart of every human is the desire for love--for happiness, peace and prosperity. In the hearts of nations of men is the One-World desire for international unity. This is why it is so easy to sell the lies unto humanity for the desire for unity is so strong and each perceives that "another" must have the answer to accomplishment of this unity. Universal Brotherhood is the ultimate world-goal. How far are we from that goal? The distance is far ahead for the human race. Its distance is measurable only by the yardstick of LOVE, and love has not yet entered the doorway of human relations, and will not until unity opens the door for it to come in. We say the words and we have our little gatherings and big gatherings and pronounce the incorrect assumptions and then go forth and practice that which is NOT love but physical manifestations of projections of would-be controllers. We go out and effort to MAKE-LOVE and that is NOT LOVE. THAT IS PHYSICAL MISUSE OF THE PHYSICAL ASPECTS OF GOD-GIFT IN MOST INSTANCES RESULTING IN MORE GROSS MISPERCEPTIONS AND ILL-BEGOTTEN ACTIONS.

Unity means Oneness. Unity balances the mate-hood of all pairs of people and equalizes their transactions in giving and regiving. Civilization has not yet progressed to the point where unity, through the giving and regiving of Love, can even be comprehended by more than a few of human's millions of beings.

## 26. Conclusions

*The Coulomb law which says that opposite poles attract and like poles repel, is not true to Nature and it is one of the multitude sense deception. The true basic underlying law in Nature is: same conditions attract each other. Both plus and minus electric poles of a "bar magnet", which must be properly called a "gravity bar" because gravity controls all motion, consist of high electric potentials (I define electric potential as measure of unbalance), which are high imbalanced conditions, and that's why these same conditions attract each other. When they meet, they VOID*

*their polarities, exchange it and continue the same game from the beginning. Gravity is not a physical force, but a mental force which is measure of Mind desire for creative expression through manifestation by action. Gravity is the same as magnetism, the same as God, who controls material universe which is made entirely of motion.*

Idea is undivided and changeless. Idea has no body. Thinking takes idea apart and gives it thought bodies which are then manifested in material bodies.

Idea does not come and go. It is but the bodies of ideas which come and go. It is but the formed bodies of ideas which appear, disappear and reappear in what we call life, death and rebirth. These transient bodies simulate idea by form and motion but transient moving form cannot be the eternal idea which it manifests in forever repeating cycles. That it is the repeating cycles of manifested ideas which confuse you into thinking life and death, and not the idea itself. Idea is eternal and has no cycles. The BODIES of ideas only are pressed in cycles.

Cycles come and go - they begin and end, and begin again where they end - they appear and disappear to reappear - as bodies of PATTERNED thoughts.

The process of building bodies begins from the eternal zero in the Light of their beginning, through the cycle of their appearance, and back into their disappearance in their eternal zero of equilibrium from which they emerged.

All creating bodies begin from a zero point of balance which become their equators,--extend to allotted measures limited by desire - and return to the zero of their equators to give back the bodies they have borrowed from each side of it.

The *seed is but the Soul record of Mind idea*. It has no material body but it has a thought body which is patterned in the image of the thought. It is the Mind concept of a form not yet conceived as a body in its mother's womb.

**That which appears to exist in the visible universe really exists in the invisible universe.** The invisible idea is eternal.

*Electricity is the divider of one balanced, unchanging condition of stillness into two unbalanced conditions of ever changing motion which interchanges constantly to balance those unbalanced conditions to express LIFE--and to void them to express DEATH.*

Positive electric vortex charges motion into higher electric potential by multiplying it into the smaller volume, and negative electric vortex which discharges that electric potential by dividing it into the bigger volume. These vortexes are made of light rings spinning around the centering still zero Mind pint which is the source of energy and from which the light rings borrow energy in order to spin.

**Both positive and negative electric vortices are actually high imbalanced states and that is the common (the same) in them which forces them to move to each other and meet in order to void their imbalances and find the balance.** But as soon as they find balance, they lose it,

exchange their polarities and start the same game from the beginning.

The so-called "electrostatic unit of charge" and "negative charged particles" called electrons DO NOT EXIST.

The secret of Creation lies within the light-waves of motion which gravity compresses into rings of light in which density first increases toward the outside by thrusting outward from within until the centering holes have been closed into hot spheres. Density then increases in the inward direction. This is accomplished by the octave-wave process which multiplies power by projecting it from the stillness of its Mind-source by dividing it into mated pairs which science calls the elements of matter. This constitutes the sex-principle of life which science has so strangely neglected to observe as being the BASIC FACTOR OF MOTION.

*Light waves compress the invisible Light of cold space into visible light of incandescent suns. They then expand it to return visible light back into cold space. This they do by means of gravity-controlled curvature which is God Aton's only tool to work in creating this universe of motion.*

The term "magnetism" is unjustifiable. The word GRAVITY would be used instead, for **gravity both multiplies and divides by thrusting inward from without to compress and outward from within to expand.** In this manner, **gravity controls light by controlling its curvature, and Mind also controls gravity by limiting both outward thrusts to the cube mirror planes of zero curvature.**

*The only way Nature of human can produce visible light is to compress a large area of invisible rays into a small area by focusing it to a point.*

*All matter is composed of light rings in which their density increases from the inside holes to the outside rings. The blue of the spectrum centers these holes and the red of it occupies the outside. When compression closes these rings, they become spheres in which density increases toward the center and the white hot yellows and reds of the spectrum center them. As spheres cool, they oblate and cast off rings. Holes then develop on the inside as the rings radiate their heat into cold. Thus the light-wave cycle is created.*

Coulomb uses the term "magnetism" under the "ASSUMPTION" that this universe is an electromagnetic one, but that means "matter" which is the term used by Newton. **Both of them overlooked the vital fact that there is a zero of attraction and repulsion between stars or planets and between poles of a bar magnet. Astronauts find that zero position but they do not call it "magnetism"; they call it "GRAVITY" and that is what it is.**

**The secrets of the universe lie within the wave. As light waves have their nine-octave multiplying power to bring invisible Light of negligible heat into visible intensely hot suns and nebulae**

The complete description of the wave is description of THE UNDIVIDED AND THE DIVIDED MULTIPLIED

UNIVERSE. This completes the cycle. The DIVIDED UNIVERSE accounts for but one swing of the cosmic pendulum. **It does not account for its countless repetitions which have given you a universe which had no beginnings and has no endings.**

**This new two-way principle accounts for the simultaneous invisible swing of the pendulum from its zero of stillness to its compression focus and back again through expansion. It also accounts for the voidance principle which makes of this universe an imagined one in which every happening anywhere is voided by its equal "unhappening" everywhere.**

"The Law of Illusion" or "The Voidance Principle" reads: **Every action-reaction of wave motion is voided as it occurs, is repeated as it is voided, and is recorded as it is repeated, or: EQUAL AND OPPOSITE ACTIONS AND REACTIONS ARE SIMULTANEOUSLY CREATED AND SEQUENTIALLY REPEATED.**

**The spiraling though light waves of Creation revolve around the Zero Stillness (Gravity) centering, controlling, balancing point. The mental Force of Gravity is compressing from outside toward inside, not pulling from within. Gravity is not a physical force, but a mental force which can be defined in this way: Gravity is a measure of Mind desire for creative expression through manifestation by action.**

**A bar magnet must be rightfully called gravity bar, not a bar magnet. It has four pairs of gravity poles that focus spiraling light into wheels of compressed light spectrum (elements of matter).**

If the Coulomb Law were valid it would not be possible to gather together one ounce of any one element. We would be not able to find anywhere in Nature one gram of the same element, but thanks God it is not so, as we know.

Opposite poles get as far away from each other as they can, until their opposition is voided by balance in their fulcrum and they cease to be.

When the positive pole of a magnet is brought into contact with the negative pole of another magnet, that effect which you think of as attraction is one of voidance. It is a cessation of opposition or power to manifest anything. Polarity utterly ceases extending at that point as each opposite extends to each opposite end, each getting away from the other and through the other, spirally, as far as it can.

If opposite poles attracted each other, they would be together in the middle of a magnet instead of at its ends.

God creates only one form--the cube-sphere--which means the same as though we said female-male of Human. *The sphere is the positive centering sun. The cube is the invisible surrounding wave field. All matter is thus divided into positive solids surrounded by negative space.*

Wire coil creates an electric field, not a magnetic one. *There are no magnetic fields in Nature. There are electric fields of*

*curved motion, which are bounded by magnetic planes of non-motion and zero curvature. Any expression of motion anywhere, is omnipresently repeated everywhere.*

**Electric effects of motion can be insulated from each other--but the magnetic Light of The Creator, which causes those effects, cannot be insulated from matter by matter.**

**All matter is electric. Electricity conditions all matter under the measured control of the ONE MAGNETIC LIGHT which forever balances the TWO electrically divided, conditioned lights of matter and space.**

Divided matter strains to find balance in the zero of equilibrium from which it was divided. The senses of human are mightily deceived by the illusions of appearance, which cause him to conclude otherwise.

Electricity is the servant of Mind. It does all of the work of Creating this light-wave universe in unfolding-refolding sequences which Mind desires.

**The universal Mind has two desires--the desire for creative expression through the action of concentrative thinking and the desire for rest from action through decentrative thinking.** One desire is for separation from Oneness into unbalanced multiplicity and the other is a voidance of multiplicity into balanced Oneness. *One desire is for action and the other for rest. Desire for rest follows desire for motion.*

The two opposite electric expressions of desire of Mind unfold all idea of Mind from its pattern in the seed into imaged forms to simulate the idea of Mind and refolds it back into its recorded pattern in the seed, for again unfolding. Each one unbalances the other in order that each may seek balance in the other to disappear and reappear as the other.

The generative light of gravitation and the degenerative light of radiation are projected through each other from rest to rest in pulsing sequences to manifest idea by borrowing father-mother forms of idea through their voiding interchange. **This principle of rhythmic balanced interchange between father-mother lights of gravitation and radiation is fundamental in all creating things. It is the principle of two-way equal giving which manifests the quality of Love in the Light of the ONE.**

**Matter is powerless to attract. All matter in motion seeks rest. All moving masses are unbalanced.**

*Pairs of opposites are drawn into each other's vortices where they void each other, passionately. Each is then nothing, a zero simulating that zero of their Source from which they sprang--but they are also seed for another seeming two which emerge from the Oneness of their Source.*

**That which Human thinks of as a magnetic force is spiritual Light of Mind and not a physical working force of Creation.**

*Gravity is the controlling center of a compressive electrical force which is exerted from the **outside** of matter instead of within it.*

All creating matter is centered by holes of space except one element in each octave. **The energy of Creation centers each note. That centering, invisible, omnipotent Energy is God's mind and your Mind. Naturally you cannot see it, but you can KNOW it, for it is your Identity, and your Intelligence. It is the Source of your creations as it is the Source of all Creations.**

**Electricity does only ONE thing - it divides equilibrium into EQUAL and opposite pairs and compresses them until they unite to create an explosive condition around a still point of gravity. When that purpose has been completed, electricity slowly dies in all masses until all motion has ceased in them.**

**Gravity really means a point, or shaft, that can be located in the invisible universe, where Mind desires to concentrate thought, and thought-power. Where gravity is, stillness is. An area of stillness always surrounds gravity shafts.**

**Wherever motion is, it is centered by stillness, and that stillness is its CAUSE.**

**Gravity is a shaft of Mind-controlling stillness. In that sense, gravity and God are one. Every point of that gravity point is the same point, for God's zero universe is omnipresent.**

**This is a Mind and motion universe, and Mind centers motion.**

**Mind thinks its knowing, however, and electrically records the imaginings of that thinking by two-way divided effects of motion.** Motion simulates that which it seems to be, but that is all it does. **It creates a motion-sound-picture by the light which is projected from Mind.**

**Magnetic power is the measure of electric potential which is created around gravity shafts and centers.**

**This is two-way universe.**

Electricity is forever winding light up into hot spheres, surrounded by cold cube wave-fields of space, and likewise sequentially unwinding them for rewinding. While winding them into compressed light masses, they are simultaneously unwinding to a lesser extent. Conversely, while unwinding they are simultaneously rewinding to a lesser extent.

**Every opposite of a pair charges in excess of its discharge for one half of its cycle. It then discharges in excess of its charging.**

The "matter" of earth is the same as the matter of heaven with but one difference, VOLUME. And therein lies the secret of the universal pulse beat. Space is a division of solidify into tenuity. It is also a multiplication of volume at the expense of electric potential. Interchange between these

two unbalanced opposites is the basis of all motion in this rhythmic universe. It is also the reason there will be errors in mathematical calculations by anyone who does not fully understand that which I just said.

**Opposites oppose. They never perform any other office than to oppose. Opposition alone produces the idea of separateness in a universe of one inseparable thing.**

**C Opposite sex conditions born each other.**

All matter is generated by the degeneration of its opposite. Likewise, all generated matter is sequentially degenerated by the generation of its opposite.

**Compression in matter is balanced by an equal evacuation in space.** Every unbalanced condition in Nature must be balanced by an equal opposite. All borrowings from the bank of nature are debited with an amount equal to the credit extended just as money borrowed from Human's bank is debited and credited.

**Motion cannot be neutralized.**

When credits and debits are balanced by interchange with each other, they cease to be. They do not become one. When electrical opposites thus cancel each other out by interchange of their plus and minus conditions, they do not NEUTRALIZE each other, as commonly believed-- THEY CEASE TO BE.

All unbalanced pairs of separately conditioned things must first find voidance of unbalance and voidance of opposition. **They must then become their own opposites to again acquire an unbalance necessary for another voidance and consequent repetition.**

**The dynamic must emerge from rest and it must be voided in rest in order that it may again become dynamic.**

Unbalanced condition and change cannot unite to reproduce unbalanced condition and change. The unbalanced condition and change must be voided in order to repeat unbalance and change.

**Sex opposites do not neutralize – they void each other.**

**Absolute voidance of one condition must take place before repetition can follow. HEREIN, FURTHER, LIES THE TOTAL SECRET OF THE WORKINGS OF THE UNIVERSE.**

In the heart of every human is the desire for love--for happiness, peace and prosperity. In the hearts of nations of men is the One-World desire for international unity. This is why it is so easy to sell the lies unto humanity for the desire for unity is so strong and each perceives that "another" must have the answer to accomplishment of this unity. Universal Brotherhood is the ultimate world-goal. How far are we from that goal? The distance is far ahead for the human race. Its distance is measurable only by the yardstick of LOVE, and love has not yet entered the doorway of human relations, and will not until unity opens the door for it to come in. We say the words and we have our little gatherings and big

gatherings and pronounce the incorrect assumptions and then go forth and practice that which is NOT love but physical manifestations of projections of would-be controllers. We go out and effort to MAKE-LOVE and that is NOT LOVE. THAT IS PHYSICAL MISUSE OF THE PHYSICAL ASPECTS OF GOD-GIFT IN MOST INSTANCES RESULTING IN MORE GROSS MISPERCEPTIONS AND ILL-BEGOTTEN ACTIONS.

Unity means Oneness. Unity balances the mate-hood of all pairs of people and equalizes their transactions in giving and regiving. Civilization has not yet progressed to the point where unity, through the giving and regiving of Love, can even be comprehended by more than a few of human's millions of beings.

*The time has come in human history when all men must know exactly what these teachings of the great Illuminate really meant. The time has come when human's spiritual unfolding shall awaken the Light of genius--Cosmic Consciousness and Christ Consciousness--in all men. Human will never know the happiness and peace of One World of Universal Brotherhood until that day shall come.*

### Authors Short Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia).

1982 – Acquired my PhD in the field of atomic and plasma physics, at the Faculty of Physics in Belgrade, under the title: “Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas”.

1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Julich (Germany).

1987 – 1991 Worked as a guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in **1995 I acquired the Research Professor degree.**

2000 – At the end of 2000 I chose to leave the Institute of Physics and went my own way to discover and learn the God Aton’s principles and laws of creation.

After 10 years of progression toward that sacred goal, I have finally succeeded and now know many of God’s creational principles and laws (unknown until now) and can apply them to simple and efficient creations which constitute the basis for a new quality of life on this planet.

I am a pioneer in creating with the New Conscious Energy and building a new civilization without electricity.

**My discoveries as independent researcher in the last 20 years:**

1. Discovery of the truth about human being, consciousness, relation of the human being to physical body, relation of human being to God Creator Aton and Creation (this material universe) and the true laws and concepts of creation.
2. Experimental verification of the true “ATON” cell, atom and particle concept: light rings spinning around the centering Mind point which is the source of energy and from which the light rings borrow energy in order to spin, to move.
3. Discovery of so called “centeredness” of wave fields and on that base invention of Tesla Radiation Balancer, the first certified device without electricity for balancing (centering) of imbalanced (not centered) wave fields.
4. Discovery of the Natural Nuclear Waste Management System RBII01NWM – the ONLY solution for the nuclear challenge on the global scale. My natural nuclear waste management system (RBI101NWM) enables promotion of Nature’s supreme principle that there is GOOD in everything, i.e., it turns this “negative” precept into the following great GOOD for this civilization: enables the integration of all nuclear waste (low, middle and high level) into the natural life cycle in a manner that solves the immense challenge of nuclear waste disposal FOREVER (100% efficiency), enables the release of water from underneath and creation on the surface of a few feet of decayed fertile soil and water necessary for organic life thus adding materially to the world’s food supply, enables foresting of vast areas of the world with date palms and carpeting them with a verdure, enables the release of enormous amounts of oxygen which together with the enormous reduction of radioactive emission into the atmosphere will contribute to the stopping of both the negative earth’s climate changes (global warming) and the oxygen depletion, as well as to the earth’s rebalancing: reestablishment of the optimal environmental temperature range and reestablishment of the optimal oxygen content in both the atmosphere and the waters, and enables creation of millions of new work opportunities worldwide.
5. Discovery of the true value of the PI number and solution of the in science unsolvable problem of “squaring the circle”.
6. Discovery of the power of human conscious intent and rebalancing within two months of the damaged brain (Alzheimer) of a 5 year old girl with power of verbally expressed conscious intent. Watch the video here: <https://www.youtube.com/watch?v=iU-C7x0rXTQ&feature=youtu.be>
7. Discovery of the true concepts of energy, mass, speed of light, gravity and electricity and derivation of my equation of creation which properly describes

both generation (compression) phase of creation and degeneration (radiation) phase of creation, as well as their simultaneous occurrence and sequential repetitiveness. This right equation definitely retires the famous Einstein's wrong equation from 1905 of "equivalence of mass and energy".

8. Discovery of the presence on our planet of the new conscious energy and its unit Deca and its many unique characteristics and ways of conscious unlimited creation with it in order to build a new civilization without electricity.
9. Discovery of the relationship between consciousness and energy: energy belongs to consciousness to create with and energy is server of consciousness fulfilling every our desire if we ALLOW energy to serve us.
10. Discovery of the Nature's radar principle which is the great intercommunication system for recording of all effects of motion and repeating them to all other effects in the universe at the speed of light.
11. Discovery of the absolute protection (protection from anything at all times) with The White Christed Light remotely (distance-less), instantly and permanently using my **I-Change** technology and my new energy Deca101 conscious chip.
12. Discovery of the conscious chip Deca101 with which every human desire could be fulfilled without electricity.
13. Discovery of the natural way for enlightenment (ascension, realization) using unlimited power of human conscious intent and allowance.

I wrote two books: "We are yet coming into the knowledge" (Belgrade, 1997), and "Jesus Christ: "The Truth About My Life"" (Belgrade, 2009) and I wrote five books which are available on my website: "GOD IN THE ATOM", "DODECA 101 LOVE ENERGY", WAKE-UP CALL FOR THE PEOPLE OF LIE, PALESTINIAN'S EXTERMINATION IS THE EVIL GOAL OF THE JEWISH OLIGARCHY, and HEAVEN ON EARTH.

I speak English, German and Russian.
