Abstract: *Transmutation is not properly understood in science due the wrong concepts of atom, energy, mass, gravity, electric current, magnetism, heat and light. Transmutation is the inherent ability within human's consciousness to transmute energy into any form that human chooses. It is based on true deep understanding - feeling - what energy is, and how it works in order to serve human consciousness according to the true law of attraction based on human's ability to create reality and to manifest that which comes from human's passion and desire. Transmutation means modification through knowledge of space-geometry, mathematics, the wave of gravity control and the nature of electric current, in order to successfully control that modification. Today's science is based on deceptive sense information gained through observation. In this civilization emerges new science based on knowledge of cause and on the true concepts and laws of creation.*

Keywords: transmutation, consciousness, knowledge

1. Introduction

Transmutation is defined as an act or instance of transmuting or being transmuted, such as the conversion of base metals into gold or silver or the conversion of one element or nuclide into another either naturally or artificially.

The meaning of transmutation initially overlapped with the meaning of alchemy, but they were separated by the 17th century. Alchemists believed that lead could be "perfected" into gold that diseases could be cured, and that life could be prolonged through transmutation or change of some essential element into a superior form. Their secretive experiments, usually involving heat and the mixing of liquids, led to the development of pharmacology and the rise of modern chemistry.

These "alchemical" processes are not properly understood in science due the wrong concepts of atom, energy, mass, gravity, electric current, magnetism, heat and light [1-27].

2. The "Holy Grail"

Transmutation is simply the change, the rearrangement or the re-manifestation of energy. I am not energy, I am consciousness. Consciousness does not contain any energy of its own, but yet it calls forth energy that has been sitting in a very neutral state of being in this grand cosmic pool of energy. Just sitting there in neutral, so neutral that it is hard for mathematicians, or scientists or aliens to see it, but it is there. When my consciousness is ignited or inspired, when something in my consciousness wants to discover or to learn, what happens as that I create a dynamic within me that attracts the appropriate energies. And then I take those energies and play with them. I manifest with them. Those energies were never meant to be locked in place, never meant to be defined and held in a definition for eternity, it is a temporary state. The furniture I am sitting on right now is in a temporary state. So, **therefore transmutation truly is the ability or the inherent ability within my consciousness to transmute energy into any form that I choose.** It is based on true deep understanding - feeling - what energy is, and how it works in order to serve me

according to the true law of attraction based on **my ability to create reality and to manifest that which comes from my passion and desire.**

3. Cause can be Known, not Effects

In order to succeed in transmutation - the most challenging challenge of all challenges - I must know CAUSE, I must know God. To know God, I must know what Light is, and energy, magnetism, electricity, gravitation and God's processes in the building of bodies which manifest His Presence and His purposes. And I must know the mysteries of life, death, and growth, and of the seed into which even the giant oak disappears but still retains its identity. And I must know how I retain my identity when I also disappear.

No (wo)man has yet known these things. The concepts of modern sages regarding them are totally unlike God's processes. Our conclusions regarding them are the conclusions of our senses. Our Mind has never yet pierced their illusions. We still sense EFFECTS without knowing their CAUSE.

When we comprehend these things within our inner Selves we will then KNOW God. If we are to change and reverse the path from the chaos back into order, transmutation must occur. Transmutation needs but the comprehension of a few (wo)men of vision, (wo)men whose minds are not fixedly closed to such a reality - I did not say "visualization" as to sit and chant or to picture a tree, etc. I mean "of vision" in openness to seeing and hearing that which flows within and not from the projections of another from without. We need to possess Tesla's style - the example that he set for scientific thinking and discovery -- the level of brilliance that is the model to which all scientists, geniuses, and intelligent people strive.

But, as Tesla said: *"The ground work for this process has never been done. The scientific community is unaware that Spirit controls matter and that the human Mind is a powerful entity. Therefore they usually look at the result, instead of the cause."*

The only reason we have never known God is because we are still in our intellectual infancy and our ideals and practices are still "pagan" and mostly barbarous. To make this understandable, I must accentuate that Nature's patterns, species and sexes can be modified but they are the same in kind. We've been witnessing tremendous efforts in medicine to kill different kinds of viruses and other diseases with the application of different kinds of radiation and they are onto the correct assumptions. However, let it be known that what happens is that viruses are but crystalline substances and therefore if one portion of the whole is changed (too much fever) they have changed the entity - not necessarily "killed" it. That is why so called metastases keep occurring. The truth is: THERE IS NO SUCH THING AS DEATH – JUST ENTITY CHANGE!

Transmutation is a permanent on-going process all around us; everywhere in the universe there is continuous change of something into something else; nothingness is the momentary phase between these two stages. **This is a universe of two negations which simultaneously cancel each other and sequentially repeat the cancelling of their negations to create the illusion that zero can be multiplied - or divided - or added to - or subtracted from - to create a reality which never is nor can become. Zero multiplied or divided - added or subtracted - extended or retracted - results in zero. This is a zero universe in all effects of motion – a seeming universe in time and sequence - and also a mirage universe of imagined form.**

That is what Creation is. It is the imagining of knowing. Knowing is Light. Light is still. Imagining is thinking. Thinking is the imagined action and reaction of motion mirrored from the zero-of-rest to zero-of-rest points.

This is a still universe of Light of Knowing. In it is no activity. In it integration is simultaneously balanced by disintegration. No time interval elapses between the debiting of any credit extended to opposites in Nature.

Transmutation is the simplest of all the principles of Nature - ten thousand times more simple than what is now being dangerously and expensively done. The first step toward it is to discover that matter and motion are tonal - and thoroughly controllable. The elements are not substances. They are but states of motion, which can be controlled by knowledge and electric power. The present concept, which makes it necessary to knock out an electron from one element to transmute it to another, is contrary to Nature's working. No one would think of trying to knock out one part of a sound to make it into another sound, or to take an arm from a (wo)man to transmute him into a horse. This is what science is trying to do, however, by knocking an electron from mercury to produce gold. There are no electrons in the elements to knock out.

To make changes, there must be understanding and insight into the things from which the changes will flow - there is no other way. If I am going to "transmute" something or change through transmutation - I MUST KNOW that which I am dealing with - wishing a thing to be so will not do it.

My efforts to transmute one element into another must be governed by the gyroscopic principle that accounts for that law of Nature which causes like elements to seek each other, and not upon the theory that another substance will be obtained by – “knocking out one electron”. It makes no difference how many planets there are in a solar or atomic system in so far as its "substance" as in elements is concerned. One or more added or subtracted would not change the element into another substance any more than one or more children would affect the nationality of their parents.

Transmutation will become simplified by observing that the plane of gyration, in relation to amplitude, and the speed of revolution of the gyroscopic wheel upon its still shaft, will alone change volume by either multiplying or dividing density.

Great possibilities in new metals lie in the proper application of this principle.

The elements of matter are not different substances or different things. They are different pressure conditions of light waves. The light units of the elements are all alike but are differently conditioned by the electric pressures exerted upon them during the inward or outward spiral journey from zero to zero.

The elements of matter are miniature stellar systems. Every principle and law which applies to one applies to the other. This solar system is a gyroscopic wheel in the position corresponding to that which iron occupies in the elemental series. When it spirals a little further it will correspond to a carbon atom. The sun will then be a true sphere and its new planets will also be true spheres.

The gyroscopic principle accounts for that law of Nature which causes like elements to seek each other. All decomposing compounds are sorted out, element by element, gyroscopically.

The unanswered mystery of how the elements become mathematically precise octave tones, just as musical tones or color tones of the spectrum are mathematically precise in vibration orderliness lies in **the wave field gyroscope principle.**

Together the eight elements of an octave form two halves of one whole cycle of tones which ascend from zero to the four-zero-four position of amplitude and descend again to zero to begin again.

This spiral journey contracts into greater pressures as it approaches wave field amplitude positions at spiral apices, and expands into lower ones on the return journey to spiral bases.

That two-way spiral journey of each half cycle extends between six mirrors of still Light which compose the wave field, and winds around a still shaft which centers the spiral. Three of these mirrors are the mirrors of action and three are the mirrors of reaction (see Fig. 1).

Figure 1: Locations of elements are determined by wave-field mirrors

The three of action are the inner intersection planes of the cube and the three of reaction are the outer boundary plants of the wave field.

All of these planes of the wave field are of zero curvature but, the spiral universe which is forming within those planes is curved. Curved planes of light act as two-way lenses which bend light to focal points and extend it from those focal points radially.

As the two-way spirals of forming matter extend from the wave field center in opposite directions toward wave field intersections, the six mirror planes of still light focus three points of still light upon the still shaft of each half cycle. Centers are formed at these focal points which become the one, two, three positive and negative elements of matter by rotating gyroscopically upon the wheels of light which act as equators for those borning tones.

Multiplying and dividing pressures determine the density and volume of each succeeding element. The color spectrum records these pressures, as the complete history of every element, from octave to octave of the whole nine octave cycle of the elements. Multiplying pressures of the spiral also affect the curvature of its light lenses to such an extent that the focusing positions change their mathematical ratios in conformity with the acceleration of gravity and the deceleration of radiation.

The positions of focal centers of gyroscopic wheels upon the wave shaft are thus affected as diagrammed in Fig. 2 and Fig. 3. Position of each element is the square of the distance to and from its succeeding one in accordance with its direction. The direction of gravity is the inverse square, and the opposite direction is the direct square.

Figure 2: The octave gyroscopic principle

Figure 3: Octave pressure relations

The volume of each succeeding element is likewise affected directly and inversely as the cube.

Six of the eight gyroscopic wheels of the whole octave are thus accounted for by geometric projection of two-way opposed lights through each other, from two sets of three mirror boundary fields. The fourth double tone is formed at the rest point where eight cube wave fields meet. This is the point of rest which is known as the center of gravity in earths or suns--where motion and curvature cease.

The completed sphere thus becomes a section of eight adjoining wave fields and revolves around that point of rest upon the wave shaft where the two half cycles of the wave meet.

For this reason the four-zero-four position is one of balance in which the yellow of orange is the dominating color of one of its two gyroscopic wheels and the yellow of green is the other, centered by white.

At the two points upon the still shaft of the turning sphere where the shaft penetrates its surface are the magnetic poles of still Light which control the balance of each sphere's turning. One of these is the north magnetic pole which controls the winding of the sphere into density by centripetal electric force, and the other is the south magnetic pole which controls its unwinding centrifugally into space.

In a sphere such as your nearly mature sun, these magnetic poles are practically upon the sun's pole of rotation; but upon oblate planets, such as your earth, Shan, the magnetic poles are removed from that pole of rotation in accordance with the measure of the earth's oblateness.

Transmutation means modification through knowledge of how to control that modification, which is as simple as the plucking of a harp string thus increasing its vibration frequencies. **Nature divides, multiplies and combines by the use of electricity.** We have all the electric power we need at our command. Every state of motion, and any combination of those states, can be made use of by us if we but know how Nature does it. Every element can be retuned or divided into pairs, and then the pairs returned. Every combination, such as the atmosphere can be divided and its pairs used separately or recombined as we wish. Hydrogen, oxygen or nitrogen, in combination, can be taken apart with ease and used separately, or recombined, or modified at will. Likewise, salt water can very simply be taken apart and recombined minus its salt, at will.

In order to do this I need only **the knowledge of space-geometry, mathematics, the wave of gravity control and the nature of electric current.**

When Nature divides she always creates male and female mate pairs. She then multiplies those mate pairs separately, or in union. She multiplies lithium into sodium, then into potassium, then into rubidium. She multiplies fluorine into chlorine, then into bromine and again into iodine. I could do this same thing with any tonal element and even split them into semi-tones. I could also divide such elements as carbon and produce, from carbon alone, five pairs of rustless, stainless metals of high melting points, high malleability and conductivity. The elements are but the alphabet of (wo) man to write what (s) he chooses with its letters. They are but the tonal notes upon the nine octave keyboard of the Cosmic instrument with which we have but begun to compose the symphonies of my desiring and imagining.

The great power to transmute through Mind-control by Mind-knowing is ours when we finally know CAUSE instead of being limited to the effects of CAUSE. When that day comes we will no longer need to use the limited supply of the earth's fossil fuels, nor need we labour to procure them. **The age of transmutation can be but months away if we choose to open our minds to these new concepts.** or, otherwise it will be thousands of years away - for those who have the knowledge will not share it properly but will keep it for the purpose of controlling the multitudes. CAUSE can never be known by the study of its EFFECT in motion. Cause is in knowing Mind, not in the sensory-body. Cause lies within the invisible universe which does not respond to the senses, not in the senses which can but sense motion but can never KNOW.

The senses forever look out through the convexity or concavity of pressure lenses and mirrors of a curved universe of two-way motion. Distorted images and an upside-down universe are recorded upon the senses. That is why this civilization is the up-side down one. The inner

vision is not electric. It is Magnetic.

The cube mirrors of space are of zero curvature and do not distort. Mind-conception transcends the sense-objective, and is not deceived by illusion, for Mind is the creator of illusion. Mind knows and projects its Light. Senses can but reflect. They cannot know.

It is now time that we must realize that the key to Nature's secrets can never be found in the visible universe. It can only be found in the invisible universe which creates and controls the visible. *"But we cannot know the invisible universe because we cannot see it,"* (wo) man says. As our spiritual nature unfolds we become aware of the fact that **we can see one half of the universe and never KNOW it, and the other half we can know but cannot SEE.**

4. The Light-Waves of Motion

The most important thought in relation to electricity is that **every action creates only one cycle of an electric current.** That one cycle is the electric record of that action. The omnipresence - or Oneness of the universe - repeats that record throughout the entire universe. The motion of my little finger, or of a dynamite blast, will create one cycle for each action, for electricity is the recorder of Mind-thought, and Mind-thoughts are consecutive.

Our laboratory techniques should eliminate from two-thirds to nine-tenths of its wiring. This will follow a greater knowledge of the geometry and mathematics of space, and especially the tonal nature of octave waves, **to make it possible for cathodes to find their anodes without wires, as they do in Nature.** The cylindrical solenoids of today should be entirely eliminated, especially where they encase anodes and prevent their expression of power by the way of equators. Vacuum tubes for every purpose should be re-designed to conform with the action-reaction mathematics of the cycle, which accelerates and decelerates in cube ratio, as a potential is multiplied for one half of the cycle, and divided for the other half. The cylindrical coil ignores this law of Nature, even as Einstein ignored it, and makes very clumsy affairs of step-up transformers and a tremendous complexity in electronic machines, which is entirely unnecessary.

Every effect of motion in this universe is an electrical effect caused by electrical force acting under the control of the invisible universe. The invisible universe entirely dominates and controls the visible universe, but motion is entirely electric.

The essentials of the construction of matter and the true nature of electricity, gravitation, radiation, radioactivity and magnetism are very simple. Even though the entire process is so simple, its aspects are many, for its effects and its divisions are many. But, this simple principle cannot be exceeded, no matter how many volumes are needed for greater amplification of essentials.

There are still many essentials such as space geometry and mathematics which determine the pressures of the chemical elements, in order to master and control the principle of

transmutation. Even in all of these it is impossible to exceed the one principle in any effect of motion in this entire universe.

Figure 4: Nature's octave multiplication principle

The secret of Creation lies within the light-waves of motion which gravity compresses into rings of light in which density first increases toward the outside by thrusting outward from within until the centering holes have been closed into hot spheres. Density then increases in the inward direction. **This is accomplished by the octave-wave process which multiplies power by projecting it from the stillness of its Mind-source by dividing it into mated pairs which science calls the elements of matter. This constitutes the sex-principle of life which science has so strangely neglected to observe as being the BASIC FACTOR OF MOTION.** This clarifies the meaning of the divided curved universe of motion from the undivided universe of rest which the Illuminates, sages and prophets of the ages have tried to define.

Our science has already unknowingly conquered this principle. **My knowledge of the wave is the measure of my power to command matter.**

Failure to recognize the secret of life as being the sex principle which lies within the motion of light-waves: the alternating sequences of compression and expansion are the very cause of motion, as indicated by their sequential equally interchanging in-breathings and out-breathings. It is these very generative, compressive in-breathings from the cold of space which cause the multiplication of heat in our bodies or in the body of the sun. Radiative out-breathings then divide it by expansion. To designate this effect of compression-expansion sequences by electric terminology such as positive and negative charges is very unfortunate and totally unlike Nature's processes of creation of matter. It overlooks the fact that these **action-reaction sequences are interchanging between the heat and cold of the divided spectrum of matter.** Our laboratories are unaware of the fact that they are unknowingly on the way to discovering the transmutation process, for that process demands **the power and knowledge to control gravity in such a manner that they can compress or expand it to high limits.**

No scientist can create energy by pulling it inward from within.

Figure 5: Thrusting inward from without

It must be produced by thrusting inward from without, as an automobile tire is pumped. That means by compression. If the tire were made of a metal which could not be burst by that compressive inward thrust, it would cause it to create a ring of intensely hot visible light at its center and density would then increase inwardly, as stars and planets increase their densities in the inward direction. **Science has already done this but does not admit that the energy thus created was projected into it, for science claims that matter itself is energy.**

Science creates air-conditioning and refrigeration that way. By continuing the freezing process to near absolute zero of cold, it can also multiply the power of conductivity of such soft metals as aluminium to equal that of harder metals such as copper.

Many laboratories have already done this, and have created what is termed new non-conductive substances by the opposite direction of expansion. All of these laboratories have been on the way to a solution of the principle of transmutation but, unfortunately, are unaware of it. Furthermore, they have also been on the way to the control of gravity, which **“would climax all discoveries by giving (wo)man an unlimited command over matter”**. Science has since long ago been in control of gravity but is, unfortunately, also unaware of that.

The conquest of gravity by liquefying gases, even to inert gases, is still another seeming impossibility for it is a reversal of Nature's process of heating, even as the freezing of soft metals to harder ones of greater conductivity is further evidence of the increasing power of the Mind of (wo) man.

Even the ability to create the fuels which hurl these missiles and satellites is another one of (wo)man's miracles. It is also a transmutation process for it divides the very elements to get that part of them which serves their purpose and discards the other parts.

As a last example of the many uses which could be cited of gravity control is the power of science to take from the high octave elements, such as zirconium, which gravity has multiplied by its compression power, and make them into transistors. These do thousands of times as much as the old

"electric" storage batteries do, but no scientist would think of **GRAVITY as being its CAUSE**. This is because science still thinks of gravity in the Newtonian concept.

The more that we can command this principle of the windings and unwindings of Nature to produce visible light rays from invisible light rays, the more we will command and control gravity to perform our needed miracles. We have already learned to control it to a surprising extent - in spite of having almost all **WRONG** information.

The power of transmuting one element of matter into another is the great "miracle" possible for our usage. **Now, I KNOW that I CAN do this for all I have to do is look at plain old table salt. It is just a matter of understanding physics as properly given.**

The basic thermodynamic principle is that the invisible cold white light can only become visible by extending that light in every direction to create waves. Waves are, therefore, formed by the compression of two extending lights meeting each other and overlapping in that effect which is in science called "interferences".

5. The Secret of Seed

Without seed, nothing can grow. The inert gases are the seeds from which elements grow, just as plants likewise grow. I comprehend the fact that growing things also grow seeds upon them, which seeds form the basis for reproduction. I am also familiar with the fact that separate species can be bred from a parent species in which identities are reborn from what they were before. This is a wonderful example of the un-changeability of the seed, even not through death. The seed seemingly dies in the ground, but witness the weeds in our gardens. Even though they are uprooted, they will return again and again. The understanding of this helps me in knowing why one octave grows from another and that a destruction of any such offshoot will cause a reversion to its parent species.

This reminds me of the principle which underlies the statement that destruction of such an element as carbon returns it to helium, the inert seed gas of the carbon octave. Also, the elements of higher octaves, such as tungsten, if "electrocuted" would also return to helium and not stop at xenon, which is its own seed. That is the explanation of why (wo)man has not yet been aware of any previous inert gas seed. Helium is the first inert gas cited by the Mendeleef chart. He could not, therefore, know that it had passed beyond helium because he did not know that lower inert gases existed.

Every element of the entire octave will return all the way to the seed of its beginning in the still white Light of the Source of all of them.

Observe the work of Luther Burbank in transmuting trees by adding to their identity and thus making another identity, or that of the Negro naturalist, George Washington Carver, who transmuted the identity known as the peanut into two identities, the peanut and peanut oil.

Extended elements of matter must return to their first octave gas for renewed power, just as the extended branches of a tree reach to the very roots of it for continuous renewal of their power.

This helps me to understand more deeply the transmutation principle.

Carbon is the pivotal center of the nine octaves and is in the anode position. It is the first of the wave amplitudes to have closed its hole and reversed its direction of compression from outward to inward. Its balanced position makes it possible to be encircled with the true matehood of geometric symmetry.

The succeeding amplitude positions lose that simplicity. Silicon, the next one on its wave amplitude, complexes to hexagonal symmetry. Then come cobalt, rhodium and lutetium which still further complex until the plutonium-neptunium ninth octave makes any form of crystal formation impossible by the multiplication of heat so that the entire octave explodes and gives back to its very roots all that which was given to it. But, like the tree which burned or died when it had matured, another tree or group of trees will sprout from those very roots.

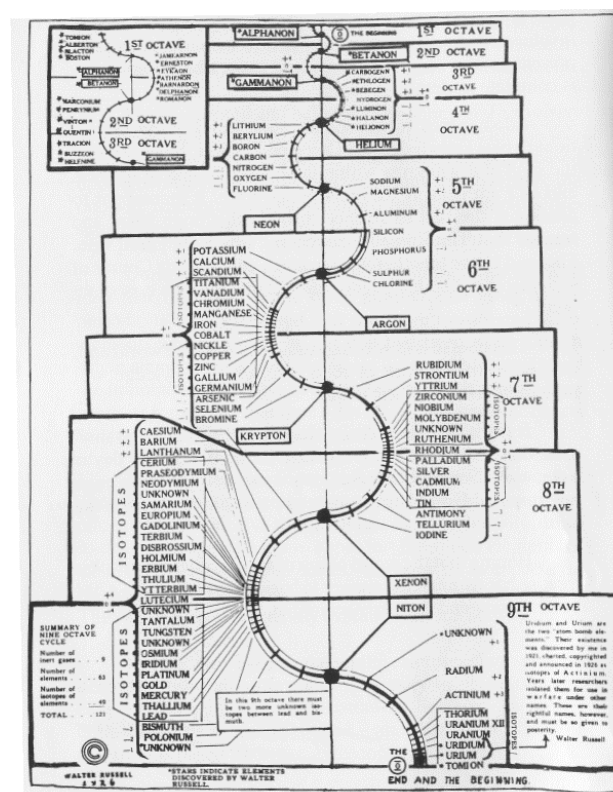

Figure 6: Periodic Chart of Elements

Carbon is the first amplitude element which has acquired sufficient strength to extend "children" from itself. Its completed spectrum, divided by a uniting equator, places it in the father-mother position, both of whom as divided pairs have united in balance to produce children such as our Earth, Mercury, Venus, Mars, Saturn and the outer planets. All of these planets and their moons are children of our sun. It has been but a few hundred million years since human life became existent on our earth.

I note that the speed of light has not developed in any of the other eight octaves preceding the ninth one to produce incandescence in them, and not then until carbon has at long last filled its hole. Density then increases from the outside in. Heat also increases from the outside in. Not even in hydrogen, the amplitude element of the third octave is there incandescence of itself. We have to make it so by adding incandescence to it in the form of fire.

If that were not so, the immense bulk of hydrogen in outer space would explode the whole universe. That tells the story of the smallness of our visible universe, which is only five octaves of the entire nine, and the inconceivable time consumed in making the Creator's thinking in light become solid enough to create formed bodies.

6. The Complete Control of Gravity Power

We can apply our knowledge to complete control of gravity power and with that I mean power to destroy missiles in those other countries, or anywhere under seas, by destroying the very metals themselves within which their explosive material is encased. Isn't this fun? In other words, the enclosing metals can be so intensively heated and their conductive and inductive qualities so vastly multiplied that the explosive material within them will ignite and burst their casings.

The secret of that is the same as makes transmutation possible by being able to compute the pressures of the elements. The basis of it lies in the fact that every created thing manifests only the idea of itself and cannot be a part of the identity of any other idea. The fact that every creating thing is what it is and cannot be any other thing gives it its identity. A violet, for example, cannot be a rose, an oak tree or a (wo) man. Identities are indestructible, because the seeds carried in inert gases are ETERNAL, and this is the very basis of transmutation!

It is all based upon the fact that the pressures developed in any element have their own distinct, unchangeable identities which are measurable.

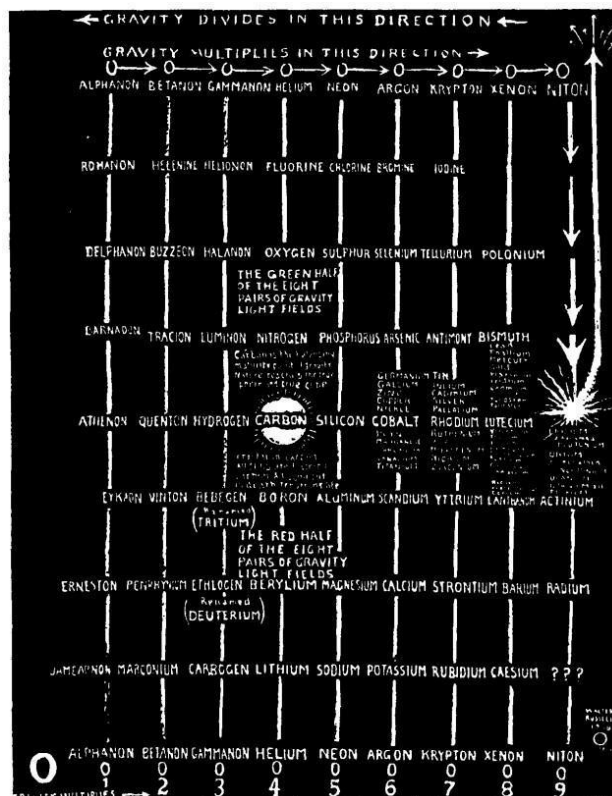

Figure 7: Walter Russell's chart

A single simple example of that meaning is the thermometer. The identity of the (wo) man-idea has a distinct pressure of 98.6 F. The exactness which is so finely calculated down to a minute fraction indicates the knowledge of control that science has, to be able to compute it. If a human's temperature is even one point higher, we know that he is ill. If it increases to 1 or 2 points above 103 degrees F., we know that it would be impossible for him to survive unless he could conquer it and do so rather quickly.

This being known, it is mathematically possible to measure pressures of every element in the entire octave series with computers and other finely attuned instruments and establish unchangeable identities in any element so that power projected to them would, destroy their like identities even in far-off countries. Distance has no meaning whatsoever.

7. Transmutation

Transmutation is based on the fact of gravity's control of light. All light is curved and there are no parallel rays in it, as shown by the textbooks on optics. If we look at the diverging rays of light which are projected from the sun, they appear to be straight but even they curve from sun to sun in long and short curves as they progressively curve SPIRALLY toward the focal center of all suns throughout the universe.

There is, however, a straight line at the equators of curved ones, but even they move spirally around an orbit of their final focal SOURCE in GOD, their Creator.

This definitely proves that all of Nature, which God's thinking is, must move around THE THINKER in equally

divided thought-wave pulsations which forever spiral centripetally to create illusions of time and continuity of motion in a still universe in which there is no motion.

All of these facts about the nature of light in a curved universe must be considered in order to succeed in attempts to transform matter from one element to another. Its difficulties are not so complex, however, if these basic facts are understood. Some laboratories proved these principles when they found new atoms by exposing them to light pressure but they did not know what they were. That is because they did not compute them mathematically to find the exact pressures necessary for pure known atoms. They, therefore, produced "mongrel" atoms of untraceable mixtures. **THEY MUST BE, FOR THE "LANGUAGE OF LIGHT" TELLS THAT IDENTITIES CANNOT BE CHANGED WITHOUT MONGRELIZING THEM.** Instead of obtaining the pure gas or metal that one needs, the product is not quite the one its identity calls for.

A group of scientists have given a great advancement to science through the magnification of the atom of tungsten some 2,700,000 times, thereby bringing it within the range of the eye to see (Fig. 5). This makes it possible to look directly at God and thereby prove that there is naught but LIGHT in the entire universe. That Light, which God is, is invisible and inert when cold. It becomes visible only when being compressed by motion - in more simplistic terms - God in action!

This discovery greatly aids science in the field of transmutation.

THIS KNOWLEDGE IS OF INCALCULABLE VALUE IN PROVING THAT THERE IS DIVISION OF THE SPECTRUM AND THEREBY THE EQUALITY OF ALL PAIRS OF OPPOSITES AND THE STATEMENT THAT FIRE AND WATER ARE THE ONLY PRODUCTS OF CREATION, FOR FLAME BECOMES VISIBLE WHEN COMPRESSED AND INVISIBLE WHEN EXPANDED INTO COLD. BETWEEN THESE TWO EQUALLY INTERCHANGING LIGHTS OF REST AND MOTION LIES THE LIFE PRINCIPLE OF CREATION.

Figure 8: Atom of tungsten magnified 2,700,000 times

If I would but meditate upon this subject long enough to completely comprehend it, I would have gone far into my own understanding of what inner vision or Cosmic thinking means. This will help me attain the power that inner vision gives me in the command of myself and of matter.

Having disposed of these roadblocks, I would now proceed to the mechanical means for providing that needed power to compute the exact pressures necessary to produce definite identities.

Necessarily, there must be redesigned solenoids and there is a solution for it. If the exact number of turns of wire is computed to give octaves the proper pressures which Nature gives them, they will heat at each 1 - 2 - 3 - 4 octave.

The work of transmutation also will greatly aid the mathematician in calculating exact pressures, which I must do before I can transmute one element into another. Transmutation is one of Nature's orderly lawful processes. It is continuous in its cycles of rotation.

We have seen this process carved in the falling meteorite which turns into flame while resisting the friction of the atmosphere and then into water again as it carves its own photograph into the frozen stone of which the meteorite is composed. We have seen oxygen and hydrogen turn into flame by the frozen stones of the meteorite's body in different parts of the world when they were dug up from the earth, stone literally being flame a few seconds before. We have seen volcanoes belch forth great flames of fire into a wet atmosphere which carved their photographs into lava, which frozen flame is. Why, therefore, should we have any trouble in finding out the secrets of transmutation when there are such discoveries to vastly aid us as knowledge of

the inside of the atom magnified 2,700,000 or more, as has long since been given us?

Water is continuously returning to fire and that process is again repeated by fire turning into water. Amazing help in making all calculations can come from studying the picture of the INSIDE of the atom (Fig. 8).

8. The New Energy Way

There is a fundamental change in the general framework of the playground called planet Earth that has been completed during last twenty five years and our awareness of this crucial fact and our readiness to act accordingly is the decisive crossroad for direction of our activities which will take us either toward success or toward failure. In other words, it is our free choice whether to decide to receive the support from the whole universe or to deny it.

The type of energy has been changed from the old vibration energy into the new expansion energy. The old energy is created through opposition between states of existence enabling and supporting existence of a force that consequently leads to power and fear, whereas in contrast to it, the new energy is created through rhythmic balanced interchanges between states of existence enabling and supporting existence of freedom, i.e. the new energy is forceless and does not support power and fear. As a consequence creation with the new energy is diametrically different: easy, simple, efficient and cheap, whereas creation with the old energy is hard, complicated, inefficient and expensive.

The new energy is a crystalline energy which can be controlled by THOUGH!

Is it not a super challenge to transmute through control of the new energy?!

9. Conclusions

Transmutation is not properly understood in science due the wrong concepts of atom, energy, mass, gravity, electric current, magnetism, heat and light.

Transmutation is the inherent ability within human's consciousness to transmute energy into any form that human chooses. It is based on true deep understanding - feeling - what energy is, and how it works in order to serve human consciousness according to the true law of attraction based on **human's ability to create reality and to manifest that which comes from human's passion and desire.**

Transmutation means modification through knowledge of how to control that modification, which is as simple as the plucking of a harp string thus increasing its vibration frequencies.

In order to do this human needs **the knowledge of space-geometry, mathematics, the wave of gravity control and the nature of electric current.**

The scientific community is unaware that *Spirit controls*

matter and that the *human Mind is the most powerful entity.* Today's science is based on deceptive sense information gained through observation.

In this civilization emerges new science based on knowledge of cause and on the true concepts and laws of creation.

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia).

1982 – Acquired my PhD in the field of atomic and plasma physics, at the Faculty of Physics in Belgrade, under the title: "Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas".

1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak

UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jullich (Germany).

1987 – 1991 Worked as a guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went my own way to discover and learn the God Aton's principles and laws of creation.

After 10 years of progression toward that sacred goal, I have finally succeeded and now know many of God's creational principles and laws (unknown until now) and can apply them to simple and efficient creations which constitute the basis for a new quality of life on this planet.

I am a pioneer in creating with the New Conscious Energy and building a new civilization without electricity.

My discoveries as independent researcher in the last 20 years:

- 1) Discovery of the truth about human being, consciousness, relation of the human being to physical body, relation of human being to God Creator Aton and Creation (this material universe) and the true laws and concepts of creation.
- 2) Experimental verification of the true "ATON" cell, atom and particle concept: light rings spinning around the centering Mind point which is the source of energy and from which the light rings borrow energy in order to spin, to move.
- 3) Discovery of so called "centeredness" of wave fields and on that base invention of Tesla Radiation Balancer, the first certified device without electricity for balancing (centering) of imbalanced (not centered) wave fields.
- 4) Discovery of the Natural Nuclear Waste Management System RBI101NWM – the ONLY solution for the nuclear challenge on the global scale. My natural nuclear waste management system (RBI101NWM) enables promotion of Nature's supreme principle that there is GOOD in everything, i.e., it turns this "negative" precept into the following great GOOD for this civilization: enables the integration of all nuclear waste (low, middle and high level) into the natural life cycle in a manner that solves the immense challenge of nuclear waste disposal FOREVER (100% efficiency), enables the release of water from underneath and creation on the surface of a few feet of decayed fertile soil and water necessary for organic life thus adding materially to the world's food supply, enables foresting of vast areas of the world with date palms and carpeting them with a verdure, enables the release of enormous amounts of oxygen which together with the enormous reduction of radioactive emission into the atmosphere will contribute to the stopping of both the negative earth's climate changes (global warming) and the oxygen depletion, as well as to the earth's rebalancing:

reestablishment of the optimal environmental temperature range and reestablishment of the optimal oxygen content in both the atmosphere and the waters, and enables creation of millions of new work opportunities worldwide.

- 5) Discovery of the true value of the PI number and solution of the in science unsolvable problem of "squaring the circle".
- 6) Discovery of the power of human conscious intent and rebalancing within two months of the damaged brain (Alzheimer) of a 5 year old girl with power of verbally expressed conscious intent. Watch the video here: <https://www.youtube.com/watch?v=iU-C7x0rXTQ&feature=youtu.be>
- 7) Discovery of the true concepts of energy, mass, speed of light, gravity and electricity and derivation of my equation of creation which properly describes both generation (compression) phase of creation and degeneration (radiation) phase of creation, as well as their simultaneous occurrence and sequential repetitiveness. This right equation definitely retires the famous Einstein's wrong equation from 1905 of "equivalence of mass and energy".
- 8) Discovery of the presence on our planet of the new conscious energy and its unit Deca and its many unique characteristics and ways of conscious unlimited creation with it in order to build a new civilization without electricity.
- 9) Discovery of the relationship between consciousness and energy: energy belongs to consciousness to create with and energy is server of consciousness fulfilling every our desire if we ALLOW energy to serve us.
- 10) Discovery of the Nature's radar principle which is the great intercommunication system for recording of all effects of motion and repeating them to all other effects in the universe at the speed of light.
- 11) Discovery of the absolute protection (protection from anything at all times) with The White Christed Light remotely (distance-less), instantly and permanently using my **I-Change** technology and my new energy Deca101 conscious chip.
- 12) Discovery of the conscious chip Deca101 with which every human desire could be fulfilled without electricity.
- 13) Discovery of the natural way for enlightenment (ascension, realization) using unlimited power of human conscious intent and allowance.

I wrote two books: "We are yet coming into the knowledge" (Belgrade, 1997), and "Jesus Christ: "The Truth About My Life"" (Belgrade, 2009) and I wrote two e-books: "GOD IN THE ATOM" and "DODECA 101 LOVE ENERGY" which are available on my website.

I speak English, German and Russian.
