Abstract: *The re - occupation of the Taliban in Afghanistan is an alarming situation for the whole world. It is the same Taliban who gave a new face to terrorism and trained fighters who only know how to kill; they have terrified the world for ages. Yes, this is the same terrorist organization that came into the spotlight after the World Trade Center attack of 9/11 in America and for years America kept its troops in Afghanistan in search of Osama Bin Laden. After all, America's withdrawal of troops and the re - emergence of the Taliban is all pre - planned. Is it or is it a coincidence? Because the way the Taliban terrorists are increasing their power rights will be snatched away, education will be throttled, children will be snatched from their mothers to be trained as terrorists? Will all this start again at a time when the whole world has moved beyond the 21st century. Before the era of 4G, the whole world is eager to welcome 5G, and Afghanistan is being pushed back towards the 16th century. To what extent is it justified for the killing of democracy and the expansion of Taliban rule at gunpoint? Due to this move of America, there has been an atmosphere of turmoil in the world, the work being done to establish peace is being done by America. Should America have taken this step at this time, should it? This more work could have been done in some other way so that American soldiers could return home only after neutralizing the Taliban. Perhaps this and America should have taken concrete steps and if these steps were taken, then perhaps terrorism could be controlled. The old form of "Taliban" would not have emerged with new faces. This is probably the second biggest pandemic of terrorism after the Corona pandemic, from which the people of Afghanistan will be praying for liberation.*

Keywords: Taliban, Afghanistan, America On Taliban, Kabul, Kandhar, India Air Lift from Afghanistan, Russia, China Diplomacy On Afghanistan

1. Preface

An atmosphere of instability is being created in the world, which is enough to show the danger of the coming future. Today the world is struggling with the Corona pandemic as well as the disease of hunger for power in various countries. It is no wonder that acivil war - like situation may arise in the country, that too only because the lust of power gives them permission to do all this. Greed is not less than a demonic form; it awakens the anger of achieving its goal as well as makes people selfish. Whether it is about fulfilling the aspirations of the common man or about the politics of a country, the flowers that are blooming in the corridors of politics are changed by the fragrant winds, have given the message of the arrival of the seasons where there is a sprinkling of blood. Simultaneously, the sound of the arrival of the dictatorship is being heard with full noise. This is the sound of such a masked organization that is going to write a new saga of its genocide on the entire land of Afghanistan in the coming time and it is none other than the Taliban.

Before the year 2000, the group of Islamic students was very active in Afghanistan, which later started doing political activities together with some groups of students. Wanted to run this organization, he gave the name of Taliban, which became known for promoting its cruelty and atrocities on women in Afghanistan. Work was done to make women completely captive here. And freedom was marked as four - walled. Women were made to strictly follow Islamic laws. As a result of which the Talibans got the support of Afghanistan's neighboring country Pakistan, which started promoting terrorism by both countries.

After the terrorist attack on the World Trade Center in September 2001, deadly attacks were carried out by the US,

which resulted in a successful attempt to eliminate the influence of the Taliban. Due to these attacks, the Taliban have eliminated from Afghanistan in 2001 itself.

The Taliban had become active again with the order of the US administration to withdraw its troops in the year 2014, due to which it started attacking the government of Afghanistan, the Taliban has been completely against democracy, as well as the US. They consider America as its enemy, they consider America to be an imperialist and is eager to recapture power in Afghanistan, they are waiting for the opportunity when all American troops are completely withdrawn. Islam should be based on religion and not democracy. They considers their important role in establishing peace in Afghanistan, they believes that peace cannot be restored in the region without talks with the Taliban.

It is believed that the Taliban is a mental product of which Pakistan is responsible. It was created by Pakistan to conduct terrorist activities smoothly and secretly so that it can carry out terrorist activities in Kashmir and other countries.

Since the withdrawal of the US army, Taliban leaders are increasing their activities speedily, they are constantly trying to get the support of countries like China, Pakistan, etc. so that they can raise the Taliban flag, for which it has to be continuously supplied money and weapons will be needed and for which the Taliban is also trying. This is the reason that all these countries are being contacted by the Taliban leaders.

Violent incidents between the Taliban and the Afghan army have started increasing since the Biden administration

announced the complete withdrawal of American troops in August 2021; in the meantime, the Taliban established their possession of American weapons, choppers, tanks, etc. After taking over Kandahar, the capital Kabul has also been taken over by the Taliban on 18th August 2021, which has become a matter of concern for the whole world because all this was done in lieu of destroying democracy. There was an effort that was achieved at gunpoint.

In the midst of all these circumstances, the President of Afghanistan, Ashraf Ghani, has left his country immediately, this step was taken in those situations when perhaps the country needed a leader, at such a time it is not considered appropriate for a President to leave the country. A few days after leaving the country, he was given asylum by the United Arab Emirates. He said in his speech that it was necessary to leave his country, if he did not do this, perhaps there would have been more bloodshed in his country. Although this step taken by him is considered cowardice by the people of Afghanistan it is being supported continuously, the same Ashraf Ghani has come under the target of both the countries. With the support of both the countries, now the world seems to be divided into two parts, which does not show any positive sign.

Today, on this step taken by America, some big countries of the world are turning against America, including China, Britain, and France, etc. Work is being done by all the countries to airlift their diplomats and all the officials so that more and more people and officials can be evacuated from Afghanistan. All this is seen as an increased major strike.

It is being said by the US President that his move was in the interests of the soldiers of his country, he is proud of his decision, although Biden is being criticized by former President Donald Trump for this decision. The President has also had to bear the blows of sharp criticism from the world.

At present, the condition of Afghanistan is getting worse. India is keeping its eye on this. I am also very concerned about the ongoing projects by India in Afghanistan because it may be harmed in some way or the other by Taliban in the future.

The special thing is that now the work of demolishing the wall of democracy is being done day by day in Afghanistan, where preparations are being made to re-enforce the former Taliban rule laws. The day is not far when it becomes a terrorist stronghold. Will go and then a new Osama will be born which will become a threat to the whole world in the future.

2. Conclusion

It definitely takes time to connect the walls of democracy, but the outside of democracy is like that fragrant flower that is not only for a particular person but for the whole community. Freedom is the birthright of all, the freedom of any individual is only then he may be shocked when he finds the barriers walling around him. The situation in Afghanistan is getting delicate, due to the rise of the Taliban. The international community is watching a spectacle leaving such a country in the middle, ignoring the concerns of the

future which will later be made a stronghold of terrorists. It is being used as a means to disturb international peace. Today, a country is hurt, for whose protection everyone will have to come forward, otherwise it is also written from the pen of those who pray for democracy. It will be known that perhaps democracy can also be bowed before the tip of the gun.

It is time to wake up, to save democracy, to help those women and destitute children who know the reality of Taliban. The world is aware of the atrocities of the Taliban on women. It has to be stopped; otherwise slowly Afghanistan will continue to become a new stronghold of terrorism, which will prove fatal for the whole world.

There has been euphoria in Afghanistan where everyone is eager to leave the country; the extent was reached when some people tried to climb on the roof of the plane shortly before the takeoff of the American plane. As a result of which some people died after falling from the air after some time. According to some media information, pieces of mass have also been found inside the fan of the engine. This is one of the incidents that disturbed the whole world.

For India, this time is not less than an international emergency, where India is presiding in the Security Council, so it is also alert about the developments going on in Afghanistan. India's priority is also how to maintain the atmosphere of peace in Afghanistan should be established and India is well aware that the Taliban is a big obstacle in the path of peace, whose support it has been getting by Pakistan.

In view of the situation in Afghanistan, the system of e - visa has been started by India where work is being done to give its benefits to various Afghan refugees. India also wants that somehow it can help the Afghan citizens. It has also been said by the Secretary - General in his statement that we have to come forward to help the people of Afghanistan at this time and immediately open the international borders for them so that we can help those people. The increasing power of the Taliban is a matter of concern because their history is known to the whole world. It is an organization of dictatorial ideology which can go to any extent to fulfill its plans.

A form of Taliban, it is considered very dangerous to negotiate in a restrained manner in front of the media, because once the US military withdraws completely, then no one will be able to stop the Taliban from committing atrocities. Although America has said its army will return by August 31, due to which its government has not yet been formed by the Taliban and many news also raises questions on their functioning. Although in some provinces of Afghanistan, Rebellions have started, there are many such provinces where Taliban insurgents are being evacuated and barricades are also being made against them, from which it is clear that still the people of Afghanistan do not accept Taliban rule and they should do their best at any cost try to show the way out of the country.

On one hand, China, Pakistan, and the rise of new concerns for India, the rise of the Taliban, all of them are showing the

coming storm of the future, because the Taliban is being supported by China, which will be a headache for India.

It is also to be seen that what other countries will be there along with India, which will give a united slogan against Taliban in the coming days. For the time being, India will have to remain choked, especially on the issue of Kashmir, because it was the Taliban who were fighting Pakistan's quest for Kashmir. Along with promoting terrorism, everyone is aware that there is a difference between the words and deeds of the Taliban. India should begin its siege so that it may be set before its peak.

Now it remains to be seen what other action the international community takes, whether the UNSC should immediately declare a state of emergency and act on the Taliban or leave Afghanistan and its people on their own. Which direction does the stream take?
