

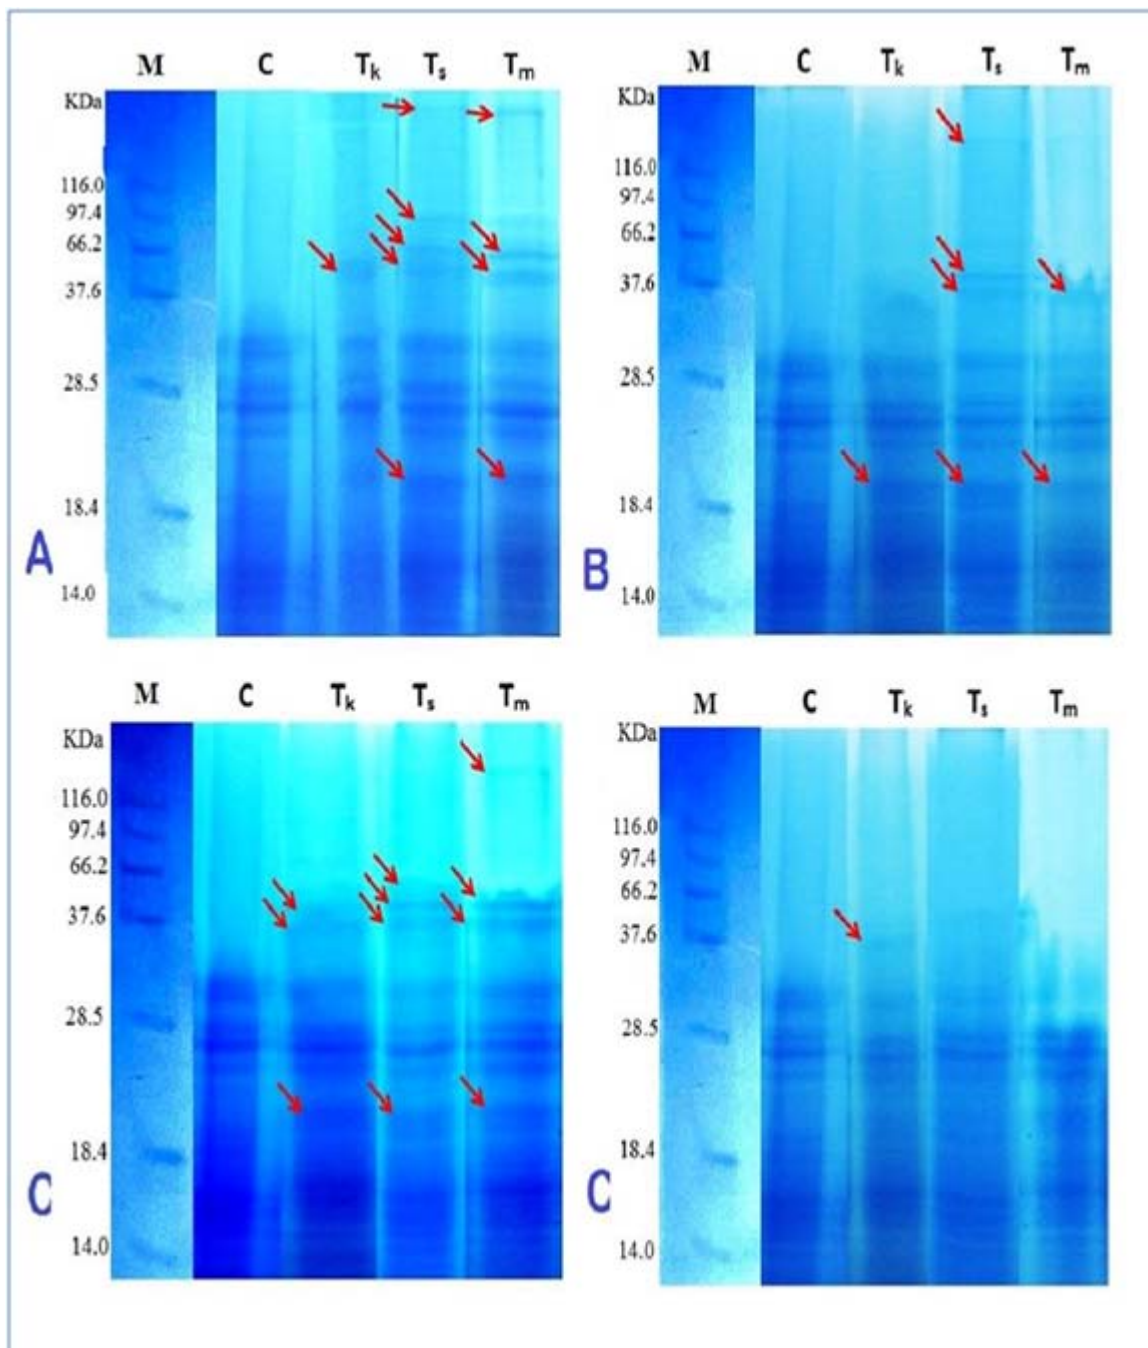

**Figure 6:** SDS PAGE of different studied groups control (C) (normal larvae without any infection), *K. pneumoniae* ( $T_k$ ) (infected larvae with gram - bacteria, *K. pneumoniae*) and *S. aureus* ( $T_s$ ) (infected larvae with gram + bacteria, *S. aureus*) Mix ( $T_m$ ) (infected larvae with both gram - bacteria, *K. pneumoniae* and gram + bacteria, *S. aureus*). ( A&B&C&D) the different studied group after 30, 36, 42, 48 h postinfection respectively.

**Figure 7:** SDS PAGE of different studied groups control (C) (normal larvae without any infection), *K. pneumoniae* ( $T_k$ ) (infected larvae with gram - bacteria, *K. pneumoniae*) and *S. aureus* ( $T_s$ ) (infected larvae with gram + bacteria, *S. aureus*) Mix ( $T_m$ ) (infected larvae with both gram - bacteria, *K. pneumoniae* and gram + bacteria, *S. aureus*). ( A&B&C&D) the different studied group after 54, 60, 66, 72 h postinfection respectively.
