Author Profile

Dr. (Mrs.) Ravindra Kumari Tiwari obtained Ph.D. in 1987 Osmania University, M.Sc. in 1975 from Osmania University. She has over all 36 Years of teaching experience and research experience of more than 30 years. She is the Principal investigator for UGC-sponsored Major Research Project. Ministry of Science and Technology on behalf of DST and Society for Environment and Development appreciated the outcome of our major project UGC 2008.A referee for various research articles in journals of good

impact factor & Project-ICMR. One of our paper is on the top 20 articles published. Presented a live video (RTCC Channel) in COP 11. Visited abroad for paper presentations on EMFs:USA,-2002 (UGC-Sponsored), GREECE-2006 (UGC-Sponsored), SINGAPORE-2007. She received medals and awards like Indira Gandhi Sadbhavana Award [2014], BOLT -Broad Outlook Learner Teacher Award by Air India , 1st in Hyderabad [2009], INDIAN ACHIEVERS Award for Education Excellence [2010], BEST-TEACHER Award by Govt. of Andhra Pradesh-GOLD MEDAL [2002], Shree Shankerjee GOLD MEDAL [AIIE] [1973, United States Information Service USIS GOLD MEDAL [1974], President Guide Certificate-Late Dr.Zakir Hussain [1968], Nominated for Worlds Who's Who – Academician [2008].

Prof. Y.R Ahuja did Ph.d in the year 1960 from University of California. Pre clinical Degree from University of California. Sir is associated with many research projects out of which 14 are completed and 1 project is ongoing. His recent research projects is on-"Molecular genetic study of β -amyloid precursor protein in different neurological disorders including autism" (Recently completed-June 2013 - ICMR). Sir has 16 papers published to his credit.

Prof. S.C.Bhargava Graduated in 1963 from the University of Jodhpur, Rajasthan. Obtained Master's degree in Power System Engineering from the University of Roorkee in 1966 and Ph.D from the University of Aston in Birmingham, UK, in 1972.His area of specialization is the application of power-frequency electromagnetic fields formulations to the study and analyses of electrical machines, transformers and turbogenerators, using Finite Element techniques. For the past over 15 years he has also been with a team researching actively in the area of "Biological Effects of Power-frequency Electromagnetic Fields (EMFs)" on which he has published and presented several papers. At present, intensely involved with the design and development of SOLAR ENERGY SYSTEMS. Author of a unique book on measurements, titled: Electrical Measuring Instruments and Measurements" which is just published.

MS. Kavitha Varak obtained M.Sc from Swami Ramananda Teerth Marathwada University in 2004. She has 11 years of teaching experience. She has presented about 12 papers in various State, National and International conferences and attended around 7 workshops and faculty development programs. At present she is pursuing Ph.D (Biotechnology) from JNTU, Telangana.

Mr. Vemula Surender obtained M.Sc from S.K. University in 2003. He has 10 years of teaching experience. He has presented about 20 papers in various State, National and International conferences and attended around 5 workshops and faculty development programs. At present he is pursuing Ph.D (Biotechnology) from JNTUH, Telangana.
