

12. Limitations of the Study

Research is a complex, complicated and scrutinizing activity based on scientific knowledge and competence. For doing the study a lot of problems are suffered by the researcher's. Some of these problems are given below:

- 1) The fieldwork was limited only in Khejuri CD Blocks of Purba Medinipur District of Bengal. The study sample size is very precise.
- 2) Most of the sample respondents are illiterate or less illiterate. So, due to this reason, proper and adequate answer could not be taken from the respondents against questionnaires.
- 3) To prepare an analytical study, financial assistance is most necessary. Lack of sufficient money, various types of analysis did not possible.
- 4) To conduct the field work there has been faced different kinds problems and obstacles from political, administrative and also brick field owner's sites.
