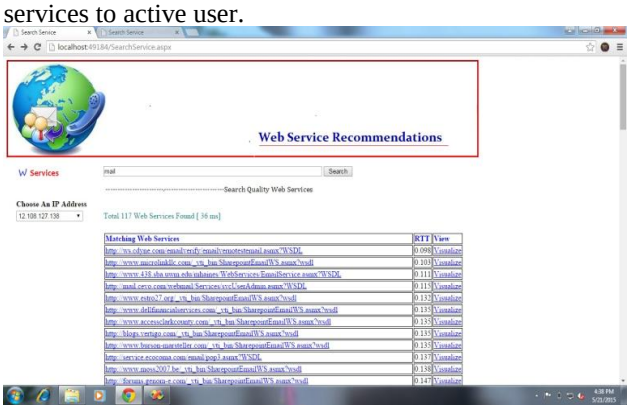
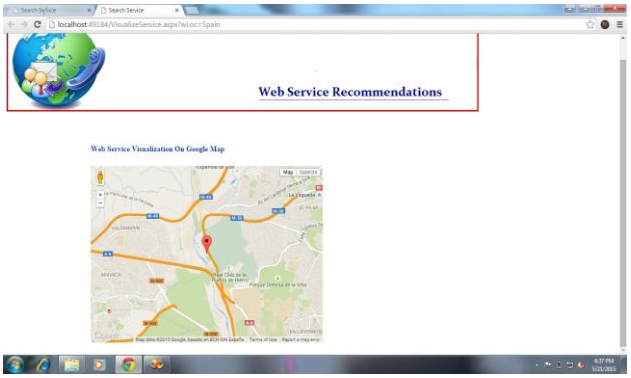
6. After region aggregation ,here we predict RTT value of services to active user.



7. After predication step,we will get the visualize services in 2D co-ordinate.



5. Conclusion

The proposed system algorithm provides the characteristic of QoS by clustering users into different regions. A nearest-neighbor algorithm is proposed to produce QoS prediction established on region feature. In recommendation approach, it included the relationship between QoS records and users physical locations with IP addresses; it has obtained the good prediction performance as compare to existing methods.

6. Acknowledgments

I express great many thanks to Prof. S. A. Shinde for his great effort of supervising and leading me, to accomplish this fine work. I am thankful to our Head of the Department Prof. Mrs. G. J. Chhajed and Prof. Mrs. S. S. Nandgaonkar, (P. G. Coordinator) for their moral support and motivation. I would also like to thank our Principal Dr. S. B. Deosarkar who encouraged us and created a healthy environment for all of us to learn in best possible way.

Author Profile

Pradip Shendage received the B.E degree in Information Technology from K.G.C.E,karjat under the Mumbai university in 2012 and pursuing M.E degrees in Computer Engineering from Vidya Pratishthan's College of Engineering, Baramati under the Savitribai Phule Pune University.In B.E ,I have got 63% with first class.

Prof. Santosh Shinde received his B.E. degree in computer engineering (First Class with Distinction) in the year 2003 from Pune University and M. E. Degree (First Class with Distinction) in Computer Engineering in 2010 from Pune University. He has eleven years of teaching experience at undergraduate and postgraduate level. He has attended various National and International Conferences, Seminars and Workshops on various subjects like Multimedia Techniques, Multicore Computing and Software Engineering. He is a life member of ISTE (Indian Society for Technical Education) and IACSIT (International Association of Computer Science and Information Technology). He has worked as a review committee member for the 1st Internaional Conference on recent trends in Engineering and Technology (ICRTET'2012) held at SNJB's COE, Nashik. He has worked as a Judge for the State level paper presentation (REBEL) held at SVPM's COE, Malegaon. He has attended workshops on Robotics, Research paper writing and Latex conducted by IIT, Bombay remote center at VPCOE, Baramati. He has to his credit IBM RFT certification with 100% score. He has organized one day workshop on Software Engineering by Dr. S. A. Kelkar, adjunct Professor IIT, Powai.
