

correlation coefficient (0.999245) and the error ratio (0.014145)

correlation coefficient (0.999005) and the error ratio (0.016646)

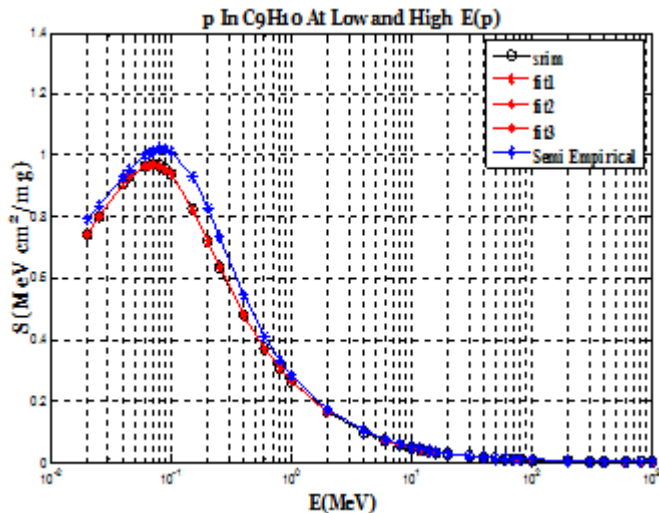

Figure 3: shows the relationship between the stopping power and energy of protons in compound C₉H₁₀ the correlation coefficient (0.99885) and the error ratio (0.019312) .

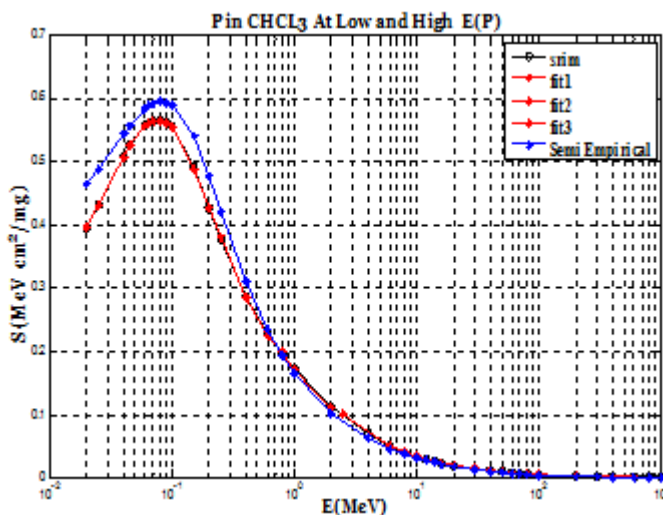

Figure 4: shows the relationship between the stopping power and energy of protons in compound CHCl₃ the correlation coefficient (0.993051) and the error ratio (0.010983)

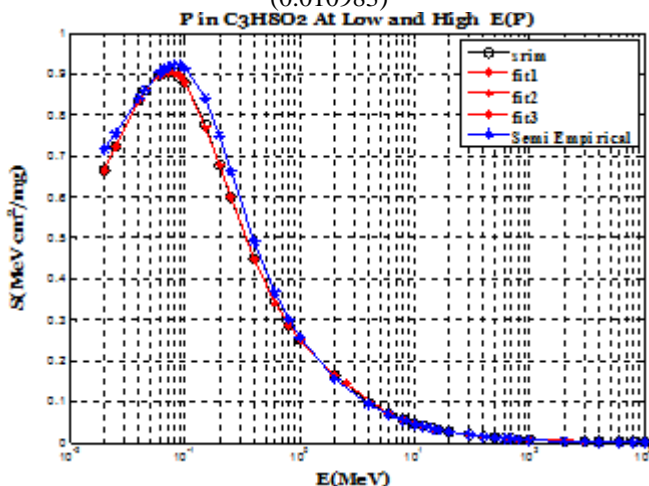

Figure 5: shows the relationship between the stopping power and energy of proton in compound C₃H₈O₂ the
