Abstract: Employee morale plays a very important part in the organization success. High morale leads to success and low morale brings to defeat. In an organization if the employees possess high morale then their attitude to stay in the organization will increase otherwise the vice versa. The play of morale is not less important for an Industrial undertaking. The success and failure of the Industry depends on the morale which the employees have towards their organization. The Organization needs employees with high morale and moreover morale is a psychological factor and measures can be adopted to build a high level of morale in an employee’s mindset.

Keywords: Employee morale, Factors affecting morale, Building high morale.

1. Introduction

In every organization, people are working with in a suitable environment of attitude. Each employee has attitude that range over the entire spectrum of human behavior. All managers have a constant concern for the morale of the group, which they lead. However, considerable confusion prevails over the use of term because of variation in defining characteristics of the term. Some researchers make this distinction. Some researchers take job satisfaction as individual phenomenon and morale as group phenomenon from one point of view, morale may be regarded essentially an individual matter, it is described in terms of the feelings of an employee or manager towards his work; it is thus, a matter of work satisfaction. Guion describes morale from the point of view of an individual desires satisfaction from his total job situation. When morale is regarded as an individual phenomenon, many investigators organize these feelings what are assumed to be worker’s needs.

Morale is defined as the total satisfaction that a person derives from his job, the prevailing atmosphere and the factors that appeal to his individual propensities. It’s a summary of attitudes and feelings that constitute a reserve of physical and mental strength including factors like self-confidence, optimism and a positive mental attitude. Morale is almost like an invisible element which determines the success or failure of an organization. Human Resource is considered to be the valuable resources of any organization. It may be defined as an attitude of satisfaction with the desire to strive for the goals of a particular group. Morale is purely emotional. It is not a static thing it changes depending upon working conditions. It is the vital ingredient for the organization success. Employee morale is directly associated with employee retention because the employees who feel a high level of job satisfaction tend to remain and work for the organization.

2. Factors Affecting Morale

Employee morale is a very complex phenomenon and is influenced by many factors on the shop floor.

- **Nature of work**
  Meaningful and satisfying job helps to improve employee morale. In such job member of the group understands clearly how his specific task contributes to the attainment of group goals. Morale trends to be low when the job provides no challenge and satisfaction and job standards are considered very high.

- **Working Conditions**
  Physical work environment, job security. Wages and other allied factors exercise a significant influence on employee morale. When the wages are fair, job is secure and there are opportunities for promotion job satisfaction and morale are likely to be high.

- **Supervision**
  Competent dependable and fair-minded leadership and build and maintain high morale. Such as leadership can win the confidence of employees through sympathetic and friendly behavior. Lines of authority and responsibility are clear and communication system is effective.

- **Interpersonal Relations**
  The confidence of an employee in follow employee influences morale. When a worker is conflict that his co-workers are loyal to him and will provide advice and assistance when ever necessary his morale is likely to be good. Confidence of individuals in the goals of the group. A feeling gatherers and common goals trend to raise employee morale.

- **Management Policies**
  The policies and attitude of management concerning, promotion, transfer, etc., affect Morale, company’s image in the employees mind also influences morale. The attitude and practices of managers in their dealings with workers affect morale.

- **Personal Factors**
  The age, education, occupation level and family life of an employee, determine his morale, some research studies
indicate that young, higher educated and low status employees trend to have lower morale.

3. Measures for Building High Morale

Morale building is a difficult exercise as it involves removing misconceptions. Changing attitudes, and dealing with emotions. The following measures may be helpful in improving employee morale.
- Proper work environment
- Job security
- Sound compensation system
- Sound promotion policy
- Creation of whole jobs
- Job enrichment
- Employee counseling
- Worker’s participation in management

Significance of the Study

<table>
<thead>
<tr>
<th>S. No</th>
<th>Attributes</th>
<th>No. of Respondents</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Salary</td>
<td>24</td>
<td>22</td>
</tr>
<tr>
<td>2.</td>
<td>Salary &amp; Bonus</td>
<td>55</td>
<td>50</td>
</tr>
<tr>
<td>3.</td>
<td>Salary bonus &amp; incentives</td>
<td>31</td>
<td>28</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>110</td>
<td>100</td>
</tr>
</tbody>
</table>

Source of Data: Primary data

Inference
The table-5 shows that 50% respondents are received monetary benefits in the form of salary, 28% of the respondents received benefit in the form of salary bonus and incentives. The remaining 22% of the respondents received monetary benefits in the form of salary.

5. Findings, Suggestions, and Conclusions

- Most of the employees working in the society are coming under age group of 40-50 years. Due to age factor the working efficiency decline. So the silk society they recruit young and energetic persons.
- Silk society is not providing incentives to their workers. It they provide any incentives the work efficiency may increase.
- The majority (64%) of the respondents are answered that their society organized annual social functions.
- The majority (38%) of the respondents with their satisfied safety and welfare measures.
- The majority (50%) of the respondents are satisfied with salary and bonus.

Suggestions

- The society has to provide their retirement benefit of employees.
- The society has to arrange interaction program.
- The society has to provide adequate loan scheme.
- The society has to encourage the employee towards in decision-making process.

Conclusion
Morale is psychological concept. Morale is not a cause but rather the effect or result of many going awry. Morale differ from person to person, industry. Level of education, age nature of work etc. range from very high to very low

The present study reveals the morale of employees. “Annai Sathiya silk hand-loom weaver’s co-operate production and sale society ltd CD (H)-3 Thiruvarur, become satisfactory. If it take future steps to increase the morale, not only employees are benefited but also the society may enhance the productivity, this will reflect the society to compete the competitors.
