and Remote Sensing/ GIS techniques in the field of Medicinal plants/Agroforestry.

Phiralang Diengdoh did his graduation in Biotechnology from St. Anthony's College, Shillong and then went on to complete his post graduation in Bioinformatics from Kuvempu University, Karnataka. He worked as a teacher in schools for two years before joining the Bioresources Development Centre, Upper Shillong as a Junior Research Fellow and then as a Technical Assistant for a period of four and a half years. He had worked intensively on the conservation and propagation of indigenous as well as hybrid orchids and medicinal plants through various plant tissue culture methods and their subsequent lab to land transfer. He later joined St. Edmund's College, Shillong as a project trainee in the Bioinformatics Facility, Department of Biotechnology and worked on various research topics pertaining to in silico studies of enzymes involved in environmental bioremediation.

Samrat Adhikari was born in Shillong, Meghalaya in 1979. He has obtained the doctoral degree from North Eastern Hill University, Shillong (2011) in the field of environmental biotechnology and the masters with specialization in molecular microbiology (2002) from Bangalore University, Bangalore. He has received the Biotech Industrial Training Programme fellowship (2003) and also has a vast teaching and research experience for 12 years. Currently he is an assistant professor & the head of the Biotechnology Department, St. Edmund's College, Shillong. He has published 5 papers in peer reviewed journals and 3 in national & international conferences. He has under gone many trainings and also has organized many workshops for young researchers. He is also the reviewer of many academic journals. He has supervised for 3 M.Tech thesis and is currently handling 3 projects sponsored by the different funding agencies of Govt. of India. He is presently a member of many academic bodies in universities. At present, he is working on environmental biotechnology & bioinformatics

Author Profile

Bikash Thakuria was born in Guwahati, Assam (India) in 1988. He has obtained a master's degree in the field of biotechnology from Bangalore University (India) in 2012. Currently he is working as a Research Associate under Bioinformatics Infrastructure Facility (BIF), funded by the Department of Biotechnology, Govt. of India, in St. Edmund's College Shillong and holds a research experience of 3 years. He has published 4 papers as the First author in them. His field of research is proteomics and computational biology. He has also participated in different national level workshops in the field of Biotechnology and Bioinformatics. He is also associated with the docking and interaction studies of different azo dyes and their environmental impact. Currently he is working on a medicinal plant named *Smilax aspera* and its proteins for cancer studies. His future plan is to incorporate the Bioinformatics
