Artistic and Aesthetic Experiments and Historical Reality in the Field of the Genre of the Tetralogy

Zebo Yaxshiyeva

Lecturer at Karshi branch of Tashkent University Information Technologies named after Mukhammad al Khorazmi

Abstract: The article details the writers' contributions to the trilogy genre, as well as artistic and aesthetic experiences and concepts of historical truth.

Keywords: genre composition, epic, tetralogy, versatility, socio political, aesthetic, historical truth, lyro-romantic, artistic reality

1. Introduction

In any genre-composition search there will be experimental experiments. These studies help determine the full nature of poetic intrusion. In particular, in such genres as the novel, the novel-dialogue, the novel-trilogy, the novel-tetralogy, which presents a wide epic scale, reflecting the incredibly Grand landscape of life, this phenomenon in a certain sense shows its reflection. The search for the romance genre at the beginning of the last century is particularly relevant. The plays of A. Kadiyriy "Past days" and Chulpun "Night and day" in some sense had an impact on subsequent creations. Until the middle of the century ad, S. Ahmad's trilogy "Horizons" laid the Foundation for further expansion of the novel. Currently, he is one of the talented writers who takes his place on the stage of fiction M. Ali tetralogy "Great reign" implies artistic and aesthetic experiments (in this place, style, method, expression!) it is appropriate to note that it has fully demonstrated its specific form. In fact, this genre, that is, tetralogy, as the author himself noted, is a logical continuation of the creative idea and experience born after the creation of the novel "Sarbadors" in the 90's.

Unique writers L. Tolstoy "War and peace", M. Sholokhov "Quiet don" in the literary world still recognizes that the epics created boundless power of artistic thinking, infinite breadth of the research manner of man, the versatility of semantic expressions reflected in the word and its essence.

Being the creative idea of M. Ali, who ruled in the huge epic canvas of Mavaraunnaeh, glorified the personality and value of Sahibkiran Amir Temur as a father, a figure, a noble patriot, and a noble Patriarch of high human dignity, laid the solid foundations of the centralized Temurian Kingdom, further life, comprehensive development of socio-political, cultural and educational reforms of the time and diplomatic relations.

It is also symbolic that the original creative plan began with only one poem, which symbolizes the transformation of his novel into an epic. "The first creative plan never falls from the sky Its emergence is also the basis of the life of the people. This plan is in the heart of an artist who knows the hearts, thoughts, aspirations, and will of people and has dedicated himself to fighting for his bright future. By the way, in each work, the artistic plan, which is hidden in the basis of the reality of life, is revealed by its concept, talent, skill, and labor. But what of them comes to "action" does not soothe the writer, it again depends on diffusion, the "catalyst"1. If this quote is directly compared with Ali's epic "the Great reign", the essence of the question becomes even more obvious. While the writer began his first creative plan with a lyrical composition. As time passed, forming an epic scale, it became one of the main factors in the emergence of an epic composition.

This tetralogy, viewed as an artistic and aesthetic experience, is of particular interest in the fact that artistic fabrics are absorbed into the cells of a work based on historical facts. It is also measured by the reliability of the individual and his or her inner world, the strength of the family sanctuary, and the reliance on reliable sources that reflect the appearance of the period. That is, the author emphasizes in the emotionally unconscious presentation of the text that it connects all reality with the personality and significance of Amir Temur, the consistent development of typological features of plot events.

There is also a logical connection with the fact that each work has a separate name, according to the name of the sons of Amir Temur. In particular, the development of events is evidenced by the intelligence of Amir Temur, his broad and thoughtful king, occupying the throne or occupying it. This also indicates that the author is one of the main tasks that he set for himself.

The expression of the poetic aspects of the epic novel with the names "Jahongir Mirzo", "Umarshayh Mirzo", "Mironshoh Mirzo", "Shokhrukh Mirzo" served as an important key to the writer's first creative intention. Indeed, as an artistic and aesthetic experience of the writer, we will not exaggerate if we say that initially the epic "Light on the dome", the work "Sarbadorlar" also played an important role in the revival of historical truth. For some reason, there is no doubt that any work of art has creative intentions and, as a result of a long search, new discoveries. In this sense, the formal and methodical aspects of the epic novel prove that the writer's worldview improves, as well as as a result of a step towards full-fledged goals. (Umurov H. Fundamentals of artistic creativity. Tashkent: "Uzbekistan".2001.- B.)

The novel "the Great reign" can not be evaluated by the criteria of a consistent, realistic style in terms of the principle of the image. Because the image of the novel is
dominated by the subjective basis, and lyre-journalistic elements are numerous. The passion of the heroes, who have an extraordinary nature, is full of enthusiasm, and the wrestlers themselves. The plot, composition, leading pathos, language, figurative style of the novel are clearly manifested. Thus, if in the analysis of the "Great reign" we do not take into account the type of creativity to which it belongs, then the possibility of seeing the beautiful qualities of the work will be obvious. (Turaev D. Uzbek tetralogy. Toshkent: "Akademnash".2017.- B. 14).

Since the principle of the conditionality of artistic creation is forgotten, our imagination about the artistic truth of creativity also becomes an Association. " Indeed, in a quote quoted from the author's intention of creativity, the great philosophy of the time, the strategic reforms of the world, always seemed to be excited by the petition to be the winner. It is in the textual analysis of the epic novel that this thing is clearly visible. (Islamkhan Yakubov The concept of historical process and lyro-romantic interpretation in the works of Muhammad Ali. Tashkent: Science. 2007.- B. 48)

In the literary canvases created by the era, the cultural and educational life of society is widely focused on the research center. The reflection of the problems of the world and man in the aesthetic experience of the author is relevant in the application of the principles of correct interpretation of the question. It was in this respect that M. Ali "accelerated" the intensive stages of full-fledged character formation of those who participated in the work. L. Tolstoy and M. Sholokhov are following the path of deliberate stretching text when creating a character, a thorough description of reality, M. Ali describes the main expressions in the style of the image, demonstrating a great philosophy of time through brevity. It is gratifying that this method of expression has attracted an interpretation corresponding to artistic and aesthetic experience.

Amir Temur's "laying down" became an important factor in the emergence of a more convincing, lively, strong drama of the epic novel. We all know that its socio-political reforms Temur, responsibility to family and country, had increased the feeling of great satisfaction among the people of the Palace fairly and reasonably relate to the education of children.

Turning a historical fact into an artistic reality also requires a great deal of creative search from the writer. “In the work of Muhammad Ali, based on sources, it was emphasized that in the work of Sahibkiran, justice, faith of man, as well as in the performance of these noble slogans, the blessed letter of Piri Mirsaid Barak, who lives in Andhuya, greatly influenced. In the novel, the writer tried to bring the language of the characters closer to the medieval Turkic or old Uzbek language.” (Umurov H. Fundamentals of artistic creativity. Tashkent: "Uzbekistan".2001.- B.)

Another important source of historical facts is Sharafuddin Ali Yazdi's historical paly “Zafarnoma”, which also wounds the writer in the emergence of a great creative intention. Amir Temur, who discovered personal and noble deeds in it, creates the basis for the formation of a peculiar direction in artistic interpretation. Despite the fact that the writer emphasizes more reality in the management of the past battle, focused on showing their time in the background - this is the same fact.

Overall, the artistic aesthetic experience, fragments and sections of the work, and then a full-fledged glimpse of the tetralogy provided a solid Foundation for stabilizing aspects of the creative world, such as extensive life experience, research, and skills. This Foundation has developed the skills of rethinking life and literature, man and personality, traits of a great man. Thus, as the author of the concept of artistic creativity noted, it is extremely important that the author emphasize the importance of studying historical facts, draw the necessary conclusions and, most importantly, feel connected with serious research. After all, in the process of fiction, the author is determined not only by the management of reality, but also by the description of his fate.

It is known that in order to turn historical truth into artistic reality, the writer requires a lot of creative research, careful study of the fabric, the actual materials. When it comes to this "..... collecting rich material in the creation of a historical novel is also hard work, but sorting, selecting, limiting the collected material, its artistic processing is a great art” (Kattabekov A. Historical reality and artistic skill. Monograph. T. Science. 1972. - B. 102).

Indeed, as a result of many years of creative search, Muhammad Ali's tetralogy "the Great power", which came to the world, is a typical example of this process. Based on the actual materials, the writer recreates a unique strategic concept of the Temurid dynasty, period, environment, social life, and evolutionary growth, which opens the way for the expansion of existing ideas, perception of the "form of the novel" (Belinsky V. G. Collection. Op. Vol. Moscow, 1948, P. 288). Since in the words of V. G. Belinsky, " to tell what happened is not a story." In particular, the writer faces very important tasks related to a great and thinking man. The great power tetralogy is a peculiar form of historical epic in the new Uzbek literature. Even with the title of the work, the writer turns to a symbolic review. The artistic concept as a majestic structure of great power-can be viewed as the highest goal, denoting the name of four children. So, "observing the opinions of great people is a very interesting activity" (A. S. Pushkin).

It is not difficult to understand that the actual materials studied by the writer when creating a historical fact were included in the era of Amir Temur as an important factor, from the historian's manuscripts to his treatises. In the artistic details about the environment of the era applied in the novel, the scale of the writer's creative intention is felt. Academician B. Nazarov in this respect: "the Main purpose of the writer is to show Grand historical events, military exploits, the magnificence of the power of different countries, to transfer them to a sense of artistic background and show that the focus is on the Amir Temur, who moved the essence of this background, as well as the surrounding environment, the soul of those who are with him for a long time and lately talked, portraying them as on the same day, sometimes past, sometimes future" (Nazarov B. Living work. "Jahongir Mirzo"). Therefore, it is worth noting that in the novel "plot incarnation" is focused on the epic scale-a
single aesthetic center with a compass (time of composition). Despite the fact that the first book of the epic novel was nineteen years since the publication of "Jahongir Mirzo", the work with several amendments was published two or three times. The process shows that the chain of realities of chronology, aimed at ensuring the viability of the "artistic plot" was focused on updating the epic canons.

In the epic novel Jahongir Mirzo, historical reality began with the propaganda "warning" of accelerated combat, which States that vigilance is the most important deterrent in preserving the Kingdom. In it, a certain conceptual chronicle of the era consists not only of a deep drawing of the character of the departed world, as well as Jahongir Mirzo, a full-scale soldier, loving and worthy righteous man, but also gives full information about his ability to balance the world in the family. In the article "Children of Sahibkiran" the author describes the portrait of Jahongir Mirzo: "the Eldest son of Amir Temur Jahongir Mirzo" was born in 1356, at the age of ten to fourteen years participated in the battles under the command. In General, children, both boys and girls are well aware of the secrets of military art. Jahongir Mirzo was born to Amir Temur's wife, Turmish Oka. Sometimes they write that it is Nurmish, Nurushnik Oka, or rather our Tournish Oka; after the family did not have children, we have a tradition to put such names as "turdi", "Tursun", "Tourmish" with the hope of a newborn. Turmish Oka was a favorite of one of Sahibkiran's closest teammates on Amir Joku Barlos (Muhammad Ali. Understand yourself. - Shark. 2012. – B 432). This historical truth was very useful both in the novel and in art. The data contained in the works of Nizamiddin Shami and Ali Yazdi also made an invaluable contribution.

Jahongir Mirzo by nature courageous, courageous, responsible, as Amir Temur himself expressed confidence, became famous as the successor of the Royal Affairs. He gave accurate information about this in some historical sources, including "Nasabnoma-Pedigree "Khondamir- Habib us-Siyar". Jahongir Mirzo dies of a serious illness at the age of twenty, when his wrist is full of strength, his ideas about life are sharpened to justify the trust of his father and mother. This separation greatly irritates the heart of Amir Temur. In fact, he "strongly criticized" the bride of his son "Xonzoda xanim" than her daughter. We turn to the epic novel that has turned this truth into an artistic reality to date.

Jahongir Mirzo ambled down his horse. He knew the original Khorezm and Turonian history in General. In the house of Amir Temur, they always took care of raising children and improving their military skills. Telling a story from a mosaic to a beautiful Sahibkiran, who always had smiling eyes, Amir Temur called the boy to sit and listen to the Prince, and asked various questions himself. In these conversations, schahzada increased the guile even once asked repeatedly questions about the reluctance of the Turkish ruler, the Great Turkish Emperor Istami, leaving his father surprised. He knows the fate of the khorezmshahs takash, Mamun, Muhammad Khorezmshah, Sultan Jalaliddin. But now he was taken prisoner, like a man who did not know that he was hearing for the first time about ahiyah Jabbor Bahadir ( Muhammad Ali. Jahongir Mirzo. - T. Navruz. 2019. - B. 182).

It is obvious that historical sources indicate that detailed information about Amir Temur reveals his wise children, highlights human qualities and personality qualities. Thus, the writer can understand the concept of the artistic idea that, to a certain extent, the truthful expression of parental relationships, the execution of decisions decided in their conversations, and the direction of dignity-honor. At the same time, radical changes in the life of society, along with the manifestation of conceptual faith, play an important role in determining among the military campaigns in the Kingdom of Amir Temur and the intention of children who bring up smart women.

The critic O. Golubev writes: "the Hero of the work is the main criterion of how the writer understands and explains the period he describes. In turn, the epoch itself, embodied in the image of the hero of the work, is the hero of the historical novel " (Questions of literature. 1958. No. 1. P. 84). This principle embodies in the novel-epic "Jahongir Mirzo" rare qualities embodied in the charater of the world, opens up wide opportunities for a full understanding of the environment of the time, to a certain degree of sensation.

The writer M. Ali applies the principle of "stream of consciousness" in the image also in the style of the leading method. That is, we observe the real reality in the images of Jahongir Mirzo, his relationship with the surrounding regiment, love for kindness, love for his beloved mother, beloved. Along with smoothing the image, the writer also seeks to show that historical reality has withstood the gradual improvement of Amir Temur's reforms.

In General, in the epic novel, the poetic interpretation of historical truth is fully reflected in a number of details aimed at individualizing the personality of Jahongir Mirzo. The essay, which calls for deep reflection on the past and future, reflects a comprehensive strong fortress, systematic work to create and improve the power of Amir Temur, an example for the peoples of the world under the rule of Sharia, reflected in deep philosophcal and aesthetic observations of human qualities. After all, we must not lose sight of the fact that the violent events that took place on the stage of real history are a vivid example of solidarity in the family of Sahibkiran. The literary creative credo that illuminates the landscapes of the epoch in a broad epic plan, turning a detailed historical event into an artistic reality, is characterized by complexity and versatility.
