To prove $E=mc^2$

Let's create a new formula

$NPAF=c^2Xg$ here g =gravity of any mass/planet/star
(Replace and compare) Newton Power Attraction
Force= $NPAF$

The Earth $NPAF=300000X300000X9.8=882,000,000,000$

Moon $NPAF=300000X300000X1.62=145,800,000$

$882,000,000,000 \div 145,800,000 = 6.049382716$ is 6 times
gravity more than moon.

So $E=mc^2$ is 100% correct.

Let's fix anti gravity power pointers of the soft Lander

On earth anti gravity point must create greater than 9.8 .On
moon anti gravity point must greater than 1.62

The Sun compares with the earth about gravity

The Sun's gravity is= 274 m/s^2 The Earth's gravity is=9.80

The Sun's Newton Power Attraction Force $274 \div 9.8$ The
Earth's Newton Power Attraction Force = 27.959186735 is
greater than the Earth

Let's prove $E=mc^2$

With a new formula

$NPAF=c^2Xg$ researched by Mr. Satish Gore
Sun's Newton Power=
 $c^2Xg=300000X300000X274=24,660,000,000,000$
Earth's Newton Power Attraction Force =
 $c^2Xg=300000X300000X9.80=882,000,000,000$

Now Sun's Newton Power Attraction Force \div Earth's
Newton Power Attraction Force
Power= $24,660,000,000,000 \div 882,000,000,000 = 27.95911836$
 735 is greater than the Earth
Sun's gravity $274 \div$ Earth's gravity 9.80
 $274 \div 9.8 = 27.95911836735 =$ Sun's Newton Power
Attraction Force \div Earth's Newton Power Attraction Force
= $24,660,000,000,000 \div 882,000,000,000 = 27.95911836735$
is equal

Surface Gravity of the Planets and the Sun

1.Sun 274

2.Jupiter 24.92

3.Neptune 11.15

4.Saturn 10.44

5.Earth9.80

6.Uranus 8.87

7.Venus8.87

8.Mars3.71

9.Mercury3.7

10.Moon1.62

11.Pluto0.58

Lets create another Formula –

Greater Planet gravity \div Smaller Planet gravity = Grater planet
 $NPAF=c^2Xg \div$ Smaller Planet $NPAF=c^2Xg$ Newton Power
Attraction Force= $NPAF$

$c^2=300000 \times 300000$ here c^2 is speed of light per second
KM

You can compare this with each mass in the universe. So
 $E=mc^2$ the equation of Albert Einstein is the

Universal truth and supported by new researched formula
 $NPAF=c^2Xg$ by Mr.Satish Gore Sir.India, Bansarola
