

The True Value of the PI Number and Squaring the Circle

Ilija Lakicevic

Marsla Tita 91/12, 21460 Vrbas, Serbia

Abstract: *The true value of the PI number $\pi = \sqrt{10} = 3.16227766$ has been calculated by application of the true concepts and laws of Creation published in [1 - 16] and with this PI value the well know "problem" of squaring the circle has been solved successfully.*

Keywords: PI number, squaring the circle

1. Introduction

In official science the PI number $\pi = 3.14159\dots$ is a mathematical constant defined originally as the ratio of a circle's circumference to its diameter. Meanwhile it got various equivalent definitions and appears in many formulas in all areas of mathematics and physics.

Squaring the circle is a challenge of constructing a square with the same area as of a given circle by using only a finite number of steps with compass and straightedge only. According to my information the challenge is still not solved.

Okay, I agree that with the PI number value of 3.14159... the challenge of squaring the circle is not possible to solve. But, I firmly believe that with knowledge everything is possible. Therefore, let me apply the new concepts and laws of creation published in [1-14] in order to determine the true value of the PI number with which is possible to solve the challenge of squaring the circle.

2. Literature Survey

In [2] I've given description of the process of creation as it unfolds from an idea (two-dimensional though pattern) into a desired form or idea-body. Here I'll give more detailed physical-mathematical description of the process of creation and will use it for definition and evaluation of the true value of the PI number.

2.1. Magnetic-Electric Universe

God is Light. God is Love. God's creating universe is *founded* on *Love*-and it is *creating* with *Light*.

The principle of Love is desire to give. God gives Love by extending His Light through thinking. God's Love is a mirror of light which reflects His giving of Love by the regiving of Love.

The law of Love is rhythmic balanced interchange between all giving and re-giving.

The symbol of Love is the wave of dual light which gives and re-gives equally and rhythmically. This is a dual electric wave universe of interchanging light (Figure 2.1).

Figure 2.1: Symbol of love extended from rest to motion

God's love is everywhere and His Light is everywhere. There is nothing but "good" in God's omniscient universe. Evil is a product of man's thinking. God is real and evil is an illusion.

God by thinking extends His Love, His power and His knowing, radially, from zero points of omnipresent stillness to other zero points in the measure of His desire to give form to His imaginings. The intensity of desire extended from centering points of rest to extended points of rest determines the dimension of desire (Figure 2.2)

Figure 2.2: Symbol of power extended from rest to rest

2.2 The Radial Universe

The *entire mechanical principal of Nature*, by means of which *its light illusions of motion are produced*, is the *consequent effect of such radial extensions*. Because of it, the *seeming multiplication and division of the universal equilibrium into the opposed electrical pressures of gravitation and radiation*, which form the foundation of this universe of change, are made possible (Figure 2.3).

Figure 2.3: The radial universe

God's imaginings extend from rest to rest in His **three-dimensional radial universe of length, breadth and thickness** - to become the stage of space for His imagined radial universe of matter, time, change and motion (Figure 2.4), where "matter" is simulation of light - condensed light, "time" simulation of eternity - condensed eternity, "change" is simulation of changeless and "motion" is simulations of stillness.

Figure 2.4: God's projection mirrors of action

Points of rest are further extended to other points of rest form three reflecting planes of still magnetic Light which are at right angles to each other (Figure 2.4). **From the center of these three mirror planes of zero curvature, God's givings (actions) are radially projected to six opposed mirror planes for re-projection as re-givings (reactions) to unfold and refold the forms of God's imaginings in the curved electric universe of His desiring** (Figure 2.5). **All dimensions in this curved electric universe are one dimension of desire.**

Figure 2.5: Mirror planes of reaction

2.3. The Wave Fields

The desire of God to give of His love is manifested in projected action as an outward explosion from a centering

point of rest acting as a fulcrum. The desire to re-give is simultaneously "radarred" back from every point of its progress to refold the unfolding action. Each action in Nature is forever disappearing into a **mirror** of its own image of equal electric potential (Figure 2.6).

Figure 2.6: The explosive action

Every projected action in Nature which is simultaneously "radarred" back as a reprojected reaction is sequentially repeated as a similar echo from its six wave field boundary planes of zero curvature. Remember, there is only the illusion of time, space and motion - therefore we base ALL on "sequence" of thoughts. This is the error in calculations of ones who base relative action on motion or even vibrations, for there are only sequences of thoughts (Figure 2.7).

Figure 2.7: Simultaneous reactions

All actions in Nature are outward explosions- slow actions of growing things, or fast actions of released dynamite or atom bomb. Conversely, all reactions are inward explosions. Actions unfold formlessness into form. Reactions refold form into formlessness. Actions are the basis of radiation. Reactions are the basis of gravitation (Figure 2.8).

Figure 2.8: Sequential reactions

Every action anywhere is repeated everywhere throughout the universe. As a consequence, harmonic centers of the same measure of desire extend their actions outward from their centers toward other harmonic centers.

Harmonic explosions of equal measure thus fill all space in God's omnipresent universe (Figure 2.9).

Figure 2.9: All actions in omnipresence

Outward explosions which meet each other cannot be spheres, for all space must be filled. Tennis balls crushed together become cubes by gradually flattening where they meet at six points on curved surfaces. Likewise, outer explosions flatten into the six planes of cubes (Figure 2.10).

Figure 2.10: Repeated explosions meet each other

Outward-inward explosions are resisted at their maximum in the direction of the six points where spheres meet. They are consequently deflected to the eight points of least resistance which become diagonals of cubes instead of radii of spheres (Figure 2.11).

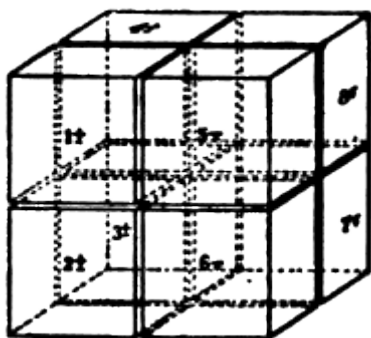

Figure 2.11: Repeated explosions compress

Eight directions of two-way expressed force are thus generated which become the basis of the octave wave (Figure 2.12).

Figure 2.12: The eight two-way directions of force

Outward-inward explosions (both expressing desire and measuring the desire) projected through each other develop two opposed pressures. The outward direction divides its potential by expanding it radially. The inward direction multiplies it by compressing it radially. Thus, the two opposite plus and minus equilibrium conditions are produced which motivate this electric universe of two-way motion, give to it its heartbeat and produce all effects of illusion caused by the interchange of the two conditions of matter.

The desire for creative expression is the only CAUSE of the outward-inward explosions which are projected through each other. The EFFECT is two opposed pressures thus created: PLUS equilibrium condition which divides by its expansion radially and MINUS equilibrium condition which multiplies by its compression radially. The INTERCHANGE between these two pressure conditions is the CAUSE of all EFFECTS of light motion.

2.4. Cube - Sphere

Pairs of interchanging opposed conditions are born from each other and become each other as a consequence of that interchange, as all opposites in Nature are likewise born. The cube and the sphere are the two opposites of form from which all forms of all things are born. They are the only forms ever created, being father-mother of all forms (Figure 2.13 and 2.14)

Figure 2.13: The cube

Figure 2.14: The sphere

The sphere and the cube both manifest the cosmic principle of balance. Their position in light waves is in the one balanced position in the wave where compression and expansion have ceased to oppose each other, which is at wave amplitude (recognized as "trough" or "crest"). Carbon and sodium chloride are good examples of true cube crystallization. Likewise, their atomic units are true spheres. Sodium-iodide or sodium-bromide do not crystallize in true cube because of their unbalanced positions near, but not upon, the plane of wave amplitude.

The cube and sphere are one, being the opposite phases of the same thing . The cube is the sphere extended to black coldness while the sphere is the cube contracted to white incandescence. Every true sphere in every light wave is an incandescent sun, regardless of its dimension. Prolating spheres, such as our sun, are becoming incandescent inward toward their centers, while oblatting spheres, such as our planets, are becoming cold inward toward their centers.

The cube is born from the sphere to fulfill the desire of the Creator to produce form by projecting light from incandescence toward the cold dark of the heavens - father-light of incandescent spheres. Conversely, the sphere is born from the cube to fulfill the other desire for oneness by reprojecting cold dark from the heavens to light in the seed - mother-light of cold cubes.

The creation of all forms of matter is an eternal interchange between the father-light of incandescent spheres and the mother-light of cold cubes. All forms are born in the direction of the coldness of space and are voided in the direction of incandescence. Every creating body is sent out into space from its crucible in the sun to cool into the form appropriate to its extension from the sun - from its idea. That is one half of the cyclic journey of every body from the sun and back to it. The other half of the cycle is the return to the sun to void the body of its form for the purpose of acquiring a new body. Every cycle of motion is a journey from heat to cold and back again.

First half of the journey is from sun into space to cool into the form. Second half of the journey is return back to the sun to heat (melt) in order to void the form into formless and acquiring a new body. Every cycle begins as expansion of the incandescent sphere into the cube of cold space and ends up as compression of the cold cube back into the hot sphere. That is why the cycle: heat – cold – heat - ...

All bodies are formed by freezing and voided by melting. The freezing and melting points of all bodies are dependent

upon their respective densities and electric conditioning.

The sphere is the clay of earths, the light of suns and the formlessness of seed – the sphere is the source of everything! It is the womb from which the clay of earth extends into the cube-bounded heavens to expand into form, and it is the tomb within which all form is voided for regiving to the heavens as a new form.

Every form in Nature is either becoming a cube or a sphere, or is a section of either one. Complex bodies are multiples of spheres of matter surrounded by multiples of cubes of space in multiples of wave fields. All crystal shapes are sections of cubes. Their shapes are determined by their positions in their wave field (Figure 2.15).

Figure 2.15: All crystals are cube sections

The cubes of space are wave fields which bound all interchanging motion between the two conditions within it. Motion cannot pass through these planes but can be reflected symmetrically back or extended symmetrically – in reverse - toward the center of the adjoining wave field.

Within each cube field is the curved universe of two-way light illusion; and beyond, to the farthest reaches of space, is a repetition of illusion from wave field to wave field at the rate of 186,400 miles per second. That is the speed in which every action-reaction anywhere repeats itself everywhere. This illusion of motion gives rise to the belief that light "travels".

Wave field boundary planes of zero curvature insulate all effects of motions, which take place within it, from every other wave field. Centering the wave field is the incandescent sphere which mates it. The electric potential, EP, of the entire field is divided equally between the centering sphere of multiplied matter – plus EP - and the surrounding space of divided matter – minus EP.

*Each mate of each wave field in the universe is balanced with its opposite mate, even to the weight of one electron. The reason why the centering sphere is of **high potential** and its surrounding space is of **low potential** is due to a difference of volume. The centering sphere may be a few thousand miles in diameter and its surrounding space many millions of miles in diameter; yet they are equal, potential for potential, but unequal volume for volume.*

Neither of these mates could sustain its separateness of condition unless it constantly interchanged to give all of itself to the other alternately in repetitive cycles. Spheres must give to cubes of space by breathing out to discharge themselves and charge space. Space must then regive to spheres by breathing out from itself to discharge itself and recharge spheres.

Each short cycle of interchange is accumulated into a longer life-death cycle in which solids entirely disappear into space and space interchanges its potential to become solids. This principle constitutes the forever inside out-outside in turnings of Nature by means of which all forms sequentially appear, disappear and reappear.

The inbreathing of spheres generates low potential into high. The generative process of Nature is gravitation. The outbreathing of spheres radiates high potential into low. The degenerative process of Nature is radiation.

Multiplication and division of expressed energy into the high and low potential of gravitation and radiation is made possible by the plan of Nature which causes all actions of Nature to extend radially from omnipresent points of magnetic Light.

Gravitation pulls spirally inward from within to wind light waves into solids to center space. Radiation thrusts spirally outward to unwind dense solids into space to surround solids. Each are equal reactions of the other. Each becomes the other sequentially (Figure 2.16).

Figure 2.16: The Mystery of Gravitation and Radiation- Pull of gravitation and thrust of radiation

Gravitation is the positive electric principle which exerts its pressures centripetally toward the maximum incandescent points of compression in every wave field. It is the father principle of Nature, the integrating principle of "uphill flow of expressed energy" which forever balances its "downhill flow".

Radiation is the negative electric principle which exerts its pressures centrifugally toward its wave field boundary planes of magnetic Light. It is the mother principle of Nature, the disintegrating principle of "downhill flow of expressed energy" which forever balances its "uphill flow". The Creator extends power of motion to but one half of a cycle for each of the two opposite manifestations of His desire. Gravity gives a material form to bodies to manifest the idea of bodies. Radioactivity gives spiritual formlessness to the heavens for regiving to earths as formed bodies.

Gravity begins its half cycle as the inward explosive reaction of an outward explosive action, thus fulfilling the law that all opposite expressions are born from each other and interchange to become the other. It ends its half cycle at

a point of rest at the still point of magnetic light which centers every material body whether of microcosmic or macrocosmic dimension. Gravity then ceases when its motion ceases.

There is no "center of gravity" in Nature. The centering Light of every mass is still magnetic Light. Likewise, the still axis of every vortex is still magnetic Light.

Radiativity then begins its half cycle from that point of rest and ends it on wave field boundary planes of magnetic Light where gravity began. Radiativity then ceases when its motion ceases.

Both gravity and radiativity borrow their power to find balance in rest at their journey's end from the points of their beginnings. They each repay their separate borrowings to the other at every point of their respective journeys. Each thus perpetually voids itself by giving to the other. At each journey's end each opposite cancels itself out by giving its all to the other. It is then reborn as the other. Everywhere in Nature each action is its own reaction.

2.5. God creates one shape: Cube-Spheres

In the electrically-divided universe, there is but one divided form of one divided body - and that one form is the cube-sphere. The sphere is the visible compressed half of the one polarized body. The cube is the invisible other expanded half which divides and insulates hot spheres by the static zeros of cold space. Be they grant nebulas and clusters of galaxies, or tiny, microscopic atom-size ones, they are identical except for size.

This one body form is in the making and the unmaking everywhere in the universe. When the visible sphere is completed in its making into a true sphere, its invisible other half is then a true cube. Together the cube-sphere is the basic one form of all bodies. Our own body is composed entirely of cube-spheres in the making, or unmaking, and so is the body of the violet, rose, insect, elephant, bird, automobile or ocean liner. The complexity of Nature's countless thousands of forms disappears in the countless thought-rings combined into simplicity of cube-spheres, of which all forms of animal, vegetable and mineral life are composed.

It may be difficult for us to think of our body in terms of cube-spheres when we are so accustomed to thinking of our body as we see it in the mirror. In it we see a body with legs, arms, head, hands and feet. It is even difficult for us to think of our body as composed of atoms. If, however, we earnestly desire to know what happens to the pattern of our body structure and to the countless thoughts which we have conceived *during the only kind of life we know*, and expressed in the *only kind of body we know*, we will give much thought to the cube-sphere wave-field which is the basic form of God's Creation. All other forms are becoming true cube-divided spheres-or departing from them in decay. Never forget that all bodies, human and otherwise, are composed of the elements of matter, and all of them which are balanced mates crystalize in true cubes. Unbalanced ones crystalize in distorted or complexed ones.

In this knowledge of the inter-relationship of the cube-sphere lies the answer to thought-transmission between living people and those whose bodies have passed beyond our range of sensing. This much-hoped-for possibility will come within the range of our comprehension, and possibly within our powers of practice, when we KNOW that thought-bodies are the basis of the material bodies with which we are familiar.

The sphere is the result of the concentrative pulsation of God's thinking which concentrates by compressing inward from without to focus the light of God's thinking to a point of stillness around which a thought-body can be formed. This causes that universal effect which we know as generation, and the still point of concentration is a center of gravity. **GENERATION MULTIPLIES POWER.**

The cube is the result of the decentrative pulsation of God's thinking which thrusts outward from within to the stillness of the cube boundaries to produce the opposite effect which we know as "radiation". **RADIATION DIVIDES POWER.**

Generation and radiation are the opposite ends of the piston which motivates the heartbeat of this eternally living dual body of God, which is our dual body. Its continual giving and regiving manifests the love principle in both the action *and reaction - not just in one of them.*

Their continual interchange in spiral lanes of opposed directions gives us the incandescent light of hot spheres by the friction of resistance to the inter-passings of both in such close quarters as the vortical centers of cube-spheres. Conversely, the release of that resistance in the widening lanes of the outer spiral direction gives us the cold and dark of the cube half of the wave-field which encloses every divided body in the universe. Always vision the zero universe as God's end of the universal piston and the moving electric universe as man's end of it.

No matter where we look out into Nature, whether it be the bark, wood or leaf of a tree - or speck of dust on that butterfly's wing - the grass in the meadow or the deer eating the grass - or our own body of many forms and substances, from the hair on our head to the nails on the ends of our fingers and toes - all of them are com-posed of cube-spheres which are either completed or on their way to, or from, the balance point of their maturity at the amplitude reversal point of their octave waves. In other words, the dual body of the cube-sphere is growing to its maturity to express life, just as our body is growing to its maturity to express life-as all bodies in all the universe are doing.

After they have matured to the maximum of their generative power at their octave wave amplitudes, they begin to return to their spatial body from which they emerged - as our body, likewise, does. **Remember, however, that Earth and space express "death" to give "life" to the compressed half of our body. We then give "life" back to the expanded half of our body by giving it our "death". But why think of them as life and death? Why not think of them as the two expressions of life which are manifest in all things - ACTION and REST from action? Learn to think of life**

and death that way - as an interchanging continuity instead of as the beginning and end. Think that way concerning all bodies and all actions of all bodies which perpetually GIVE and are being RE-GIVEN. Think of the manifestation of the love principle in all actions of all bodies.

If we even throw a ball into the air to manifest life by charging space, we are also manifesting death by discharging Earth in exactly the measure of potential which Earth extended from it. Conversely, the ball regives "life" to Earth and "death" to space by the interchange of one body condition with the other when the ball falls back to Earth. We do exactly the same thing when the inner half of our body breathes out to the outer half. We give "life" to the invisible half of our body by extending "death" from the visible half.

Realize always, that all bodies in all Creation are the recordings of God's concentrative-decentrative thinking. Both pulsations of God's thinking are creative-not just one pulsation. Both are constructive. One compresses from the outside inward towards its center to create visible bodies and the other expands from the inside outward to render them invisible. Both express life - life interchanging with life. There is no "death" nor destruction in either pulsation of God's continuous thinking. It **seems** to change but the change is a continuity. Diverging rays which leave the sun discharge the sun, but when those same rays converge toward Earth, they charge Earth with life. Negative discharge from any body becomes positive charge to every other body. Life flows continually. There is no death.

2.6. A supreme discovery

It might help us to comprehend what is now coming by asking if we have ever considered why it is that all of those millions of stars out in space do not crash into each other and wreck each other, accidentally or otherwise?

The answer to that question is that all wave-fields which bound and enclose each body-pair in the universe - human and otherwise - are insulated from each other by the invisible planes of zero curvature, such as the six flat planes which enclose a cube beyond which light cannot pass without reversing its direction which is the reaction to the action.

Reversal of direction from inward to outward, and from red to blue and from generation to radiation, is the insulator which keeps all wave-fields in the universe in balance with each other and insures their centering suns from colliding with other suns, and adjusts the changing orbits of all centering bodies to balance always with each other's continually changing orbits.

Let us now consider our own dual-body in this same light. Our own body is composed of countless billions of little wave-fields which bound each corpuscle of dense matter and its surrounding spatial counterpart. What is there to prevent these spheres and spheroids of our body from colliding with each other? The answer is the same for our microscopic wave-fields as it is for the mightiest stars in the heavens.

If I look into the seed of a flower, I cannot find the flower or any part of it. Even with the finest microscope, I cannot see any indication of leaf or color or stem which will assemble itself around and extend from that seed. Nothing material is in that seed. It belongs to the zero universe of Mind-desire. Centering it is that point of desire of Mind to manifest the idea of a rose or violet. Around that centering Soul are invisible states of motion known to chemists as "the inert gases".

The entirety of this balanced universe is thus divided into unbalanced pairs of father/mother sex-conditioned sex mates for the purpose of seemingly dividing universal Oneness into a universe of many ones. No matter what names we use to designate one pair of sex mates from another, whether gravity and radioactivity, male and female, positive or negative, charge and discharge, centripetal and centrifugal, generative and radiative, integrative and disintegrative, plus and minus, heat and cold, life and death, buyer and seller, producer and consumer, import and export, emptying and filling, inward and outward, north and south, heaven and earth, growth and decay- all of them are similarly conditioned by the two opposite electrical conditioners.

In other words, all these things above are being either compressed or expanded, if we use "pressure" terms, or charged and discharged if we use "electrical" terms. Both are the same. Likewise, all that are being compressed or charged by positive electricity are simultaneously being expanded and discharged by negative electricity to a lesser extent. Likewise, all that are being expanded by negative electricity are simultaneously being compressed and charged by positive electricity to a lesser extent. This is a two-way universe in all effects of motion, and both opposite effects are expressed in both mates simultaneously as well as sequentially.

Electricity is forever winding light up into hot spheres, surrounded by cold cube wave fields of space, and likewise sequentially unwinding them for rewinding. While winding them into compressed light masses, they are simultaneously unwinding to a lesser extent. Conversely, while unwinding they are simultaneously rewinding to a lesser extent. Every opposite of a pair charges in excess of its discharge for one half of its cycle. It then discharges in excess of its charging. Life and death are good examples. Life charges a body in excess of its discharge for one half of its cycle and death discharges it in excess for the other half. Likewise, the sun charges the earth during half of its twenty-four hour cycle in excess of its charge on the night side of the planet. The night side sequentially becomes the day side. The discharge of night then reverses to a preponderance of charge. The father/mother principle is fundamental in every expression and both are simultaneously manifested in every expression, each being preponderant sequentially during half of each cycle. The father principle multiplies light into density and high potential. The mother principle divides it into vapors and gases of lower potential. Light is thus multiplied and divided into suns and planets surrounded by "space". The "matter" of earth is the same as the matter of heaven with but one difference, VOLUME. And therein lies the secret of the universal pulse beat. Space is a division of solidify into tenuity. It is also a multiplication of volume at the expense

of potential. Interchange between these two unbalanced opposites is the basis of all motion in this rhythmic universe.

Sex mates are two equal halves of one. They never can be one. They can never unite for they are the opposites of motion. Opposites of motion can cease to be and by thus ceasing to be they can give birth to the other opposite, but they never can be other than opposite. This is why if you have a male and a female-as in homosexual-no matter what they do to change appearance, etc., they will never be in proper placement to serve as sex-mates for sex mates are TWO EQUAL HALVES OF ONE AND NEVER CAN BE ONE. It is like having only half a wheel and therefore can go nowhere only forward to the break and backwards to the break thereby becoming stagnant and nonproductive. Does this mean that the love flow between the male to male is invalid? No, for the love energy is not incomplete-only the physical expression which, at best, is not LOVE at any rate-only some manner of physical expression of whatever is agreed upon by the two or more experiencing energies.

3. Approach and Results

Quantum physics has proven that the Universe is a hologram, i.e. that every part of the Universe is equal to the whole Universe in a sense that every part of a whole contains all the information possessed by the whole. In other words, if we try to take apart something constructed holographically, we will not get the pieces of which it is made, but we will only get smaller wholes. So, my body, as a holographic part of the Universe, contains all the information of the whole Universe. My body is simply a smaller Universe!

We know that God, who is ALL THERE IS, has made man in the image of Himself, and therefore I am a holographic part of God that is equal to God, in accordance with the holographic principle. After all, what is the image of infinity other than infinity itself, what is image of eternity other than eternity itself! It follows that every human being is God, also, and stands as a holographic part of God which is equal to God. Those who enjoy mathematics can divide infinity (eternity) with seven billion, or with any finite number, and the results will be infinity (eternity). Every part of infinity and eternity is infinite and eternal. Logically, God created the Universe and human beings holographically so that every human being, as a holographic part of God, is equal to God!

3.1. The true meaning and the true value of the PI number

All matter vibrates, and thus has a frequency (rate of vibration) associated with it. **The physical is a reflection (and a subset) of the non-physical universes. The non-physical universes are also made up of energies which vibrate and pulse.** These are clues for understanding the *true* Source and Nature of Energy, Thought, and Soul Essence.

Temperature, atmospheric content and other things must be considered as are "doorways" created from passage between the physical and non-physical. It is mathematical and

physical-not mystical. Because existence is interplay between non-physical cause and physical effect, it is obvious that some relation must be connecting them which can be quantified by a number which is a doorway between the physical and non-physical. That value must have a property which is quite unique in itself. It must have a reciprocal which is a mirror image of itself.

Both matter and motion are an illusion which is caused by the division of ONE into PARTS. Since ONE is infinite and eternal the PARTS must contain everything that ONE contains and that is the essence of the holographic principle. Each action borrows its own reaction so that every particle of matter is a mirror which reflects its reverse image into another matter – a perfect holograph in every fragment.

The existence can be expressed numerological as 10 where 1 stands for the beginning and 0 stands for the potential for anything. In according to the holographic principle, PARTS contain everything that ONE contains, and having in mind requirements for the PI number, division by the PI value must give the same result:

$$10/\pi = \pi; \pi = \sqrt{10} = 3.16227766$$

If we divide one by this number we get: 0.316227766 – a mirror image of itself or a doorway between the physical and non-physical.

3.2 Squaring the circle

I have used only compass and straightedge!

Generally I'll use notation AB equal to the length between points A and B.

Figure 3.1: The geometric illustration of squaring the circle

First let's take a point O and length OB = 3 arbitrary units and then construct the normal straight line (at angle of 90 degrees) at point O relative to the straight line containing points O and B (that is well known and one needs for it only compass and straightedge). Then using compass, let's find the point A on that straight line so that OA = 1 and the length AB will be:

$$AB = \sqrt{1^2 + 3^2} = \sqrt{10} = \pi \quad \dots (1)$$

Let's say that r is a given half diameter of a circle and let's draw the circle with the center in A and with the half diameter AC = r. The surface of this circle is equal to πr^2 .

Let's now construct $\sqrt{\pi}$. On the straight line through the points A and B first let's find point D so that AD = 1 and find the center point E of the length DB, DE = EB, and draw the circle with the center in E and half diameter DE = EB. Let's now construct the straight line in the point A which is normal to the straight line through the points D and B. The intersecting point F of this straight line with this circle defines the length AF = $\sqrt{\pi}$, because:

$$(\pi + 1)^2 = DF^2 + BF^2 \quad \dots (2)$$

$$\pi^2 + AF^2 = BF^2 \quad \dots (3)$$

$$1^2 + AF^2 = DF^2 \quad \dots (4)$$

From (2), (3) and (4) it follows that AF = $\sqrt{\pi}$.

Now let's find the point G on the straight line through the points D and B so that AG = 1 and draw the straight line through the points G and F. Using compass and lengths FG and GC one can now construct line through the point C parallel to FG and denote with I its intersection with the line through the points A and F. Triangles AGF and ACI are similar so that the following relation is true:

$$\frac{\sqrt{\pi}}{1} = \frac{AI}{r}, \text{ or } AI^2 = \pi r^2 \quad \dots (5)$$

From equation (5) it is obvious that the length AI is the side of the square with the surface equal to the surface of the circle with the given half diameter r.

Let's now find point J so that AJ = JI and draw in the point J the straight line normal to the straight line through the points A and F, and find on that straight line points K and L so that AJ = JI = JK = JL. Obviously that AI = KL.

Now there are many ways to finish construction of the desired square and one of them is the following:

Let's draw a normal line in the point L to the line through the points K and L and determine on it the point M so that LM = LK.

Similar to it, let's draw a normal line in the point K to the line through the points K and L and determine on it the point N so that KN = KL.

Obviously that the surface of the square KLMN is equal to AI^2 and that, according to the equation (4), it is equal to the surface πr^2 of the circle with the given half diameter r.

4. Discussion

Everything is possible with knowledge. The definition and the evaluation of the true value of the PI number is a wonderful example how application of the true concepts and the true laws of creation can resolve every challenge. Everyone who wants integrate the divine energies into own creations and create immortally should use the true value of

the PI number which is $\sqrt{10}$.

5. Conclusions

The true meaning of the PI number is a doorway from physical to non-physical and its true value is $\pi = \sqrt{10} = 3.1622776..$

With this true value of the PI number it is possible to solve the "problem" of squaring the circle.

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia). 1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: “Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas”. 1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jülich (Germany). 1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load. 1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree. 2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover and learn the God’s principles and laws of creation. After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God’s creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet. I am a pioneer, creating with a New Conscious Energy and building a new civilization without electricity. I’ve developed the QUANTUM RADIATION BALANCER – the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation. Thanks to the consistent pursuit of my Leitmotif “The Authority of Truth rather than the Truth of Authority” I have experimentally proved the true atom, cell and particle “ATON” concept. According to the “ATON” concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of the science that is based on the knowledge of the cause. I wrote the book “GOD IN THE ATOM” which is available on my website: <http://www.teslastyle101.com>
