

# Corona Virus Boon for Nature?

Gunjan Gupta

**Abstract:** *Corona virus is Pandemic for all the human beings, but it is proving to be boon for nature. Due to COVID 19 we are the only ones suffering from critical situations, but they are boon for wild life. From another point of view, new messages have been received for human beings. It looks like only and only we human are suffering from many problems due to covid 19 but for nature (specially natural) God and Goddesses have land on the earth for them. It is not that there is happiness due to spread of corona virus, no person should have any diseases & all of them should be live happy and healthy life. There is a principle of life. "live happy and let everyone live happy life". It is a temporary lockdown and may be in few months everything will become normal. Today or tomorrow this chapter of COVID 19 shall get over.*

**Keywords:** Corona, Boon, Lockdown, Emission, Monitoring, Nature, COVID 19

## 1. Introduction

A new Chinese coronavirus, a cousin of the SARS virus, has infected hundreds since outbreak began in Wuhan China, in December. Scientist Leo Poon, who first decoded the virus, thinks it likely started in an animal and spread to humans. (CNN REORT 18 February 2020). Coronaviruses are a group of related viruses that cause diseases in mammals and birds. In humans, coronaviruses cause respiratory tract infection that can range from mild to lethal. Coronaviruses belong to the kingdom *Riboviria*, phylum *incertae sedis*, order *Nidovirales*, family *coronaviridae* subfamily *Orthocoronavirinae*, genus— *Alphacoronavirus* *Beta coronavirus*, *Gamma coronavirus* and *Deltacoronavirus* and species is coronavirus. They are enveloped virus with a positive-sense single-strand single RNA genome and a nucleocapsids of helical symmetry. (Wikipedia, the free encyclopaedia)

### 1.1 How it is boon for nature, lets discuss some important points:-

- As the corona virus started spreading, the slaughter market got most affected and incurred huge losses but on the other hand environmental pollution is decreasing. Decline in the

non veg market means decreases in the emission of harmful Green House Gases. Because animals raised for food produce toxic gasses such as ammonia and methane along with their excrement.

- The Corona virus has caused a huge decline in NO<sub>2</sub> as the factories transport vehicles and industries are closed so the CO<sub>2</sub> emission is not happening.
- Post the fallout of corona virus a new law has been imposed in China, according to which the meat of dogs and cat is banned. There will be ban on wild life trade in Vietnam.
- There has been decrease in rape cases due to corona virus. According to 2018 India today report, a woman is raped in every 15 minutes on the land of Shri RAM, but it has stopped now. It has also led to a drop in the crime rate.
- New York is a hub of automobiles, there is a rampant decrease in CO<sub>2</sub> emission and this time monitoring team is claiming that this is the cleanest and we have ever seen it. It is half of less than we normally see during March.
- Air pollution quality index has been improving since last few days. Because people are not getting out of the house and not using vehicles.

Before Lockdown

After Lockdown

- The sky is clearing by and by, the Rivers are getting clear and clean water has started flowing in the VENICE CITY of Italy.

Venice City Before

Venice City After

- The arrival of Nilgai (Blue Bulls) on the street of Noida (U.P), The arrival of Dolphin on the marine drive of Mumbai because the Dolphin surfaces in fresh water.

Blue Bull (Noida U.P)

Dolphin (Mumbai)

- Pure air is blowing in the sky instead of contaminated air and birds are chirping.
- GANGA and YAMUNA water is becoming fresh due to shutdown of industries.

Before lockdown Yamuna river

After lockdown Yamuna river

“The air is purifying, the water is purifying,  
It seems as nature has started, a cleanliness derives”

## 2. Conclusion

We should not be happy in such an environment but above facts cannot be ignored. Since childhood we are taught that human beings are most sensible of all beings but after this lockdown it looks like we humans are true enemies of this natural wild life & nature. Humans are best creation of mother earth but we can see humans are worst creation of mother earth. Today nature is showing us mirror. This earth gave us place to live and offered all comforts for survival but what we have done?

Many people will feel bad but it is saying that mules believe in kicks do not pay heed on words. It is not that nature has not warned us, they warned us many times like tsunami, earthquake, climate change, the increase of temperature every year. It was all a warning not to disturb Mother Earth but we turned deaf ear. This a final warning to whole environment & alert message by the nature to us. Any way we people will survive but what will happen to our next generation. Think of the future, think of the coming generation and think about other beings. We need to learn a lesson today if we do not give up our selfishness, then nature will bring new *RUDRAVATAR* again.

## 3. Recommendation and Suggestion

Due to exploitation of nature, all those reasons should be made and we all should bring some changes together. Otherwise the future is in danger.

**The sun is still rising in its time,  
The moon is also knocking.  
The wind is also blowing,  
The sea is also still flowing in its dignity.  
The nature is not cheating,  
So why we are cheating on nature?**

A big lesson from the COVID 19 is that we humans think that the world is moving because of humans, but now humans have been imprisoned & the nature world is moving.

## 4. Declaration

I, undersigned hereby declare that the article entitled "CORONAVIRUS BOON FOR NATURE?" India was written and submitted by me, is my original work/Thought and I have not copied it from any report or book while preparing the article.

## 5. Acknowledgments

I am grateful to www.google.in site for images and news channels for granting permission to carry out this information. It is my great pleasure to thank my husband (Pranjal Gupta) for his able guidance, expertise and useful suggestions which helped me in completing this work successfully and my families. Thanks, are also to media and all news reporters.
