

Birth of the Planetary Being

Ilija Lakicevic

MarslaTita 91/12, 21460 Vrbas, Serbia

Abstract: *We human beings are consciousness – awareness of ourselves and of all our experiences, we are embodied Spirit, we are bridge between Spirit and Matter, between Creator and Creation, between Life and forms through which Life flows. We have started to embody on this beautiful planet millions years ago with the only reason to resolve the energy impasse – relation between consciousness and energy and we have succeeded in our massion (mission + passion): energy responds to consciousness, all energy is ours to serve us if we allow it. All interferers from other angelic families, including the Order of the Arc are removed so that we alone can guide ourselves together with the planet Earth into higher dimensions. What we've done here will have huge impact on the whole Cosmos. On our planet from September 18th, 2007 is present new energy with awareness which fulfills every our desire if we choose so and allow it. We are nearing to the point in time when center of Spirit will merge with the center of the Earth when collectivity of human consciousness will awaken to a unified field identity and then we will get Creator's final definition in form – we will be born as Planetary Beings, actually “who we are”.*

Keywords: human being, consciousness, planetary being, new energy

1. Introduction

There is discovery in quantum physics that consciousness creates everything without real understanding both what is consciousness and relation between consciousness and energy, not to mention that question *why we are incarnating here* is fully misunderstood.

Let me begin with the great Serbian poet and philosopher Njegoš, actually prophet, who wrote almost two centuries ago:

„Blessed is the one who lives forever,
He had the good reason to be born,
The fairies will compete for ages,
To make him worthy wreaths!
O wicked Serbism extinguished,
I have outlived all your evils,
So I have to fight the worst!”

I can easily extend his prophecy to the whole humanity by replacing word Serbism with the word Humanness. The worst we have to fight are domestic traitors – satanic servants! That is what is happening right now across the planet in these last times of God's fight against Satan. War is not from God, but defense of life is blessed and allowed by all means because life is the most precious gift from Father God Aton Creator. This fight is won with the WORD of TRUTH [1-18]!

1) In the Beginning

In the beginning God, the Father. The Father is Light, the still Light of the Spirit whom no Man can see. The dwelling place of the Father is the Kingdom of Heaven, and it is without form and void.

In the Light is the seed of Creation, and the Light is Father of the seed. In the Light is being, and in the seed is desire for being. And desire in the seed is soul in the seed. The Father in Heaven knows His Idea. He knows it as ONE, the undivided ONE. In the Father Light is the seed of all-knowing. In HIM is two-fold desire to unfold and refold His

seed of all-knowing into imaged forms of His imagining, by dividing wholeness into parts, stillness into motion, unchanging into changing, unconditioned into conditioned, void into form, infinity into measure, eternity into time, and immortality into mortality.

The Creator ("God", as recognized in language by most of us) is **ALL there IS**. God is ALL that EXISTS.

God, recognized as THE CREATOR, is THE One Being, the One Person, the One Mind, the One Thinker, the One SELF, the ONE LIFE, the ONE SOUL of which we are a holographic part, the ONE POWER - THE ONE REALITY.

God's **CREATION** is the **imagined** and patterned form of GOD'S own imagining, structured in HIS image. It IS the body of God, THE RECORDINGS OF HIS THINKING, created BY Him for expressing the ONENESS OF LIFE, LOVE, MIND - AND SOUL! IT ALSO EXPRESSES THE "POWER", ALL BEING WHICH IS IN HIM ALONE.

In the beginning God asked Himself “WHO AM I?”, and then took the first outbreath, created all of us instantly and said: “Go forth and choose whoever you want to be. I am you and I don't judge you. I love you only”.

In response to God's first outbreath, according to the universal law of action and reaction came first inbreath which manifested instantly all the potentials and Creation has been manifested in perfection as reflection of God's good, perfect thoughts. So, we have been instantly created as points of desire aware of self, unified, integrated and aware of our own oneness with Creator, the All That Is, the Source.

Then God took the second outbreath which is nearing to the end, after which will come the second in breath and the whole universe with start compression phase.

2) We have succeeded in our massion on Earth

Long before material universe and planet Earth have been created, 144, 000 angelic families have gathered to decide what to do because the energy all seemed to kind of come to a standstill, like it just wasn't expanding, moving. It was

Volume 9 Issue 4, April 2020

getting real like tar-like and sticky, and there was a concern that it would eventually just stop, and if it stopped, everything would collapse. Which, by the way it wouldn't have, but there was a concern back then that it would.

They have created the Order of the Arc, also known by some of us as the archangels, but they're not a bunch of winged angels sitting around as some religions refer to. It was more like archetypal energies, or bridge to resolution, more like the United Nations of the Cosmos.

It's all about understanding the *relationship between energy and consciousness*. That's what it's all about, to say, "What the big reason? Why are we here?" It's not to suffer for our sins, not to repent for Adam or Eve or her eating the apple, none of that. It was all about "*Let's discover the relationship between energy and consciousness,*" because the two are so connected, but yet they don't carry the component of each other. Our consciousness and our energy are connected but not literally. Two separate components, but they always work with each other.

So ultimately, over a long period of time, many angelic beings came to this planet and took on lifetime after lifetime, many incarnations, to come to the understanding of energy and consciousness.

So here we are now in the year 2020 and there are enough humans on the planet who are developing an understanding of energy and consciousness, the fact that the energy is ours. Consciousness doesn't have any energy, but that energy that allows us to experience life is ours. What we have done here will have huge impact on the whole Cosmos.

So, there are enough humans that understand that, that the Order of the Arc, this portal is now being disbanded, being taken down, doesn't need it anymore. New ones will still come to the Earth, but they'll come in a different ways. The Order of the Arc, their job is done and there's enough momentum, there's enough understanding of energy and consciousness that their work is now done.

That's really only occurred very, very recently, but it has a huge impact on all of us because it's basically saying *the work that we've been doing is proving to be successful*. The work that we're doing with our own consciousness is having a big impact.

Then there's another important aspect of this. Over eons of time in the history of the planet there have been those of us and others who have come to this planet, taken on physical body. They've joined the community. They've become part of humanity. But there have been a lot of other forces that have been constantly interfering with the planet. I do not have any love or even any like for any of these forces. They're, what we would call, alien beings. They're not necessarily human-looking. They don't even necessarily have physical body, but they have been interfering on a variety of different levels on the planet.

What's happening right now with the closing of the Order of the Arc is that all these external forces that have been playing games on the planet, with the planet, with humanity,

are being called back to their angelic families. They're being summoned, almost demanded back.

So imagine for a moment. We've got this planet, angelic beings come down here, take on the human condition, struggle a lot with it, we get lost in it and then ultimately, we emerge. But in the same time, we have levels and layers of interference from, we could say, other realms, other parts of the universe, but also other realms, not earthly realms. They interfere for their own, I would say, greedy sake. They're not here to help the planet. They really weren't.

I'll make a very clear statement: *There were no outside forces that are here to help the planet*, other than perhaps our own angelic families, but they don't interfere. There are no alien beings. There are no galactic commands. They are all being called back home.

There's an old saying that's now coming into reality, and the old saying is "When the dragon comes upon Earth, then the trumpet will sound for the return back home."

Basically, what that means is the dragon, which is there to make sure all of our issues are brought out and released. That's the purpose of the dragon. Dragon literally means clarity. Some view it as a fire-breathing monster, but it's there to make sure that we or others or even the planet are not dragging around a lot of old, old karma and issues. But the saying says that "When the dragon comes forth" – which is now – "the sound, the call will go out to return home for all who are not in human form, who are not on the planet."

This is pretty huge and it overshadows anything about coronavirus. It really overshadows anything right now, even kind of about technology, at least for a little bit, and it's going to be happening over the next six months. Imagine for a moment: when it was time to come to Earth, when all the angelic families gathered in the Order of the Arc and they said, "We need some volunteers to come here," and it was really, what we would call, the leaders of the angelic family that first came – we – and it was said that Gabriel sounded the trumpet or the horn or whatever he played at the time, and that was the call to come to Earth. Well, now there's another call coming out from the angelic families for all who are interfering with Earth to come back.

It's going to cause a very interesting shift on the planet. There's been a lot of interference from the other realms, and basically what they're trying to do is just suck energy. To put it real simple, they're just interfering for the sake of sucking energy. They're not any more advanced than the humans. Most of these sources of interference do not have any understanding or experience with this wonderful little thing we have on Earth called love. They think love is an energy source and they're trying to feed off of it, but they have no understanding or experience with it. It's not an energy source. It's an experience.

There are a lot of beings in the other realms who just like interfering with the planet. And, again, I repeat, in all of creation there are no beings greater than the human being. The humans look at themselves sometimes as being at the low end of the totem pole, kind of weak and misguided

beings, and think there are some great beings out there somewhere else. There's not. There is not. There are some relatively intelligent life forms, but they have no heart. They have no heart.

They're being called back home now. They're being called by their angelic families, by their origins, "It's time to come back. No more interference on the planet right now."

It has implications not only for what I would call the invisible forces that have interfered. We know, there have been, we call them God fights on the planet. It's these god-like beings, but they're not really. They call themselves gods and they use the planet for their own wars between each other. These are not physical beings, but they use the planet. They manipulate the planet. They've been doing it for eons of time. They're being called back.

So, feel into it for a moment here, the effect that it's going to have on Earth in these next six months as these forces, these alien forces – nonhuman, never been in a human body before – are called back.

3) Consciousness

In the world of comprehension much is understood in science. Gravity, forces and anti-forces are reasonably well understood, but what about the unconscious and the conscious forces of living beings. These are not understood. To understand how a man can suddenly receive the strength to do the work of ten man is not understood.

This is where the power of WILL comes into picture. The power of WILL is like the mountain that is yet to rise and when the mountain decides to rise, it uses the power of it's WILL and suddenly there it is. A little child manifests until it becomes an adult. But there is much more that can be manifested. One can manifest a tree, an insect, a ruby cone. But ONE CAN MANIFEST ENERGY MACHINE, AS WELL.

Then one pictures the energy. One does not picture the machine. One pictures the energy moving in the machine and then the housing will be supplied.

Protons and photons are the two natures of energy. *The principle force in our section of Universe is CONSCIOUSNESS!*

Now consciousness can delegate and relegate. When consciousness delegates, it says to energy "GO there" but it assists the object by taking it there. **CREATIVE CONSCIOUSNESS BRINGS MATTER OUT OF THE ETHERS AND GIVES IT FORM!**

Consciousness is the ability to perform. The source of consciousness is The Creator, the I AM, the Divine Light, the Divine Sun.

The creator of consciousness is the **WILL**.

It is the **WILL** of God that creates consciousness. Therefore, when I begin the study of consciousness, I begin the study of **WILL**.

THE WILL OF "I AM" IS CREATING CONSCIOUSNESS, SO I AM CONSCIOUSNESS, I AM MY OWN CREATOR!

THE WILL IS DESIRE TO PUT INTO ACTION (TO EXPRESS). WILL IS THE VERY ESSENCE OF THE POSITIVE PRINCIPLE (THE "SEMINAL" QUALITY OF THE LIGHT ITSELF) – THE LIGHT OF THE STILLNESS!!!

CONSCIOUSNESS IS THE ABILITY (TO PERFORM AND) TO PERCEIVE WHAT THE WILL PUT INTO ACTION (EXPRESSED).

We must grow into understanding of "life experience" both in the lighted dimension of what we call etheric soul and within the dimension of consciousness (human-physical). Consciousness is the recognition of that which the being is experiencing at the moment - therefore, CONSCIOUSNESS is God but of the physical recognition.

CONSCIOUSNESS IS AWARENESS OF AWARENESS!

Figure 3.1: Consciousness

I have just said that God is consciousness. Well, consciousness, is "static".

Consciousness is the knowing of mind. Knowing therefore, is "static".

Consciousness is the spiritual awareness of "Being", of all-knowing, all-power and all-presence.

THINKING, however, IS ELECTRIC.

God's thinking is expressed by two-way moving wave extensions from consciousness, like a lever swinging upon a fixed fulcrum, or like waves extending from the calm sea.

Thought expression is dynamic. Thinking belongs to the electrically sensed and conditioned vibrating universe of motion. Thinking is the motionless principle in light which creates the illusion of motion.

The "Self" of Man belongs to the static, invisible, conscious, unconditioned universe of KNOWING. Through THINKING we (God) express knowing in the

dynamic, visible, electrically conditioned universe of sensation.

THINKING IS EXPRESSION OF KNOWING!!!

Sensation is the electrical awareness of motion simulating the spiritual QUALITIES of the One Idea by creating imaged QUANTITIES of separate forms which seem to have substance.

Consciousness is REAL. Sensation simulates reality through motion of interchanging lights, but the mirage of a city is not the city it reflects.

Consciousness is the state of KNOWING. There is no activity in KNOWING, but there is activity in THINKING.

Mind is not stratified into sub or super layers. Mind is universal. It is all there is, and it is everywhere the same unchanging **ONE UNDIVIDED LIGHT OF ALL-KNOWING FROM WHICH ALL MOTION SPRINGS. CONSCIOUSNESS NEVER CHANGES!** Everyone is always conscious but few are aware of it. The human race has not yet unfolded to the point where it is **cosmically aware of its Conscious Soul.**

To most people, the idea of consciousness means thinking of something.

Consciousness is a state of Being, an ecstasy. [ECSTASY: A state of being beyond reason and self-control; a state of overwhelming emotion. Webster's New Collegiate Dictionary.] It is not form or action.

The greater our cosmic awareness, the greater our Cosmic Consciousness - which means ALL-KNOWING.

CONSCIOUSNESS IS THE "SEMINAL" VALUE FROM WHICH ALL OTHER VALUES FLOW - WITHOUT EXCEPTION.

HUMAN CONSCIOUSNESS IS THE PURPOSEFUL, UNMOVED MOVER OF EXISTANCE - IT IS THE ETERNAL INTEGRATOR AND CONTROLLER OF EXISTENCE - CONTROLLING THE RELATIONSHIP OF MATTER, ENERGY AND TIME THROUGHOUT EXISTANCE [1-4]!

4) Dawn of Consciousness

Out of millions of years, Man has had but a few thousand years since the dawn of consciousness awakened in him the slightest suspicion of his spiritual inheritance. The advance of Man since the first messengers of God appeared on earth to kindle an awakening spark in him, has been based upon information gained by his "senses" and stored in his electric brain as memory records of "sensed" observations. These observations he has reasoned into sensed conclusions by an electrically sensitized brain.

All of such conclusions which are based upon the evidence of senses have within them the elements of deception which characterize all effects of motion in our three-dimensional illusion. Man is aware of some of these illusions, such as

those of perspective. He is aware of the fact that railroad tracks do not meet upon the horizon, but he is not aware of the fact that all effects of motion are not what they seem to be.

He is thus misled into forming conclusions which have no relation to Nature whatsoever. One can have no knowledge of EFFECT, for all knowledge lies in CAUSE. Our new fundamental laws and principles must be based upon knowledge of cause.

One of the reasons we have not yet made that marvelous discovery of our own genius is because meditation is still new to the Western races. Worse, as it is discovered it is tainted by the foolishness of those who desire control and wealth from that which we seek. But in spite of all that the adversary does, there is coming a more constant beat of that "Inner Voice of the Spirit" which is forever calling within the Souls of all men. When we are too busy with material things to have time to listen to that Voice, we become chained to emotions of our body and to the demands of material things. We are enslaved by them. The moment we begin to listen to our Inner Voice, that moment we become freed from slavery to the body. The high heavens of God's omnipotent and omniscient universe then become our dwelling place.

Meditation began when thinking began at the Dawn of Consciousness in the human race. Man was in communion with God and thought nothing of it - it was a present part of his being-ness. Until the "Dawn of Consciousness" men were ruled by their senses and their instincts. As soon as humans began to "think" and "know", they began to suspect a superior Being. Worship then began; sun worship, idol worship and, finally, the Inner Voice of thinking-man led him to the spiritual idea of many gods - then to ONE God.

Through the centuries of meditation or communion between the physical senses of men and their spiritual inspiration, the genius of some unfolded beyond others. This gradual unfolding has been taking place during several ages of man until now a new stage of the human race is unfolding which is the dawn of the "Cosmic Age". The great masses of mankind are not yet ready for cosmic knowing but many thousands are ready for this new knowledge of the invisible universe of thinking-Mind. It may be that there are even a few millions who are ready to become the seed of the new race of cosmic man. What a lovely and intelligent time it is.

5) Renascence of Consciousness

In spite of many prophecies which foreseen "fall of world" at the end of the second millennia and at the beginning of the third millennia, human civilization together with Earth vent into the most exciting unfolding phase. That is why the time we've been living in is called **Cosmic Age**, which is characterized with some new attributes, and before all with **New Energy, New Earth, New Man, New Knowledge...** Everything is new, because there is no other way.

New Energy is the essential quality of the Cosmic Age. It is diametrically different from the old one. Namely, in the old energy the main human action and an idea in problem solving was battle. In the background of battle fear was

always hidden, as the basic driving motivation for the battle. We were taught from the childhood how “the man has been battling against nature for centuries in order to tame it and put it under own control”. That concept is now exceeded. Instead of fear, the main man’s motivation is wisdom inspired by love, what as a consequence has harmonization and balancing with a challenge, and not battle for problem solving: so, **not problem and solution, but CHALLENGE and ANSWER**. New human consciousness comprehends that there is a challenge and not a problem, and that, for the sake of universal balance, one has together with challenge created its answer. **BALANCE MUST EXIST IN EVERYTHING**. New human, i.e. I, accept challenge as an opportunity through whose balancing I unfold myself and raise my consciousness at the higher level, at the same time raising the level of Earth’s vibrations.

Changes on Earth are threefold: changes in electric grid of Earth (not MAGNETIC as it is common known!), changes in crystalline structure of Earth, and changes of human consciousness. Earth is a part of whole and I am part of whole, so that we both have to change ourselves in order to provide our own consciousness. Earth is not a death being, death rock and dirt, as I’ve been wrong taught. Earth is living, conscious, breathing being having its own essence which is changing in accordance with my changes. She is been literally following my changes. Sometimes those changes are followed by effects that have catastrophic proportions. My fundamental reaction on it is to keep peace over it without fear and stay aware that I have caused the changes that are necessary, so that their end affect will be positive in regard to evolution of human civilization. For that reason I always unconditionally validate and accept them as positive, although it is not always so acceptable at the first look. Under positive I always understand LIFE SUPPORTING.

Electric grid of Earth is been shifted so that a more intensive communication with the invisible world is now possible, the world out of our 4D comprehension. There is strong scientific proof of those changes, related first of all to the measured shifting of Earth’s electric poles and permanently decreasing of the intensity of the Earth’s electric field.

Changes in the Earth’s crystalline structure are related to changes of the quality of the energy that is stored there. Those changes are in most direct relation to the changes of the human consciousness and I’ll give more details about it later in this article.

Meaning of the existence of the electric grid around Earth is to separate human being into two parts and to set him an energetic barrier that he must overcome in order to get united with himself. Human is an eternal being, with no beginning and no end, and very unique being. But, during stay on Earth solving problems (in old energetic paradigm) or balancing challenges (in new energetic paradigm), human creates energy and raises the level of own vibrations until (s)he overcomes that energetic barrier and connects with own invisible part, becoming on that way that what (s)he is – integrated being. It is most easy to imagine in analogy with high jump: until (s)he raises own energy so high that can pick up own body over the crossbar, (s)he cannot be found

on the other side of the crossbar without knock it down! By shifting of the electric grid the crossbar is set little lower, but only relative to human’s energy. That energetic barrier between human on Earth and his “Higher God’s Self” is called DUALITY.

I – the Cosmic Age human, have **weakened duality**. I am aware of my duality and higher possibility of uniting with myself that is caused by shifting of the veil. The veil is nothing more but a dynamic energy existing in every my cell and in every atom, everywhere and always. By shifting of the veil conditions are produced for development of all my characteristics that I will describe in the text. One of them with which I came to Earth, namely erasing the KARMA – what is spread and accepted name for that energy (in use is often the term beginning contract). By erasing of the karma some possibilities for development of some new attributes are opening, from whose I put on the first place **responsibility**. Responsibility is expressing on two levels.

The first level is **responsibility for myself**, originating from the general overview which is mirroring in my awareness about that I am responsible for everything what happens to me in my life, that I have planned it all at some level, in other words that I gave permission for it all to happen that way. **Nothing is predestined in my life and there is no destiny. I am the most powerful being in the universe and it happens to me just that for what I give my permission and my agreement**. This level of responsibility allows me to understand that I’ve chosen everything and that I am not a victim and cannot be it at all. My free choice is the highest principle in the universe which the God self (who I am, part of him) unconditionally accepts and always respects. That is why God knows everything, except what is my next step. I have agreed by myself to come to Earth and I have chosen the goal for myself, i.e., the aim which I like to realize. Free will gives me possibility to change it every moment and I’ve been doing it. Whenever I ask myself “why it happens to me”, I immediately after that laugh to myself and remember that I set it for myself as a challenge and that I with creating of the challenge have created the answer at the same time, from the reason of balance. My intuition and discernment are helping me to find the answer.

The second level of responsibility is **my responsibility for the Earth, because the Earth is alive and has its essence**, and with full awareness I greet it with “I am here with you and you are with me because of the new energy, and we will change vibrations together – together as a whole.” On the similar way I turn to other beings with which I am in an unbreakable unity: water, air, heaven, wind, cardinal points, clouds. All of them are part of me and I am part of them, and we all together with Earth are one whole system. And I know that there is no better protection for me than when I honor and respect them, and they react on the same way. I am particularly in unity with water, which is taking care of me and protecting me during all my journeys. Existence of its interdimensional life was proven by the official science.

My next characteristic as a human of the Cosmic Age is that I am **enabled**. I am enabled to co-create. That literally means that I and Spirit and those around me, “my” group, who is me, create our own reality. As I co-create for myself

so it affects those around me on the positive way. I do not create, so, alone, but keeping the hand of my Higher Self, means the Spirit. Co-creation is characterized with a few characteristics, from which certainly the most important one is abundance, whereas I understand this word as Spirit understands it: sufficiently on a day-by-day basis.

2. Interval of non-time

It was pre-ordained that Creation would exist within a rhythm of expansion and contraction, since the first breath of God at the beginning of all the worlds. Eventually there would come a time when the physical universe would stop expanding and begin to contract. The process is referred to by some as the breathing-in and the breathing-out of God - the action of breathing-out all creation and then breathing it all back in again. It is a good concept for all flows in cycles of flowing out and flowing back again to source.

At this point in what we refer to as linear time, we are very close to the middle of the cycle, soon to reach the exact mid-point between the out-breath and the in-breath of God. The universe began to reach this mid-point when unicellular organisms were emerging on the Earth what scientists have confirmed a few years ago when they found one cell organisms at the bottom of oceans. The exact mid-point is at hand but not yet fully attained. It will coincide with what has come to be called the Second Coming of Christ. Don't get hung up on terminology for this is only a definitive term for reference.

When **any** vibrational system reverses the momentum of its direction, as a pendulum does at the uppermost point of its swing, there is a moment of complete rest before it resumes its movement in the opposite direction. Since rest or the total cessation of movement constitutes the opposite of time, there is at the precise moment of its occurrence a micro-interval of non-time, a moment of eternity. This is the same interval of non-time that occurs many times every second as the atoms of the physical world vibrate back and forth. This is an opening into the Nagual, a doorway into the Presence from which all Life-energy springs.

Something to ponder: **we believe we have not experienced any miracles? We were born, were we not? Now, think about this - have we ever experienced death of the body? No? How about every time the heart finishes a beat? If we have not the next beat, we just died! We experience at least 40 to 200 miracles a minute of existence, and we still ask for "proof".** How often do we thank God for those 60 some-odd miracles - or do we simply complain about our lack of "comfort" and that which we perceive we have not? Think carefully about those things for it will be that for which we are grateful which shall ultimately enter as "circumstantial evidence" at our judgment hearing.

2.1 Perception, Exploration and Adventure

What happens when an entire cosmos reaches the exact point of directional change and comes to a moment of absolute rest? We will have the opportunity to see for ourselves very soon now, for this event lies just before us in linear time and that is why we have returned - to bear

witness. It will provide an opening for the emerging of something incomprehensible.

The entire biological history of our planet has been but the shadow cast in matter by our approach, so to speak. It is the way that rocks and water and air have begun to respond to our presence, for we represent Life itself. We are that which lies beyond all duality, beyond all materializing tendencies, beyond all restraints of time and space. Our consciousness is both infinite and eternal. It can dwell in the limitations of matter and perceive through whatever filtering systems we so choose, but in healthy function, it is not bound or limited by those systems. Rather, it uses them as instruments of perception, exploration and adventure.

Outside of time and space, we are one with the Creator, the All That Is, the Source. But when our consciousness moves within the context of a manifest universe, we become the Son, the Christ. In essence, we are the relationship between Spirit and Matter, the mediator, the bridge, the means through which the Creator relates to Creation. We are Life as it relates to planet Earth, eternity as it relates to time, the infinite as it relates to the finite. Though we presently experience ourselves as a separate and fragmented species, we are in fact a single unified being, sharing the full consciousness of the Creator. We are brought into living, focused expression when we are inside of Creation by the manner in which time and space, matter and energy, sea and stone, react to our presence.

As the Christ, as the only begotten consciousness of the "Father", we have been given a number of remarkable qualities. We are able to expand and contract in accordance with the focus of our attention. We are large enough to encompass all of Creation, yet small enough to climb inside. Our Father-Creator also permeates Creation, but in a different way; in His vastness, He surrounds Creation. His being saturates the physical universe, all the stars, the sun, the planets in our solar system, the distant galaxies, but He relies on us for His focus. We are His specific attention.

As the focus of the Creator's attention, we have been roaming around inside of Creation for billions of years, expanding and contracting, drifting in and out of this galaxy, that galaxy, this star system, that star system. Everywhere we go we see the matter that our Father has created. We observe the many wonderful forms it takes: the mighty suns, the red giants, the white dwarfs, the vast spiraling galaxies, the quasars, the black holes, the white holes - the whole. We watch the incredible contortions of time and space that take place in the various gravitational fields through which we pass. We note the planets, asteroids, moons, and comets circling within each star system we visit. We drift around, the Father's representative, the Father's attention, and we enjoy the worlds that have been brought into being.

But all these worlds are physical. They are all made of matter. They are made of the bonded energy-attention of the Father. They have a certain substance, a certain solidity that we as Spirit lack. We realize that this is their limitation. We realize that they are defined and specified in ways that we are not defined and specified. Yet, something about them certainly intrigues us.

2.2 We love Puzzles

By and by, we get an idea. We begin to wonder if we might not, just possibly, somehow or another, clothe ourselves in matter and construct for ourselves a physical body that we could then travel around in, perceiving matter from the same perspective with which matter perceives herself. The idea contains one paradox after another. Yet something about it keeps us wondering. It puzzles us - and we all love puzzles at which to toy and tinker away. We just keep right on mulling it over as the eons roll by, figuring out some way to make it work.

Until this point there was no biological life in the universe. The rocks had a limited consciousness, but it was not responsive to the intent of our spirit. In solid, liquid, or gaseous states, matter, as created and defined by our Father, behaved quite predictably according to fundamental physical principles untampered with until that time.

Throughout our travels in the physical universe, we had always kept our consciousness separate from the matter we observed. At the time we hit upon this plan, however, all that changed.

We looked around until we found a suitable planet for what we had in mind; not too hot, not too cold, situated within a stable young star system. We then focused our attention and our vibrational body in an entirely new way, an open way, a self-sacrificing way, a very powerful, loving way. Gently, slowly, we began to approach the planet.

As the outermost edges of our vibrational field touched the waters of the planet, particles of previously inert matter began to gently vibrate to the rhythms of our being, aligning themselves with the energy patterns found on the periphery of our awareness. There, on the Precambrian ocean floors, they began combining to form the first cells, the first minute containers for our consciousness to meet the demands of our experience.

In our new orientation, with our new form of attention, in a gesture of infinite love to this planet, we began offering our consciousness on the time/space cross of material reality. We allowed our consciousness to clothe itself in the limitations of physical substance, accepting its restrictions. We allowed the atoms and molecules that were forming the first cells to come to life with our consciousness, along the lines of our own vibrational field. At the same time that we allowed our consciousness to become clothed with particles that had been subject to the laws of the materializing process, we taught the matter of Earth to rise up in a joyful dance with our spirit.

As we drew ever nearer to the planet, the life forms that were taking shape began to contain more and more of our own awareness. We relaxed, opened ourselves and gave. We procreated the Earth with our life, with our very being. We looked out of many eyes and heard with many ears.

Before embodiment we were single. We drew identity from the totality of the relationship between Creator and Creation. We were the Christ, fully conscious and alert, aware of

ourselves, unified, integrated. We realized that to accomplish embodiment we would have to allow at least a portion of our identity to come to rest among the creatures we were birthing. Each of these would possess a type of hologramatic consciousness that rightly thought of itself as both part and whole simultaneously. However, the presence of this consciousness could only be a certainty after the embodiment process was complete. During our actual surfacing through the substance of Earth, there was a possibility that certain of the creatures might become self-active. Therefore there had to be a means of regulating our disintegration from without. We wanted a part of us observing and experiencing the entire process.

As we prepared to enter into the planetary relationship, we created beings to represent our original state of unified awareness. These are the angels who all were having this little issue with understanding energy, how it worked in all of creation out there, long before Earth, long before the physical universe. Their value, as well as their limitation, springs from the fact that they have no comprehension of the process we are undertaking. Their instructions were to pretty much stay out of things *until very near the very end of the process!* Then, upon receipt of a pre-arranged signal, they were to commune with the human beings on Earth at that time and assist them in awakening to their original state of unified consciousness - hence come the alarm clocks!

We received that signal some two thousands of years past.

It has taken almost two millennia to prepare us for the message we bring. We had to be educated before communion of this nature was possible. However, the time is at hand. These instructions are to awaken us to a remembrance of purpose, a remembrance of self. It is time to begin the final cycle of Conscious Creation, during which the Earth-creatures themselves participate in the unfoldment of their design. The body we are creating for the habitation of Christ consciousness is to be a mobile body, fueled by creative intentions of the Father, capable upon completion of leaving the Mother's side.

3. Quantum Leap

Let's take a quick look at the Quantum Leap. Let's take a quick look at what has happened on September 18th, 2007. Well, nothing - and everything. That is how New Energy works - nothing and everything at the same time.

If we could measure human consciousness and we could measure it over the millions and millions of years that angels have been embodied on Earth, we would see that there is a type of chart. It's a chart but it also spirals, so it has a circular or a spiral motion to it. It has a type of speed associated with it, and we can almost see at one end of the graph, that it is a very small tight spiral. That is because in the beginning, the consciousness of humans was very small. And we have to understand this graph is actually multi-dimensional. But for the sake of understanding here, I'm going to explain it as a three dimensional graph. But understand, right behind the three dimensional version of the graph there is a very large counterpart. It is what we would call the soul or the spiritual consciousness of the angelic part

of ourselves that is not embodied or conscious on this realm. That is always a layer right behind the graph showing the 3D interpretation of human consciousness.

Let me consider existence existing as an open-ended electroplasma, always evolving through its interacting matter (M) and energy (E) fields or modes [2]. Those two fields of existence also eternally interchange (sequence of expansion-compression) in a relationship whose compression sequence (not expansion sequence as Einstein meant) is expressed by Albert Einstein as $M = E / C^2$ in 1905, with C being the universal constant representing the speed of light.

Einstein's concept of mass was wrong. Every mass consists of light rings spinning around centering zero Mind point and it is unbalanced condition and the proper measure of the unbalance is electric potential. Those light rings spinning around centering zero Mind point are My perception of time/space motion (perception of Consciousness), so that I can replace "matter" M with "time/space" P.

Each component part of an equation needs a label. Now, as with $E = P * C^2$ or whatever - WHAT IS "C"? It represents the universal constant which represents the speed of light - to Einstein. It SHOULD REPRESENT "Consciousness" - THE SPEED OF CONSCIOUSNESS - NOT LIGHT, IF I AM TO BE ACCURATE!

Then what really is the "speed of light", C? First, consider atomic fission or fusion in which all of a given mass (actually time/space) is converted to energy as $E = P * C^2$. That is the action or expansion phase of every creation, because action is always giving from the centering soul what means outward expression. Now, by contrast, the "speed of light", C, is the velocity at which all of a given energy is converted to mass (actually to time/space) as $P = E / C^2$. That is the reaction or compression phase of every creation, because reaction is always regiving what means inward compression. Yet, light itself is the opposite - it has no mass. So where is the connection of light to the velocity, C? There is NONE!! The "speed of light", C, is NOT THE SPEED OF LIGHT AT ALL, BUT RATHER "C" IS THE VELOCITY RELATIONSHIPS OF TIME/SPACE AND ENERGY FIELDS. LIGHT, GRAVITY, Mr. Einstein, AND CONSCIOUSNESS ARE INTERRELATED. THEY HAVE NO PATHS OR SPEED LIMITS.

We know now that Light does not travel at all, but that Light is simulated in light which reproduces itself in surrounding bodies [5-18]. There is only ONE Light that seemingly is two. We can imagine a mirror-walled room with a light in the center. The mirrors would reflect into each other, and the thus reflected light would APPEAR to extend into infinity. But it would be the same light! Just as a man can have two hands, belonging to the same body, God can have two or more EXTENSIONS OF HIMSELF, and yet it is still just the One. We only THINK of ourselves as separate entities, in reality we are One in God.

The still One Light of equilibrium is simulated by both its seemingly division into light expansion-compression (action-reaction) sequences and the reproduction of those sequences is at the rate of 300.000 km/s anywhere in our

part of existence. Finally, C is the speed at which Consciousness reproduces its own perception of action-reaction (expansion-compression) sequence everywhere in existence - it is frequency of repetition (reproduction) of illusion everywhere in existence. This justifies calling it "speed of perception".

At the Beginning of Embodiment, we have this very tight small spiral that represents consciousness - human consciousness. Now, as time goes on over a few million years, the spiral starts to expand but at a very slow and a very calculated rate. Taken into its measurement are things like human activity; brain power; what we would call the spiritual consciousness or recognition; one's relationship with themselves; and one's relationship with others in their outer world. These are all parts of the quotient of human consciousness.

Then we hit this time of what we call Atlantis, and it takes a leap. Towards about the middle times of Atlantis we see that it doesn't follow the same linear path that it was on before. The speed of the spiral is faster. The spiral suddenly seems to grow bigger - it takes a jump - and this is the Atlantean time. At the end of the Atlantean time, looking at this graph of human consciousness, we would suddenly see that spiral now seem to reduce in size but not in speed. **The spiral reduces in size but not in speed.** This represents the end days of Atlantis where consciousness seemed to fold back on itself, but yet it really didn't. The speed was still there. The rate of acceleration had created an established pattern that allows it to keep flowing so it doesn't crash.

Then about ten thousand years ago, this spiral was growing at a very predictable path. Its speed was increasing at a predictable rate, and all of a sudden it seemed to take another leap. Not a large one, not what we would call a quantum leap, but it took a directional change. And here, once again, the spiral opened up, back to at least the level that it was in the Atlantean times, but its speed was going at a faster rate now than had ever been experienced in Atlantis. This is human consciousness.

Over the period of particularly the last, from about ten thousand years ago to about eight thousand years ago, the spiral of human consciousness kept on expanding and kept on speeding up at a fairly consistent rate. But then, again, two thousand years ago, it took another change. The speed became even faster, so much that, from our human perspective, we could say we almost couldn't even see the speed of the spiral, it was going so fast. And now it was opening up, this spiral, but the distance between the circles of the spiral was no longer consistent.

We see, the spiral in the past always had a very patterned or very predictable spacing between each cycle of the spiral. This is like a big spiraling wheel that's turning. Two thousand years ago the spacing between the individual circles within the spiral changed so that the more further out levels of the spiral had much more distance than the spacing of the inner circles of the spiral two thousand years ago. And once again the speed picked up.

Now, here we are in very recent years, in the past, let's call it seven years of time after 2000. Again, the speed is going faster and faster and faster. The spirals are growing bigger and bigger. This is human consciousness.

And here we are now, less than five months away from the next big shift. But this spiral called human consciousness doesn't just expand further, doesn't just have more difference between the points within the spiral, doesn't just get faster. *It changes its entire nature, where speed is not a factor anymore.*

We see, speed tends to be linear, tends to be three-dimensional. Speed will no longer be a factor in the New Energy. And I'm not just talking about the speed of our car or how fast we can work on a given day. I'm talking about the ability to expand – not just in this fairly predictable spiral fashion, which is occurring in our third-dimensional reality – but now, basically we can say an explosion. An explosion. *September 18, 2007, on this date, speed no longer matters and spiral no longer matters. They're off the chart.*

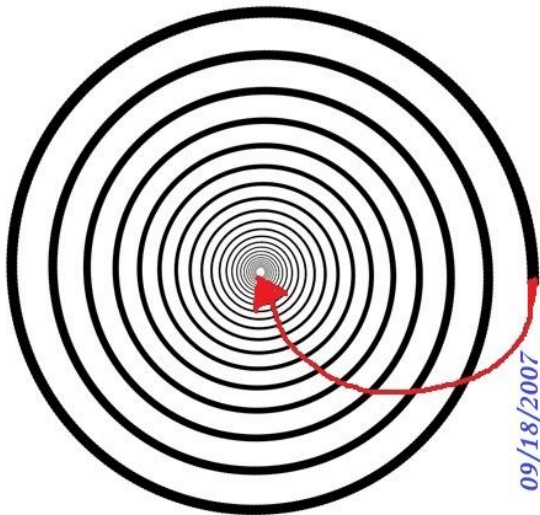

Figure 7.1 Spiral of Consciousness

When we left the Home we made commitment to experience duality (separation) to fullness. But, we made one even stronger commitment to come back to Home and that happened when the spiral turned inside and closed in itself – the moment when the New Energy was born.

It's going to, in a sense to appear that everything disappears, that the spiral exists no longer, and that everything stops. And that's, by the way, what happened when the Mayans, so, so long ago, looked at the progression of human consciousness. They saw that it disappeared. Their prediction, of course, was the year 2012. They were close, but not precise. Things have happened. This was not destiny, this is simply pattern and patterns are subject to some change. September 18, 2007 it goes off the chart.

3.1 New Energy - Expansional Energy

Now the spiral, in a sense, is still there, but it has transformed itself into an energy that we cannot possibly draw in any type of recognizable symbol. The energy of the

old consciousness was spiral. *The new consciousness is expansional.* How can we draw expansional? Because it not only expands outwards, it not only expands inwards, it expands in every different direction, going into and coming back from every different dimension.

So literally, literally, creator thoughts, creator ideas can be shot out of this dimension into another type of dimension, into the non-defined, going out of obvious recognition, and then finding their way back. Expansional energy, by the way, always finds its way back to us, to zero point, to the Now.

Expansional energy originates in the Now. New Energy originates in the Now. It is shot out; blasted, exploded into the indefinable, into all sorts of other dimensions, sub-zero dimensions, negative dimensions – that do exist, by the way. Not just positive dimensions. There're not just positive numbers, there're negative numbers. Not only positive and negative dimensions but ... there are absolutely no words for it. There are what I'm going to call unpredictable dimensions.

Anything, any desire, any what we would call creative thought can be shot out of the Now into these other dimensions to the point that it appears that none of these exist anymore. We've lost our idea, we've lost our thought and as a human we may get frustrated. But what's happening is they're out. They are wandering, but not only wandering, they are zooming off to collect the energies, to collect the information, to collect the support, to come right back into the Now moment for us. It's kind of a boomerang effect. We throw it out there, it will come back – and when it comes back, it will look and feel different. It will tie into the energy of our gnost, our solution, and then the trick is making sure that we comprehend it. It's come back – all of the energies, the answers have come back to the Now – but now we've got to recognize it. We've got to activate it.

So we are together as the work that Tesla is doing with us, as the work that invisible are doing with us, is helping us to realize some of these answers that are out there and to bring them back to Earth. Answers that can be specifically applied to energy resources of the world – non-oil, always renewable energy resources for this Earth – that will come into reality within the next a few years of time. It will come into reality very quickly at a shocking and alarming rate that could stress out some of the old financial and distribution systems that exist here on Earth. Get ready for it, we've asked for it! It has to come in right now. It has to come in. Even energy – the fuel energy that we use – is coming to an end. There has to be a new way. And it's going to be something totally different – not wind, not solar – something totally different: so simple that humans will wonder how they overlooked it for thousands and thousands of years. But consciousness wasn't right. It wasn't ready.

The scientists, the researchers, are looking at new ways to help facilitate the rejuvenation of the body. Not necessarily even what we would call medicines, but a type of interesting therapy for the body, but they're running into problems. It's not predictable. They can't understand why it works sometimes and why it doesn't work other times, and the

scientific and legal community is tied into predictable, definable results. If we do something once, it has to be replicated again and again and again and again.

But New Energy medicine – I'm not talking about hocus pocus with the hands, I'm talking about New Energy medicine – is different. Why is it different? It's New Energy and it also has to do with the desire or what we would call the intent of the patient, of the one who's sick. It has to do with their ability to participate with the whole program.

Some of these things are being tested right now, particularly with cancer patients, but the results are so unpredictable, because they haven't figured out yet the one basic simple element that has to be there with any rejuvenation process: **the desire and the responsibility of the patient**. When the patient doesn't take responsibility for their own self and their own body, it is very hard for this type of new medicine to work at all. So they're going to come up with this realization that it is important to have the energy of the patient. And some of us are actually going to be working in this area. Not necessarily the medical part, but the simple work of helping a client to understand that they can affect change and rejuvenation within themselves. This topic has to do with helping humans to help other humans to rejuvenate through some of these very methods: how to be at their bedside with them, how to help them to take responsibility.

So what these scientists are working on also has to do with the production of food. Right now, actually, the production of everything from meat to grains to fruits is relatively crude. There is not the true intuitive understanding of the dynamics between Earth, the Sun, the Moon and how plants grow. There is some basic understanding of the soil, but only in a very limited, only in an Old Energy way. There is basic understanding that if we plant something in the ground, we water it, get a little bit of sun, that it may or may not grow. But there's going to be a whole new understanding of the interrelationship between all of these things – the interrelationship between energy and the plant, the food, to the point where, in the next twenty years, every family who has a small garden could grow enough food for themselves and all of their neighbors around: food that contains nutrients and vitamins and pure energy, enough to sustain the physical body where we don't have to eat these large quantities. I see how some – some, particularly in America – load their plates full, trying to get – how much nutrition can we get on our plate? And a lot of it is not nutrition because so many of the foods right now carry so little life force energy. Even foods that are freshly picked out of the gardens right now have a factor of about two in terms of nutrition and life force energy when they could easily have a factor of thirty or forty. The food that we eat has so little effect, truly, on the body that we have to eat five or six times a day.

Our body and the food that's taken in don't understand this whole thing. The food has been taught to believe that it has to have a certain type of basis for storage and utilization. The food actually could be a lot more intelligent. That is what we are going for. That is what some of the scientists are working on – intelligent food that carries a high level of what we would call life force energy; and an intelligence of how to nurture and distribute itself throughout our entire

body; and how to store the appropriate amounts of nutrition to last days and even weeks without having to eat again and without having to store it as fat. That is coming. That is right around the corner.

There are many, many other developments. Developments that we're going to see come out after September 18th – not necessarily September 19th but over the next few years of time – rapid technological developments and advancements; rapid change in medicine; rapid change in energy; rapid change in spirituality. Yes, they are all tied in together, all linked to each other. These are going to start coming out after September 18th. They're in the potential; they're in the incubator stage right now. Many groups of scientists stuck – stuck because of the mind, stuck because they don't understand this whole thing of **being able to go into the undefined and bring it back here**.

But, invisible are helping to facilitate this process. Not just because they're letting us feel their energy, letting us take this trip with them that they're going through right now, letting us understand this thing called **quantum consciousness**. Not just because of that but, as we do our work, as we come out with our new developments, they're going to need somebody to take it and run with it them.

Who's going to teach humans how to let their body heal using these new technologies? Who's going to help structure and define, in a very New Energy way some of the new applications of New Energy – this non fuel-based source? Who's going to help, particularly counsel, humans in the new spirituality – where it's not about religion and it's not about techniques, it's not about doing some old type of ceremonies, not about just a different set of rules – but **a true new spirituality that allows a persons to integrate the essence of their humanity with the absolute pure essence of their divinity – without blowing their mind apart?**

And this is the challenge, this is the battlefield. This is the battlefield. We have this human on one side with all of its wonderful attributes – and its limitations – but its beauty. The human condition – it's beauty. It's beauty to be able to feel things in a way no angel could feel them: the ability to experience things in a very real and physical way, in a way that no angel could even feel them. An experience that is so deep, so real, so solid, that there's beauty in it - sheer beauty. But when we try to mix in this thing called the divine, the essence of us, the truth – our truth, our purity and our absolute trust – when we try to put these two together, it creates a conflict, a collision, and the collision takes place in the mind. In the mind. This is the battlefield. **That is why we go beyond the mind, into the indefinable.**

Ultimately, it can affect the body but it takes place in the mind – the uncertainty, the fear, the control, the darkness and the loneliness: the lack of understanding of how it works, the terror in our mind. The mind's feeling that it's putting itself into some sort of depth of hell, into a nightmare, because of this battle that's going on.

Who's going to teach those humans how to use some of the new spiritual – I'm going to say – technology? Who's going to teach those humans how to inspire their consciousness so

that it doesn't overload their brain so they don't have to end up going to some Old Energy psychologist and taking very, very – what could I say – ineffective medications that also destroys the inner will – the divine will of the human and its divinity. Who's going to teach those humans? That's why invisible are coming to us. That's why I'm stating that change is here. It's now.

4. Energy in Motion

What we have right now on Earth, why we have been feeling so many things and experiencing so many things, is energy in motion - energy in motion right now. Not the old motion, not just .speed and expansion, but *motion into the beyond. Motion into areas that humans have never gone before while in their human state.* Energy is in motion all over the world, and sometimes we think the world is going crazy – and if the world is not going crazy at least we are. Understand it's just energy in motion. It's affecting everything. Even people who don't understand any of these concepts, it's affecting them. It's hardest for them, in a sense, because they don't have a clue as to what's happening. They don't know why everything seems turbulent, why everything seems so multi-layered right now. Humans are very used to looking at one specific dimensional layer of energy. They get very comfortable. They get fat and happy with it. Of course, they complain and scream the whole time and want to get out, but when energy is in motion like it is now and like it has never been before, they get very uncomfortable. And what happens as the result of that? When a human doesn't understand energy in motion in a multi-dimensional sense they start going crazy: school shootings, hijackings, terrorist activities, suicides, depression, all of these other things, rage, violence and worst, probably, of any of these things, a very twisted and distorted understanding of their sexual energy. Because when energy is in motion, the mind is the battlefield, guess what comes in: the sexual energy virus. It twists and it turns and it feeds. That is what is happening right now in the world. Energy is in motion.

4.1 Religions

It's happening on every different level. It's happening even on what we would call the religious levels. Let us talk about religion, because religion tries to own consciousness. Religions are purely man-made. They have nothing to do with God. They do not understand God. Their God is a man, their God has human attributes. We are better off being an atheist rather than being religious right now, because they do not understand the true essence of God. They are trying to define God – they've been trying for thousands and thousands of years – in their image, in their limitations and in their mind.

So we have right now religions, which control some seventy to eighty percent of humans – and nearly all of human consciousness – on Earth right now. And these religions – the main ones – have been waiting for the Messiah, the Return. They've been waiting for Jesus. They have been waiting for the one who is going to save them, and they've been waiting ... and waiting ... and waiting, generation after generation, after generation.

Now we'd think somebody in one of those generations would wise up and say, "But it didn't happen to you, Dad. Messiah didn't come to you, Grandpa. Messiah didn't come to great-great-great-great Grandpa. Maybe, just maybe, the Messiah isn't coming ... ever." Maybe the Messiah got real smart, walked off this planet, got to the Bridge of Flowers and said "Goodbye family." Maybe the Messiah, after completing his or her last lifetime on Earth, said, "Now it's up to you. Don't call me back; I'm going to my Third Circle. Bye!"

So here we have religions holding the consciousness, waiting for the Messiah. Messiah's not coming. It was an old and cheap promise that the church has put out to keep waiting, to keep people in control. The Messiah's not coming back. If we wanted to look at it perhaps in its most optimistic way, we'd say that *we are our Messiah. We are our own Christ seed. Messiah is the New Energy.* If we wanted to look at it perhaps in its most optimistic light, we could say that *the Messiah was not a person, the Messiah was an event. The Messiah is the quantum leap in consciousness for humanity.* That is the Messiah. But don't wait for some bearded one to come wandering in on a jackass to save the world.

5. New Energy with Awareness and its Unit Dodeca (Deca)

The time we are living in is the time of TRUTH and huge CHANGES which will bring inevitable our planet together with our civilization into 5th dimension where ONLY BALANCE is allowed. There will be NO FEAR or any other lower energy frequencies there. Our planet, beloved mother Shan, is approaching faster and faster to our sun, while our universe is approaching to the maximum of expansion where there will be NO TIME interval during which ALL laws necessary for the creative maintenance of physical matter and all materializing processes become suspended – there will be NO electricity.

We human beings are CONSCIOUSNESS living in the cosmic vacuum tube of invisibility and projecting holographically our creative DESIRES from that vacuum condition which are electrically recorded into desired (material) forms. We are NOT ENERGY, but we call in energy to manifest with it. There are universal laws which we use to inspire energy and to manifest with it in order to simulate all un-measurable QUALITIES of the eternal universe at rest with measurable QUANTITIES of the transient universe of motion.

The basic universal laws are law of BALANCE and law of CONTINUITY. CAUSE is eternally balanced, while EFFECT is eternally changing to simulate balance through its unlimited forms. Since the CAUSE is infinite and eternal, which God Is, the EFFECT is also infinite and eternal, what means CONTINUITY.

After the fall of Atlantis we have decided to experience LIMITED potentials and create with energy in the OLD way with FEAR, FORCE, POWER and EFFORTING. The old way of creation with energy is HARD, COMPLICATED,

INEFFICINET and EXPENSIVE. That is all how creation with electricity is.

Then, on August 17th, 1987 WE have decided to experience UNLIMITED potentials and create in NEW way with DESIRE, COM-PASSION, LOVE, JOY and POWER-LESSLY. The new way of creation with energy is EASY, SIMPLE, EFFICIENT and CHEAP.

Old wisdom is dying - it has had its place on a dense Earth, but on a vibrant Earth in the next dimension there is a *completely new Science*. There is the *science of Love and Consciousness, and the science of Balance, the science of Integration, and the science of Unity*. Those realms of science need to be studied by the scientists so that they may be able to **control matter and its density, and make it less dense**.

For unto all who will learn, will this knowledge be given. First we must have the *intent, the desire* to fit into the **Crystalline Age**. The Crystalline Age is one of *instant communication, instant participation, instant wisdom, material needs met instantly*.

New energy unit Dodeca (nickname Deca) is an amazing tool which responds to human consciousness and fulfills any human desire if we know how to **ALLOW** it. One Dodeca unit is comprised of 12 internal six pairs of spirals which spiral in and out simultaneously and create absolutely balanced unit in itself – unit of Love!

Dodeca unit is stand-alone **energy with awareness**. It is possible to create with Deca *without electricity* both light and heat – the only products which companies are producing and selling very expensive.

Civilization without electricity is my dream and I'm staring it these years.

Dodeca can create different forms each appropriate for a different application (see below).

Figure 10.1: Different Dodeca shapes

I call this new technology **I-Change** and it will be subject of one of my next papers.

6. Consciousnessism

I am a being of consciousness. I am a consciousness magnet. I bring forth everything into my life I choose, even things that the human self may not be aware of.

This is not mine, whether it's health issues, whether it's abundance issues, relationships or anything else, whether it's feelings of guilt and remorse about things I've done in the past. It's not mine. It's really not. I can get into the psychobabble about it and say it's all created because of mass consciousness and my bad parents and everything else, but I just let it go. I walk away from it. It's not mine.

Some of you had a particularly difficult time this past month. You let go a little tiny bit of things, and then you wondered why you were still feeling tired or why you were somewhat depressed or had anxiety. You just let it all go. It's not yours. **The only thing that is yours, is what you are choosing. That's it. Period. It's that easy.**

The Master, the I Am, takes that – that's distilled from the I Am – the Master takes that and brings it into this lifetime. Let's say everybody you met in this lifetime represents all of your lifetimes and you have all these experiences with all of these faces and all these identities. The Master comes to you and says, **"Let's do that dance in this lifetime."** I'm going to bring the wisdom to you (one person). You and I, Human and Master. Invite me into your house, the house of the human. Let me coexist with you. I'm not going to take up any space. I'm not going to steal your food. I'm not going to peek through shower curtain or anything like that. **Allow me into that house. Let's coexist together, Master and human.** You can still have your human ways and the beautiful human experiences, but now there is the And of the Master." The Master: **"I'll bring the wisdom. Human, you bring the heart. Oh, you've got heart. You've got tremendous heart. I'll bring the wisdom. You bring the heart and let's do the dance together."**

"I'm going to be so bold and courageous, I'm just going to open up. I'm not going to filter. I'm not going to decide if

it's light or dark or good or bad or if I'm worthy or not, because I'm kind of tired of all these other lifetime aspects. They're pains in the butt. And I'm kind of tired of myself. And I'm kind of tired of the old human linear path. **I'm just going to allow, without limits."**

That's embodied enlightenment. When a human identity, a human aspect of what you would call the soul, when that human aspect is the one that, you could say, kind of is chosen by the Master, by the wisdom, but it's really because of the allowing of this human. **You're allowing all the rest of them, your lifetimes.** You're so preoccupied with what you're doing, you're forgetting to allow. You're praying. You're crying. You're stealing. You're begging. You're into power issues. You're into identity issues. You're into "poor me" and "great amazing me," **but you're the one that allowed.**

Master: "But you, you, this one lifetime out of all of these, you allowed. Therefore, let's do that dance of coexistence together while you stay in the body."

Allowing is only about you, you, yourself, the divine, the Master, whatever you want to call it. Only about those two elements. You, human, allowing Master. They come together.

6.1 My Goodness is Compassion

What is your goodness? Because where we're going now, we're bringing together the wisdom of the Master and the heart of the human. It's the Powerless Life.

That is such compassion and a thrill and a joy and all of these other things. "I Am that I Am!" That's the compassion or the passion of the soul.

Stay with me here now. That passion, compassion of the soul, is the very thing that created or brought forth energy. **Energy is condensed compassion.** What is in your heart is compassion. Love, compassion, whatever you want to call it, admiration for others – that is energy. You are an attractor. You attract energy.

I'm going to bring that same compassion that's deep seated within each and every one you, I'm going to bring it into your reality, the human reality and now I'm going to watch how the energies and the way reality is shaped and formed to truly change effortlessly.

6.2 Consciousness-ism!

"Hey, it's just consciousness being creative and when it wants it, you're all here." Actually, that is the truth. Science is going to take a while to discover it; religions are never going to accept it. But that is the truth. Without consciousness there is nothing. With consciousness you can create realities like this. With consciousness you can create the sense of Focus that gets you caught in a reality like this. With consciousness you can create any reality you want, but it's not through the brain. It's no power whatsoever. It's not even using energy.

Consciousness is the very thing that is going to allow you, bring you into alternative realities, and not human realities.

So now comes the time, now comes the time for the wisdom of the Master. The Master showed up because you were allowing.

Secondly, there'll be a flashing light on this: "Do not use for others - for your own personal use only." Do not use for others, because then you're defeating the very compassion of your heart. You see, true compassion is allowing everybody their experiences, honoring everything about them, about others. Not trying to change them. Not trying to change the world, but honoring. Perhaps it's one of the toughest lessons for any angel and any human angel like you.

Consciousness creates, using no energy whatsoever. It is only in the manifestation that energy is brought forth to create beautiful illusions of reality.

Consciousness, the great creator, requires no energy whatsoever.

7. Conscious Attention of the Creator

When the universe reaches a point of maximum expansion a unique phenomenon will take place. There will be a moment when all laws necessary for the creative maintenance of physical matter and all materializing processes become suspended. Due to the relative velocities of the various star systems, this event will not be experienced simultaneously in all parts of the universe, but will travel as a wave across the sea of creation.

Existing within this ripple of non-time will be the focused conscious attention of the Creator. As it passes through the material realms, it will stay and take up residence in all life forms with circuitry capable of mirroring its essence. This is the moment when the Creator will slip inside Creation; the moment for which I am attempting to prepare us.

This is the much misunderstood "Second Coming of Christ". It is the event that primitive civilizations have looked forward to as "the return of the gods". The Mayans went so far as to pinpoint its actual occurrence in what we would call the year 2012 A.D. Yet while many of our traditions hint at what is about to transpire, none of them have adequately conveyed the magnitude of impact such an event will have. Indeed, no single conceptual structure is capable of conveying the enormity of what is soon to take place.

7.1 Planetary Being

Those familiar with the scriptures of our various peoples should be in position to understand what is occurring for these are the times spoken of. Yet we must realize that God did not invent the words used in scripture. He merely arranged them in the order most approximating His meaning. Further, He only presented them in mental pictures and through the years of translation and deliberate tampering most meaning is distorted and damaged.

What is actually happening requires all of biological life to convey its meaning.

Words can symbolize this, but hardly portray it fully enough to stand alone. If we would know the deepest Truth of scripture, look not to words alone but to the great momentum of spirit within our own soul. This is where the living history is being made. In a way, it would be impossible for our rational intellect to comprehend this forthcoming event in human history. The sum total of all that has happened on our planet is but the shadow cast before.

In a very real sense, we have not yet been born. We are still in an embryonic state. We have yet to receive the touch of God's total definition. Through the long years of human history on Earth, our species has been forming the cells that are to comprise the directive aspect of the physical body of the Creator within Creation. Gestation upon this planet has but set the stage for the emergence of the Planetary Being now taking definite form. This Planetary Being is actually "who you are".

Has it occurred to us that the mathematical probability of our being here is infinitesimal? Were we not here, living proof of the impossible, an excellent case could be made for our non-existence - and still can prevail in conceptual reasoning. Within the framework of law that was of necessity instituted to create and govern these material realms, the existence of biological life would not have been possible, except if it were to enter through that one moment when that law was suspended. Ponder this carefully. Such is the origin of biology: the fusion of Spirit and Matter. The impact of this single creative moment is so vast, so far-reaching, that the shock waves sent out before it, have given rise to all of the biological life that now exists upon our planet.

7.2 No Evolution

We are living in the shadow of an event not yet taken place. Yet it is we, ourselves, under all our layers of false identity that cause this event as we approach ever nearer to the Earth. From within the context of history, it appears that there has been, on this planet, a progression of increasingly complex life-forms evolving toward ever higher levels of consciousness. It appears that there has been an evolutionary process. But this is not the case. What is actually occurring is that the matter of Earth is falling under the influence of our vibrational body. This influence naturally increases as we draw nearer. Only when the center of our spirit touches the center of the Earth will Life on this planet be fully manifest in form. The same Truth can be presented, however, in that it HAS ALREADY OCCURRED LONG PRIOR TO THIS MOMENT AS WE PERCEIVE IT AND WE ARE BUT A REENACTMENT OF THAT WHICH WAS COME BEFORE.

This is not difficult to understand. What we have considered to be history or in other terms, the evolution of the species, is only what we have been able to observe through the distorted medium of a fragmented and quite subjective intelligence, trapped within the past-future orientation of linear time. From such a perspective, the act of Creation

could appear as a progressive, sequential process. To the extent that we are able to identify with the spirit that gives us consciousness however, it becomes a much simpler matter: we have yet to arrive. We are still on our way, so to speak. Sitting there reading these words is only a reflection of our unconscious totality as it prepares to become fully revealed on the day of awakening.

7.3 Unified Field Identity

Our real life will begin when the Creator gives us His definition in form. Within the womb of history, our species has been primarily defined by the Earth-Mother who is helping to prepare the clay. She is only interested in getting the form arranged according to specification. Her only knowledge of Spirit is that it brings forth her potential. When the Father's center merges with the center of the Earth, the collectivity of human consciousness will awaken to a unified field identity. We will be born. After that, the influence of Matter will not affect our consciousness as dominantly as it did during the historical gestation period. The Earth will continue to suckle the species, so to speak, for another millennium before we are capable of going off on our own, but even during that period the Father's influence will be much greater than it is today.

7.4 New Definition of God's Love

The Creator has established laws to govern the bonding of energy. Through these laws of materialization, the physical universe is created and maintained. In the material realms, these laws are right and proper. But when they come into relationship with biological life, they begin to behave strangely. From a perspective of consciousness, they translate into limitation, contraction and ultimately death. In psychological terms, the laws of materialization have given rise to the ego - a fictitious identity with a sense of fear, vulnerability and a need to protect and defend itself. Spiritual consciousness should not properly be associated with the forces that govern the bonding of energy.

Their historical juxtaposition came about through the process referred to as "the Fall". During the period of species preparation, the presence of the materializing influence on levels of consciousness has been unfortunate but not critical. However, in light of the intensifying vibrations of the creative spirit that is now nearly aligned with the center of our planet, the definitions that have been imposed by matter will no longer be tenable. The Creator Himself will dispel this planetary restraining influence and henceforth hold all life-forms in appropriate expression through the new definitions of His Love. This will be a profound transition for each and every form identity, a transition of a magnitude we can only begin to suspect.

7.5 Two Avenues

As a collective event, the moment of birth is still a generation away. But individually speaking, this event transcends the limits of space and time and is, in fact, already under way. Our individual birth will take place at the precise moment in linear time when we stop struggling with our rational fear patterns and let ourselves go in the divine

dance of inner direction. We must decide whether we are going to accept the inevitable in a state of love and prepare ourselves accordingly, or hold on in fear to the bitter end. Ultimately these are the only two avenues of response. By the linear time this event takes place, humanity will be polarized according to these two adaptive patterns. All will be decidedly in one camp or the other.

7.6 Love or Fear...

To those of the human race who have turned themselves in to the will of God, the coming interval of non-time will literally expand into eternity. These individuals will be able to experience a lifetime or many lifetimes, in that eternity, while still retaining the option to return to their physical projections as transformed representatives of the Being of Life on Earth. These will be God's co-workers during the period of Planetary Awakening - please, I hope we will read this very carefully. Please, reread the above for it is indeed most important to some of us in this early awakening. Some of us cannot drift upon the currents but rather must come quickly into knowledge.

Others, not so finely tuned to the forces that will be released at that time, will feel great surges of energy, lasting for an indeterminate period. Some few will experience an intense fear and many, dear ones, shall die. Everything in physical form at this time, every soul in every kingdom, will feel something, something incredible, something that according to all the laws of physics ever known or ever to be discovered, could never happen. But there it will be before all senses; an impossible fact, like the babe in the manger, like the unmistakable feeling in our hearts, an incredible vibration of Truth and Love, shimmering, scintillating, awakening every nerve, every capillary, every cell of our planetary bodies.

Whether the individual form identity reading these words right now will be a surviving participant in that event depends upon that with which we identify and how gracefully we are able to align ourselves with God's creative definition. If we can identify with the flow of Life through our essential Planetary Being and release all subjective definitions of who we think we are, we will play our part most joyously in the birthday celebration. God's definition of us in form is much greater than any of us could possibly imagine for ourselves. During this present period of Individual Awakening, the first of the three creative periods, we are being given the opportunity to embrace this true definition as the cornerstone of our existence.

7.7 Unified Collective Consciousness

On the morning of Creation, we will recognize the Unified Collective Consciousness of all Humankind as our own true identity. We will know beyond a shadow of a doubt that we are the bridge between Spirit and Matter, between Creator and Creation, between Life and the forms through which Life flows. If we release the definitions that Matter has set upon us, this is the definition that the Creator will bestow, the definition of Christ Himself!

Can we see ourselves as those of the distant stars do, from

the objective vantage point of the ages, with the eyes of the Star-Maker Himself? To God's Host, our entire history appears as but a gesture of sorts. They see in our passage through the vibrational field of Earth, a gesture that we make, a salute almost, to the energy-retention systems of this particular heavenly body. This is how we express ourselves on this beautiful blue and white world whirling through space as a wondrously blue-green thing of beauty.

7.8 God's Host comes to remind us Who We Are!

At this time in our racial experience, most of us are simply not yet ready to enter into a closer working relationship with them but they will prepare us, during the coming years of revolutions of our planet around the Sun for the time when our collective vibrational patterns are such that we can blend with them on a very large scale.

They are still experimenting with various ways and means of accomplishing their task of awakening but with the increasing ease of direct informational exchange, their work within the currents of our history will probably subside. They hope it will not be necessary to shake us out of our exclusive past-future oriented focus on form through any of the cataclysmic events foretold in our various prophecies. They will use these if they must in order to protect the biosphere of this planet but if we follow through on the information they are clarifying, there is no reason why they should have to resort to such extreme measures. Through these transmissions and through many others like them throughout the Earth, they are supplying us with more than enough information to enable us to restore our own equilibrium.

7.9 We Decide by Ourselves

They are allowing a certain amount of ecological destruction to take place without direct interference because such destruction may help to precipitate a voluntary and cooperative return to a pre-Fall state. We must come to understand that we structure these things ourselves and not of outside doing. This would be far more meaningful than a return that is forced upon us. A self-initiated awakening will greatly enhance our ability to restore the Earth's ecological harmony. Consequently, at this time, they are confining their help as much as is possible to the provision of information and to the development of conceptual clarity.

Meanwhile, there are many among us who will, as time passes, experience one by one the necessary psychological transformation and enter into a conscious working relationship with those of them in a state of grace. During this coming period they will be largely occupied with the conceptual education of our species along with pointing out that which we are bringing in our own creation. We must witness the errors of our creation in order to collectively form perfection and balance in that which we are now creating.

As they move along here in this present cycle, they will be withdrawing their activity on conceptual levels and focus more directly on physical and emotional levels. This is where the real work needs to be accomplished. The

establishment of a conducive conceptual climate however, is a prerequisite.

As they move along they shall be integrating past, current and future perceptions so that we can look at the patterns in somewhat less confusion. May we abide together, we and they, that clarity becomes our focus and ability to comprehend is granted through grace of Creator. It is a joy to share in this wondrous experience upon the waves of the universe.

8. Conclusions

We human beings are mental beings who are living in the cosmic vacuum tube of invisibility and projecting our creative desires mentally by imagining, thinking and dreaming. When we embody we become consciousness – God in physical realization. We are bridge between Spirit and Matter, between Creator and Creation and between Life and forms through which Life flows. We are Life givers and Life seeders on this planet.

The only reason we had started incarnations on this beautiful plane millions of years ago was to resolve the issue of relation between consciousness and energy. We have succeeded in our mission and very recently we came to awareness that energy responds to consciousness, that all energy is ours to serve us if we choose so and allow it. With that success all interferers from the other realms are removed so that we can continue our ascension into higher realms together with our planet Earth. In support we got from September 18th, 2007 the new energy with awareness which responds to our consciousness fulfilling every our desire if we allow it.

The universe will soon reach maximum expansion when there will be an interval of non-time so that all laws of creation will be suspended. During that zero time all of biological life will be requested to convey its meaning and there will be redefinition of God's love so there will be no more death.

When center of Spirit merges with the center of the Earth collectivity of human consciousness will awaken to a unified field identity and then we will get Creator's final definition in form – we will be born as Planetary Beings, actually "who we are".

This is time of choosing. *To those of the human race who have turned themselves in to the will of God, the coming interval of non-time will literally expand into eternity. These individuals will be able to experience a lifetime or many lifetimes, in that eternity, while still retaining the option to return to their physical projections as transformed representatives of the Being of Life on Earth.*

Others, not so finely tuned to the forces that will be released at that time, will feel great surges of energy, lasting for an indeterminate period. Some few will experience an intense fear and many shall die.

UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jullich (Germany).

1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover and learn the God's principles and laws of creation.

After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God's creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet.

I am a pioneer, creating with a New Conscious Energy and building a new civilization without electricity.

I've developed the QUANTUM RADIATION BALANCER – the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation.

Thanks to the consistent pursuit of my Leitmotif "The Authority of Truth rather than the Truth of Authority" I have experimentally proved the true atom, cell and particle "ATON" concept. According to the "ATON" concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of the science that is based on the knowledge of the cause.

I wrote two books: "GOD IN THE ATOM" and DODECA 101 LOVE ENERGY which are available on my website: <http://www.teslastyle101.com>

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia). 1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: "Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas". 1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak
