

The True Nature of the Electricity and Secret of Motion, Matter and Inert Gases

Ilija Lakicevic

Semedraz bb, 32300 Gornji Milanovac, Serbia

Abstract: *Electricity is an effect of strain, tension and resistance caused by the energy of desire in the Light of Mind, to divide and extend the balanced unity of the One still Light of Universal Mind into pairs of many divided units of thinking Mind. Electricity performs the "work" of the world by straining toward separateness and multiplicity of units and also by relaxing from such resisted strains and tensions until motion ceases its vibrations by withdrawing into the universal stillness. Motion is imperative between any two imbalanced pressure conditions. The basic underlying principle of motion is in the zero Light of the universal equilibrium, which is the fulcrum of the sex-divided electrical universe of thought waves of two-way motion. Energy is in the stillness of the rest condition, not in the motion. Matter is electric record of thoughts in motion which electric waves are. The office of magnetic poles is to balance and control all divided motion in the universe. Inert gases are seed from which elements of matter spring and to which they return.*

Keywords: electric current, polarization, energy, electric universe, magnetic poles, work, inert gases

1. Introduction

There is belief in science that electric current is rate of flow of electric charge past a point or region, that matter is any substance that has mass and takes up space by having volume, that motion is the phenomenon in which an object changes its position over time, that science is based on empirical knowledge, that there are magnetic lines of force and that there is magnetic component of a wave. All scientific theories are dealing with one side of equation, namely with effects not having a slightest idea about cause of the effects.

I'm going to show how all these conclusions are in disagreements with Nature's ways and to share the right concepts and explanations of all these phenomena.

1) Electric Universe of Simulated Energy

In order to know more dynamically what electricity really is I will define it and then I will amplify my definition by examples.

Electricity is an effect of strain, tension and resistance caused by the energy of desire in the Light of Mind, to divide and extend the balanced unity of the One still Light of Universal Mind into pairs of many divided units of thinking Mind.

When electric strains and tensions cease to oppose each other, electricity ceases to be. Electricity is dual action-reaction. When dual actions-reactions cease to vibrate, electric effect is voided by the one universal condition of rest. Sound vibrations of a harp string are an electrical effect. The electrical vibrations of sound are a division of undivided silence. When sound vibrations cease, silence has "swallowed them up" by voiding them.

The IDEA of the silent harp string note eternally exists. Electrical division into sound manifests the IDEA, but the IDEA belongs to silence, and to silence it returns to be reborn again as a simulation of IDEA.

The two electric pressures formed by the division of the

universal equilibrium have separate offices to fulfill. The negative pressure expands to create space by dividing potential and multiplying volume. Conversely, the positive pressure contracts to multiply potential into solids by dividing volume. *Electricity thus performs the "work" of the world by straining toward separateness and multiplicity of units and also by relaxing from such resisted strains and tensions until motion ceases its vibrations by withdrawing into the universal stillness.* The only "work" performed in this universe is the "work" caused by the strains and tensions of electrically divided matter in motion.

2) Matter Moves only to Seek Rest and Balance

Matter neither repels nor attracts matter. All matter which is out of balance with its environment, volume for volume - or potential for potential - will move ONLY to seek rest in an equipotential environment of equal volume displacement. That is why air or ocean currents move, and for no other reason than to seek their lost equilibrium. And while they move they will perform "work" - and the measure of their power to perform "work" is the measure of their unbalance. You see, herein lies the very "secret" of perpetual motion. To say there is no such ability is like saying "there is no God". Not only is perpetual motion possible, it is mandatory once anything has been originally placed into motion all impacting fragments are structured to cause unbalance every time balance is attained.

Earth's tides are not "pulled" by the moon. Curvature in the pressures of their wave fields which control their balance is the cause of that. And that explains why tides are thrust away from the face of the earth opposite to that of the moon, as well as being thrust toward the moon on its near face. I would hope that you ones are beginning to perceive from a different perspective for almost all of the projected scientific data is incorrect and it gives us reason to "marvel" that you ones accomplish anything at all. It does, however, explain why you are so limited - you cannot go far into the ethers until you outgrow the perceptions which limit you - from fuel and thrust, to direction and understanding of thought/matter.

When tides rise they will perform "work", and they will also perform "work" when they fall, but "work" will cease being performed the moment the motion of either rising or falling ceases. Likewise, the waterfall will perform "work" while falling but not when waters cease their movement. However, once in motion and unbalanced - the whole cycle will be finished or the "rest" will not be able to come within the cycle. Think in perspective now: what happens if instead of a cliff "fall" you have a dam - do you see that the water would become "still" and not "fall"?

A storage battery will perform "work" while being "charged" with increasingly high potential pressures which oppose each other, and it will perform an equal amount while it is discharging to seek the equilibrium pressure which will unite the divided two. When fully discharged it will cease performing "work" because it has found balance in its zero and can no longer move.

In a live electric battery, or in its chemical counterpart such as sodium and chlorine, there are three equators: the central dividing one being the fulcrum of the two extended ones. When the two extended equators of the live electric battery withdraw into their balancing one the battery is "dead". They have found their eternal stillness.

Likewise their chemical counterparts have ceased to exist as separate elements when they withdraw into their sodium chloride fulcrum. Even though sodium and chlorine have disappeared they still are, for they will as surely reappear as night will follow day.

To recharge the battery the one dividing equator has to be extended in opposite directions until there are again three before motion is possible. ***Motion is then not only possible but imperative.***

The heartbeat of the universe is eternal. So long as the universal heartbeat continues, every divided pair and every unit of every divided pair will reappear to express life as surely as it will again disappear in eternal repetitions to express death.

"Work" is not performed by the attraction of matter for matter, nor because of a condition of matter, such as heat, which is presumed to be energy. *"Work" is performed solely because the electric current, which divides a motionless condition into two unbalanced conditions, sets up two oppositely straining tensions or unrest which must move to release those tensions.*

3) Duality of Electric Effect

No effect can be produced unless there is an equal opposite effect to work with it. Electrical workers are two, which pull in opposite directions to perform that effect called "work." Effect is therefore two-way, just as "work" is performed two-ways. The two electric workers are like two men on opposite ends of a double saw which pull and thrust in opposite directions from opposite ends to perform the "work" of sawing through a tree.

Or they are like two compression and expansion ends of a piston which pull and thrust in opposite directions

sequentially, to move, and to perform "work" while they move, in either opposed direction. Each end of the saw, or piston, is helpless without the other.

Heat, for example, is one end of the cosmic piston. Cold is the other end. Just so long as these two conditions exist, the piston of interchanging motion will continue to expand and contract sequentially. When each has found equilibrium by voiding the other, motion will immediately cease and "work" can no longer be performed.

Science says that cold is "less heat". Another boo-boo. One might as appropriately say that female is less male, or that south is less north. It is this kind of deductive reasoning that disallows your forward growth. You are going to find that almost all of the concepts if "reversed" would be more accurate in almost all instances. What you believe to be TRUE is simply NOT.

Science says also that there is no compensating uphill flow of energy to balance its downhill flow. There is an uphill flow. Otherwise, a downhill flow ***would be totally impossible.***

Every wave is a compression-expansion pump. The whole universe is a giant pump. The two-way piston of the universal pump constitutes the universal heartbeat. ***A one-way universe is as impossible as a one-way pump is impossible.***

The compressed condition of this universe is exactly equal to the expanded condition. The compressed condition is gravitation. The expanded condition is radiation. ***Gravitation and radiation are equal opposites.*** Each is helpless without the other. In fact, each condition is impossible to produce without simultaneously producing the other. Heat is the effect of multiplied resistance to the compression of gravitation. Cold is the effect of the opposite strain of resistance to the evacuation, or emptiness, which results from the expansion of radiation.

There is as much cold in the great expanses of space as there is heat in the compressed suns in all of this universe.

There is not one ampere of difference between these two opposite conditions of the electric workers in the whole universe, nor is there one milligram of weight in it which is not balanced between the two. *This universe of electric waves is divided into wave fields. Each wave field is equally divided by contraction of gravitation and expansion of radiation.* The potential of solids in a wave field is equally compensated by the potential of space which surrounds the solids.

It is as impossible to unequalize these two conditions in any wave field, or produce either one of them separately without simultaneously producing the other, as it would be to polarize one end of a bar magnet without producing an equal pole of opposition at the other end.

This wave universe is divided into wave fields. Each wave field is an electric battery which is forever being charged by the centripetal polarizing power of gravitation and

discharged by the centrifugal depolarizing power of radiation. This process is a manifestation of the life-death, growth-decay principle which is ever present in every effect of motion in Nature, without exception. Together they constitute the electric action-reaction sequences without which there would be no universe.

It is not true to Nature, therefore, to say that either heat, cold, compression, expansion, or any other expression of motion is energy. If the power to cause motion is in the balanced state of rest, it necessarily follows that energy is in the stillness of rest, and not in motion, which is effect of cause.

The Mind of the Creator is the fulcrum from which the wave lever of Mind thinking extends to express creative the energy of Creative Mind. Thought waves cannot therefore, be the energy which caused them to become thought waves.

Any lever is powerless without a fulcrum. The power to move lies in the fulcrum which never moves.

All motion starts from a point of rest, seeks a point of rest and returns in the reverse direction to its starting point of rest. Test this fact by throwing a ball in the air, breathing in and out, pulling a chain, or walking.

Electrical effects of motion are not energy. Matter in motion is a marionette on the end of two Mind-controlled electric strings.

4) What is the Work of the Universe?

The only "work" reformed in this universe is the "work" of recording thought forms of Mind imagining into positively **charging** bodies, which are expressing the vitalizing half of the life-death cycle of creating bodies - and into negatively **discharging** bodies, which are expressing the devitalizing other half of that cycle. That is the only work there is to do in all Creation, for God records His concentrative-decenterative thinking in the electric actions-reactions of living-dying bodies which appear and disappear in sequential cycles.

Creation of bodies is the only work that Man does. Every body created by God or Man appears from invisible and disappears into that same stillness of its source, to reappear, periodically, in life-death, growth-decay cycles forever.

All bodies manifest eternal IDEA by eternally repeating their manifestations of IDEA in continuous cycles, which have no beginnings or endings. To exemplify: cold generates - generation contracts -contraction heats - heat radiates - radiation expands and expansion cools.

Sound - for another example - is a body of interchanging motion which appears from silence and returns to it. The silent harp string is the fulcrum of energy from which the moving harp string extends as a vibrating lever of motion to manifest the IDEA of a musical tone in life-death cycles.

5) Polarized, Sex-conditioned, Pulsing, Thought Wave Universe

Science has for years and years been searching for some simple underlying basic principle of motivation which is present in every effect of motion. Mathematicians have hoped to find it and reduce it to a basic formula. Physicists have sought for it in the hope of thus discovering the life principle.

Science has never found it, and never will find it so long as it is sought for in either matter or motion.

That elusive secret is to be found only in the zero Light of the universal equilibrium, which is the fulcrum of the sex-divided electrical universe of thought waves of two-way motion.

That forever hidden secret of the ages is the **divider** of the ONE zero into seeming TWO extended zeros. And it is the multiplier of the TWO into countless TWOS.

The name of that great divider of rest into two-way motion is **POLARITY**.

Polarity is the controller - the measurer - and the surveyor of intensity of desire in Mind for the actions-reactions needed for creative expression. Polarity extends its surveyed measure of desire from a zero point of rest in the universal Light, to two extended zero points of rest where motion reverses its **direction**, its **polarity** and its **condition**.

These two points of stillness where motion reverses from one opposite pressure condition to the other are what science calls magnetic poles. The office of magnetic poles is to balance and control all divided motion in the universe.

Every particle of matter in the universe, whether atom or giant sun, is controlled by a still centering point of magnetic Light. The two extended poles of that still Light measure the intensity of desire which motivates those extensions from their source of energy in the still Light. Polarity vitalizes and devitalizes - charges and discharges - gravitates and radiates - inbreathes and outbreathes - lives and dies - appears and disappears - compresses and expands - heats and cools - grows and decays - integrates and disintegrates - and solidifies and vaporizes by its electric actions-reactions which divide the ONE into countless pairs of separate ones.

When Man breathes in, he polarizes his body. He vitalizes it into wakeful action and an awareness of sensation. He charges his body with higher electrical potential. He manifests life.

When Man breathes out, he depolarizes his body. He devitalizes it into sleepy inaction and lessening awareness of sensation. He discharges his body by lowering its potential. He manifests death.

6) Polarity Periodicity

Nature is engaged in the making of but one form - the cube-sphere - which means the same as though we said female-male of Man. The sphere is the positive centering sun. The

cube is the invisible surrounding wave field. *All matter is thus divided into positive solids surrounded by negative space.*

As matter begins its formation into spheres its first shape is disc-like, for it begins as the base of a cone. In a series of efforts which constitute the octave wave, the first disc-like effort gradually prolates until the perfect sphere is formed at wave amplitude. ***This is the process by means of which "matter emerges from space".***

During this process the balance poles which control all matter move gradually toward the pole of rotation. When the sphere is perfected, as it finally is at carbon, the two poles coincide with the pole of rotation and the equator of the perfected sphere is 90 degrees from the wave's axis. Likewise, the wave field becomes a true cube. Likewise, any element which reached its true sphere status will crystallize as a true cube. Likewise, any divided pairs of elements which unite as one on wave amplitude - such as sodium and chlorine - will crystallize in the true cube shape of its wave field.

Conversely, as true spheres oblate, the two balancing poles move away from the pole of rotation and toward the wave axis, until depolarization is completed and magnetic poles disappear in the plane of the wave axis. ***This is the manner in which "space swallows up matter".***

The mechanics of this process of polarization and depolarization, under the guiding control of ***two pairs of magnetic poles*** has already been more fully described [1-20]. This process of polarization takes place with increasing intensity for one half of every cycle, the ether of one breath, the cycle of a day, the year, or a lifetime.

A man of forty will have reached his fully polarized strength to manifest life in the first half of his life-death cycle. Depolarization then assumes control as polarity reverses at the wave amplitude of Man's life cycle. Devitalization then begins and from there on Man manifests the death half of the cycle.

This process takes place in every creating particle of matter or any combination of particles, whether in Man, ant, electron, or nebula. As polarization ***increases*** in intensity, the strains and tensions set up by the desire of opposite of polarity to pull away from each other increase in their intensity. This fact is exactly the opposite effect from conclusion stated in the Coulomb Law.

As polarization decreases, the strains and tensions of electric opposition relax, until polarity disappears in the rest condition of the equipotential plane of the wave axis. This fact should not be interpreted as opposite polarities attracting each other, for depolarization means that the ability to oppose lessens as each pole voids the other in the rest condition, but they still pull away from each other until their end. The entire process of polarization and depolarization of every action-reaction of Nature could well be described as a lever reaching out in opposite directions from its fulcrum until it could reach no farther, then reversing those directions and ***unwillingly withdrawing into its fulcrum*** where motion

ceases to again begin, and again reverse.

7) So-called Magnetic Lies of Force

One of the great illusions of Nature which has deceived scientific observers is the principle of curvature, which is everywhere present in ever changing effect in every wave field, and in wave fields within wave fields throughout the universe. Wave fields are bounded by planes of zero curvature, which act as mirrors to reverse all radiation which reaches out to these wave field boundaries.

An example of such a plane of zero curvature is the equator of a bar magnet. Iron filings reaching out from either pole will curve gradually in the ever changing pressure gradients which surround the poles. Science mistakenly calls these curved lines magnetic lines of force. See figures 1, 2, 3, 4 and 5.

Figure 1: As poles flatten, equators lengthen

Figure 2: Exemplifying the perpetual interrelationship between matter and anti-matter, as shown in Fig. 1, which gives and regives to each other for perpetual sequences of rebirths into each other. The outstanding characteristic feature of Nature is repetition. Life and death are other names for it. Reincarnation is still another name for it.

Figure 3: Illustration of the principle of projection of Mind-desire energy into pairs of tones to create the nine octaves of

tones, which constitute Nature. The spiral nebulae – seen edgewise – which occupies the amplitude position in the wave current corresponds with the loop of force which centers every polarized unit of an electric current

Figure 4: Nature is forever dividing the unity of father-motherhood into sex divided fathers and mothers which unite into the oneness of father-motherhood to multiply sex divided fathers and mothers

Figure 5: Illustration of the Nature's reproductive process. Curvature for divided pairs must reverse for united pairs. Two equators must become one and two centers of gravity must also be one.

When these curved lines reach the equator which divides the two poles, they reverse and *repeat* their curvature as though reflected by a mirror.

There are no magnetic lines of force in Nature. These so called curved lines are the radii of the spheres and spheroids which constitute this radial universe of prolating and oblatting matter. Radiation is an electric effect. It is not

magnetic. Pressures which surround spheres and spheroids vary greatly in their equi-potential pressure gradients. As radiation is maximum at solar or planetary equators and gravitation is maximum at their poles, the pressure gradients surrounding spheres or spheroids vary in their curvature to conform to these pressures.

Gravitation and radiation are both radial. Radii of either the inward direction of gravity, or the outward direction of radiation, cannot be projected through varying pressures without bending to conform to the varying densities of varying pressure gradients.

Just as a stick, when thrust into water seems to suddenly break at the dividing plane of the two different densities, so likewise do the radii of incoming and outgoing light rays seemingly bend gradually as pressures gradually become more or less dense.

This divided universe is curved. Its two opposed conditions of gravitation and radiation are oppositely curved. Each has a system of curvature of its own and each system is opposed to the other, for their purposes are opposed.

The system of gravity curvature is evidenced in spheroidal and ellipsoidal layers of equipotential pressure gradients which curve around gravity centers. The surface of the earth is a good example. The curvature of gravitation is centripetal. It is controlled by the north-south magnetic poles. Its office is to extend bodies in motion from their wave axes to their wave amplitudes.

The system of radial curvature is evidenced in ellipsoidal layers of equipotential pressure gradients which extend radially away from gravity centers. Radial curvature has the same relation to the equators of suns and planets as gravity curvature has to their poles of rotation.

Good examples of radial curvature are the rings of Saturn, the Dumbbell Nebula, (Fig. 6) and the sun's corona.

Figure 6: Illustration of the death principle in all matter. Spheres are created by compressing rings to form them. Spheres are then disintegrated by projecting rings from them until a black hole surrounds their axis of rotation and they gradually expand until they eventually disappear into their cathodes

The system of radial curvature is centrifugal. It is controlled by two as yet unknown magnetic poles which will be amply described later as east-west poles. Then we will follow up

with a discussion regarding the interrelations these two pairs of poles.

The entire matter of curvature is one of the many optical illusions which Nature is completely made up of. Curved pressure gradients act as lenses to bend radiating light outward as they pass through their concavity from an inward to an outward direction. The reverse takes place as gravitating rays pass through the convexity of light lenses from the outward to the inward direction.

Polarity surveys and measures these pressures, but electricity alone projects and reacts the light which causes these illusions. The supposition that magnetism is a mysterious force of some kind which attracts and repels has helped to build these wrong conclusions, which the senses have deceived observers into believing. We will utilize more detail on this subject if it appears necessary at a later time. I don't wish to delete anything of value but neither can I linger on one facet to the exclusion of the whole. We will get through this as best we can.

8) Begins and Ends

The electric current begins and ends at cathodes. Cathodes are still points in the zero universe from which the energy of desire for creation is expressed. Chemically, cathodes are the inert gases of the octaves, which are not elements, for they will not mix with them. Here I share charts 1 and 2 are first in the "figures" for ready reference. Those charts will be absolutely necessary when I get to the subject of atomic energy. Oh, didn't you know you were going to get a degree in nuclear physics? How about astrophysics? Quantum physics? All the above!!

The inert gases of the octaves are the seed from which the elements spring, and to which they return. From the spectrum standpoint they are white light from which all colors extend when put under electric strain and to which they return when the strain ceases. From the tonal point of view they are the keynotes of the octave from which one can never escape knowledge of their presence in every tonal harmony. From the mathematical point of view they are the zero of the whole octave which will be further discussed. From the geometric form point of view, which its basis for motion gives it, the inert gas consists of four rings, one within the other.

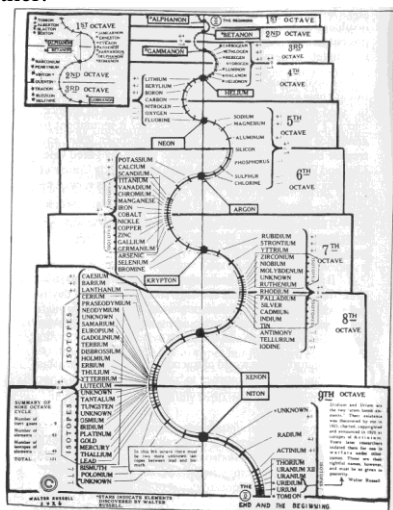

Figure 7: The nine octaves of the elements of matter manifest the polarization principle for producing dynamic action by extending two equators from a fulcrum pint of rest. These two equators arise by gyroscopic action, multiplied centripetally, in four consecutive efforts to an amplitude plane which is 90 degrees from the zero planes of the inert gases. They then descend in four decentrative depolarizing stages to disappear in their inert gases and again reappear from them in endless cycles throughout eternity. Thus do all bodies appear and disappear – to again reappear forever.

Magnetic poles are "created" by coiling a wire around a bar of steel in such a manner that the compressing rings of the electric current will produce these so called magnetic poles at the ends of a bar of steel. That is what electricity does. It produces a potential of electric motion around a still center, but the still center is gravity. To be correct **these poles should be called gravity poles**, connected by a gravity shaft. They control the sex-division of Nature. The magnetic Light is sexless for it is in equilibrium. Its electric division into pairs creates the dual sex condition which we know as male and female. When these two conditions unite they become ONE. Gravity poles are TWO, when divided by the electric current. When they unite they become ONE CENTER OF GRAVITY. You have always called them magnetic poles when they were TWO but when those two were united we have then called them a center of gravity, and that is NOT consistent.

Electricity, therefore, produced the poles by compressing the holes out of the rings. They did not come there in any other way. Electric motion does not create gravity poles. It merely locates existent points and makes them identifiable. It makes the invisible become seemingly visible. However, it never occurred to early observers that the division of God's stillness into sexed pairs would have to have a measure of balanced control over such a division. In other words, if the one condition of balanced stillness in the zero universe is divided into two unbalanced conditions, it is then necessary to have two controlling points of stillness around which motion can spin while thus divided.

The two poles are, therefore, poles of still magnetic Light around which the divided electric pairs can manifest their light of motion. The two poles, thus divided, have within them the desire to be united as one by uniting the two divided pairs of conditions as one. In this manner the two poles, which have united, become the common center of gravity of the whole gravity shaft of mass controlled by it. Magnetic poles of gravity are still centers which balance and control the electric motion which surrounds them. Electric motion can be insulated from all other electric motion, but magnetic polarity, or the gravity center where poles unite as one, cannot be insulated from anything, for they are of the omnipresent stillness upon which the universe of motion is based.

Neither polarity nor gravity are "created" by electricity. They merely become points which can be located in the omnipresent stillness. When, therefore, we say that electricity creates the condition of gravity, we mean that electric motion is spinning around a point in the omnipresent vacuum which controls that motion.

Polarity begins as sexless unity as the cathode, which is the location for the inert gases in the octaves of elements. From there it is divided into sex-conditioned pairs as they are extended centripetally toward anodes. They again unite as one sexless unity at amplitude wave positions where they collide and become the two hemispheres of an incandescent microscopic, or macrocosmic, sun, which corresponds to a "loop of force" in an electric current.

Figure 8: Nature arranges her sex divisions in unit pairs in such a manner that opposite sexes can unite as one. Nature will not allow man to reverse this order by turning one unit of electric current, or wave, around to make sex unity impossible

The order of creation, as expressed by the electric wave, electric current, or magnet is as follows: RED - 0 - BLUE RED - 0 - BLUE RED - 0 - BLUE RED - 0 - BLUE. Fig. 8-A is a series of bar magnets placed in this order. You cannot take one of these bar magnets out of this order and

reverse its ends - as shown in B. If you do so, you have two males and two females where the normal mates of opposite sexes should be. This would result in the following impossible order RED - 0 - BLUE BLUE - 0 - RED RED - 0 - BLUE.

Electricity spins around all centers in this whole universe in one direction only. Fig. 8-C represents this universal direction of electric spinning around the same series of bar magnets. That one direction is clockwise, or anticlockwise, according to the position of the observer. If you look at the spiral turning from one end, in the direction of other end, you will see a clockwise direction. If you look at it by reversing your position you see it anticlockwise. The direction of turning does not change because you change. You cannot pick out one half of a cycle, however, and reverse it as indicated in D.

The most important new thought in relation to electricity is that every action creates only *one cycle of an electric current. That one cycle is the electric record of that action.* The omnipresence - or Oneness of the universe - repeats that record throughout the universe. The motion of your little finger, or of a dynamite blast, will create one cycle for each action, for electricity is the recorder of Mind-thought, and Mind thoughts are consecutive.

Future laboratory techniques should eliminate from two-thirds to nine-tenths of its wiring. This will follow a greater knowledge of the geometry and mathematics of space, and especially the tonal nature of octave waves, to make it possible for cathodes to find their anodes without wires, as they do in Nature. The cylindrical solenoids of today should be entirely eliminated, especially where they encase anodes and prevent their expression of power by the way of equators. Vacuum tubes for every purpose should be re-designed to conform with the action-reaction mathematics of the cycle, which accelerates and decelerates in cube ratio, as a potential is multiplied for one half of the cycle, and divided for the other half. The cylindrical coil ignores this law of Nature and makes very clumsy affairs of step-up transformers and a tremendous complexity in electronic machines, which is entirely unnecessary.

It is said that storms in the Northern Hemisphere are anti-clockwise and are clockwise in the Southern Hemisphere. That is because you are looking down upon it from one end, then you are looking up into it from the other end. *You would see the same effect if you look into the spiral of your bath tub drain, then look up from under it.*

Fig. 8-E illustrates the fact that you cannot pick out one section of a wave, or of an electric current, and reverse that one section. If you do this you will reverse direction of motion, and the universal division of sexed pairs. Nature will not allow this to take place. See 8-F.

To account for this unnatural phenomena The Coulomb Law was adopted, which says that opposites attract, meaning oppositely sexed mates; and likes repel, meaning similarly sexed pairs. This law is *invalid*, for oppositely sexed mates *do not attract*. They are forced into collision by the electric action of dividing Oneness into unit pairs. The instant that

they do collide they use their utmost endeavors to re-attain the sex divided condition by recharging their discharged condition. Nature helps in this process by assisting to recharge with every heartbeat, every breathing cycle, and the food one eats.

Space will not allow further amplification of this process in the nature of electricity, for enough has already been given in the high points of essentials to serve the purpose of this book. It is not well, however, to leave this mystery of how "magnetism" picks up iron nails and "attracts" steel needles, unexplained, for the entire electrical engineering world is paying heavily for lack of this understanding in many ways, the more expensive one being the vast wastage caused by building improper coils, solenoids, armatures, step-up, step-down transformers and electronic tubes.

The element iron - like cobalt - is formed almost at the very amplitude of the wave. Its position is almost at the collision point where mates find unity in each other. Also, iron is on the red side of the spectrum division, and the red side bores within the blue when they seek unity. Nickel, cobalt and copper are on the blue side of the same octave. Because of this position in the wave, iron and cobalt are so constructed under high compression and high melting points that they "remember" the motion of the electric coil which borned them, even after that cod is removed. The spinning effect still continues within them, and will still continue for many years unless they are heated to a sufficiently high temperature to explode the power of electric potential, which these poles have accumulated. Conversely, cold multiplies that memory which heat destroys. At absolute zero, polarity and conductivity are both more intense. It should be sufficiently convincing that the "magnetism" attributed to this electric effect could not be an existent force, for if it were it could not be destroyed by cold. Factually, *cold multiplies electric potential, and heat divides*. This fact of Nature should bring to an end this unnatural concept which attributes electrical effects to something other than electricity.

Copper and nickel occupy the same relation on the blue side of their octave that iron and cobalt occupy on the red side, yet neither of them are able to retain the memory of the electric coil which borned them. The reason for that is because the blue side seeks the outside of mass and, therefore, has lower densities, with consequent less power to retain a "memory" of the motion.

Regarding the compass needle which seeks the point of north at one end and the point of south at the other end, the principle is the same. Every compass needle is a miniature bar magnet. If you place a lot of iron filings on paper, in the familiar way shown in all text books, and shake them over a magnet, those findings will form curved lines. These curved lines are called magnetic lines of force on that paper, and also in the so-called magnetic field of a planet. They are not magnetic lines of force. They are merely the curved planes of opposing pressures which electricity is causing in its efforts to compress. The vortex of gravity which is in the compass needle, will follow these pressures. Every effect of motion in this universe is an electrical effect caused by an electrical force acting under the control of the invisible

universe. The invisible universe entirely dominates and controls the visible universe, but *motion* is entirely electric.

So, in conclusion, we have briefly given the essentials of the construction of matter and the true nature of electricity, gravitation, radiation, radioactivity and magnetism. Even though the entire process is as simple as we stated it in a paragraph prior to this, its aspects are many, for its effects and its divisions are many. We have not departed from the pattern laid down in that paragraph during this narrative, nor do we depart from it in any writings. Beyond that is still the need for further volumes, but this simple principle cannot be exceeded, no matter how many volumes are needed for greater amplification of essentials.

There are still many essentials which we have not touched upon, such as space geometry and mathematics which determine the pressures of the chemical elements, in order to master and control the principle of transmutation, which is now right at our doors, and the control of drought. Even in all of these it is impossible to exceed the one principle laid down in that paragraph in any effect of motion in this entire universe.

You have forgotten the message in point? Well, let me refresh you a bit with a couple or more paragraphs to which I refer that are all part of the same.

In the heart of every man is the desire for love - for happiness, peace and prosperity. In the hearts of nations of men is the One-World desire for international unity. This is why it is so easy to sell the lies unto humanity for the desire for unity is so strong and each perceives that "another" must have the answer to accomplishment of this unity. Universal Brotherhood is the ultimate world-goal. How far are you from that goal? The distance is far ahead for the human race. Its distance is measurable only by the yardstick of LOVE, and love has not yet entered the doorway of human relations, and will not until unity opens the door for it to come in. You tout the words and you have your little gatherings and big gatherings and pronounce the incorrect assumptions and then go forth and practice that which is NOT love but physical manifestations of projections of would-be controllers. You go out and effort to MAKE-LOVE and that is NOT LOVE. THAT IS PHYSICAL MISUSE OF THE PHYSICAL ASPECTS OF GOD-GIFT IN MOST INSTANCES RESULTING IN MORE GROSS MISPERCEPTIONS AND ILL-BEGOTTEN ACTIONS.

Unity means Oneness. Unity balances the mate-hood of all pairs of people and equalizes their transactions in giving and regiving. Civilization has not yet progressed to the point where unity, through the giving and regiving of Love, can even comprehended by more than a few of man's millions of beings.

Man's greatest lesson is to learn how to give. You are still in the barbarian age of TAKING - of even taking life from before birth to snuffing out of the aged. The Spiritual Age is dawning, however. Its doors are slightly ajar, but that is all, for your World-House is erected upon the sands of disunity and the thrust is to further scatter and separate you. The product of disunity is FEAR. A house divided against itself

by disunity and fear must fall. Peace, happiness and prosperity cannot enter a divided house of fear.

If you now ask when peace, happiness and prosperity will come to Man, I say to you that it will come when the Light of Love unites all Men as ONE, and that shall come to pass only when Man ceases to create FEAR. So, brothers, how far do YOU think Mankind is from finding direction and unity? The entire thrust of the Elite would-be rulers is to tear you apart THROUGH TERROR AND FEAR!

The time has come in Man's unfolding when he should have more knowledge of the nature of this electric universe of motion. He has never truly known it, for he has but sensed its shadow. The real meaning of substance has never been known by Man for that which it is. He only knows it for WHAT HE SENSES IT TO BE.

Actually you live in two universes - the invisible zero universe of CAUSE, and the visible universe of EFFECT. You have sensed the EFFECT and believed in its reality. *You have never yet come to know the universe of CAUSE. It is time that you begin to KNOW God's invisible universe which is in absolute control of the visible universe.* Man will never solve the riddle of the universe until he fully knows and comprehends the zero universe which he can in no way hear or see. He can know it, however, and in so knowing he can, likewise, know God. He can even prove the fact of the omnipresent God in his laboratory. Nor shall man ever solve the riddle of his own Self - his own Identity, until he knows that he, himself, is as eternal as God is eternal. When Man knows that he is Mind and that his body is his Mind-Creation, as the whole universal body is the Mind-Creation of God, he will then know what the consummate mystic of two thousand years ago meant when He said: "I and My Father are ONE."

9) Nature of the Electric Current

Let me now build up the nature of the electric current to make its multiplying and dividing two-way principle more clearly understood. The very first principle to make clear is that electricity cannot run in a straight line. It always spirals around a hole in one direction to create its two-way effect. An electric current on a straight wire does not run through the wire in a straight line, it spirals around on its surface. Now all of you good people who are familiar with a Tesla Coil know this as fact. In the coil, however, it spirals both through the spiraling wire and around the outside of the wire in addition. It is all the same in effect but perhaps a better visualization tool. There is always a hole in the center of the wire. A current strong enough to fill the whole wire would melt it. A still stronger current would vaporize it into gases.

This can be demonstrated by taking a clock spring of closely twisted wire and pulling it apart. You will see it coiling around its axis of gravity like a spirally whirling cone. That is electricity at work which you see spirally whirling around its centering hole.

Now consider the wave shaft itself. Motion whirls around that centering hole in four pairs of cones to every cycle. That is where electricity multiplies its terrific power to compress matter in order to create the explosives of which this entire

universe consists. The wave is REPEATED in cycles, but each wave cycle is a series of four conical pairs.

The first essential for you to completely understand is the fact that there is always a hole in all matter and in every part of an electric current, except where collisions occur between pairs to destroy them by breaking them up into spiral ring systems. The other essential fact is that cycles pulses in two-way compression-expansion sequences to live and die. Then they must expand into the four ring formations of their cathodes to live and die. It is an extremely interesting and very simple process which you must thoroughly know, for there is nothing else beyond it to know.

Every action in Nature repeats that one formula, from your thinking, to your breathing. Because of its great basic import we will leave no stones unturned to have you fully comprehend that master key of wave mechanics and space geometry which could make a new world of science if properly applied, and a new destiny of your own commanding if you apply it understandingly to every decision which you must make.

Helium, for example, is the inert gas record of the carbon octave. If you "electrocute" carbon by a million volt current the carbon will return to its cathode birthplace as helium to again become carbon. Likewise, if your body is electrocuted it will return to its eternal record of you to born a new body of you.

There are nine of these inert gases in Nature, as you will see by the nine stringed harp of the universe. The only difference in their structure is that each consecutive inert gas, from one to nine, is smaller than its predecessor, for each octave is a multiplication of its predecessor. We will get to more fully describing the inert gases as bridges between Man and God.

I am now going to dig up some examples to show you and please understand, readers, that they will not make sequential sense as to their numberings but I am going to utilize that which has already been beautifully done by Walter Russell and we will move on with his numbering system, please. Except for diagrams it will be too difficult to visualize that of which I speak.

Figure 9: Three examples of tonal rhythms of the electric current. Every cycle of an electric current is complete octave of four pairs and an inert gas keynote. All motion in Nature is tonal and rhythmic. Its rhythms are geometrically and mathematically cube based.

The upper diagram, marked A - A, represents the creation of an octave of tones, beginning with the inert gas of four motionless rings, centered by the stillness of universal energy, to act as cathodes at both ends. This pair of four rings divide and extend their pairs of four rings toward approaching mates. Electric compression causes the rings to begin to spin, then to become smaller and turn faster as they approach the plane of collision where all four pairs unite to form a sphere. This represents the centripetal half of the journey which charges, polarizes, heats and multiplies potential. These are the qualities necessary for increasingly vitalized life.

Between the cathodes is the sun of the atom or solar system thus created by the manifested energy which has been projected from its cathode Source, to simulate that energy by motion.

The central diagram, marked B - B, gives the octave names to the four pairs of tones of the carbon octave. The centering sun is marked carbon. Carbon is a united pair. It is a true sphere when hot, and true cube when cold. An equator marks the plane of union of the carbon pair. One hemisphere is on the red side of its wave, and the other hemisphere is on the blue side. The names of the elements are marked under each ring and their places in the spectrum are marked above them.

The lower diagram, marked C - C, represents their place in the tonal octave of the musical scale. The inert gas is the keynote of the electrical octave just as the note of C in the musical scale is the keynote for that octave. The keynote is

omnipresent in all of the elements of matter as well as being omnipresent in the musical scale. By omnipresent we mean that it is in each note as well as its own tone. In music, for example, one is always conscious of the presence of the keynote, no matter which one is being sounded, nor how many of them. In matter, the inert gas is not so mind-consciously aware of its omnipresence but the sudden electrocution of any element, by passing a heavy current through it, will release all of the tones except the eternal keynote. By this process the area of gravity, represented by the hole, is gradually compressed out until the hole is closed up by the united pair and the very dense, hot, solid sphere is the product. The life half of the polarized body, which was created by an effort, comes to an end, and the death half, which requires no effort, begins.

This reversal from maximum compression to the beginning of expansion, and from heat to cold, and from charge to discharge and depolarization, is the most confusing of all phenomena in Nature to the physicist. It is the one thing all observers have missed. Even Einstein missed it. His famous equation of 1905 should have described process of expansion, according to the concept of ever expanding universe. But, it turned out that this equation describes properly process of compression, which was nonexistent according to his invalid concepts. All observers throughout the centuries have failed to see that one direction of motion has produced a two-way effect, which is as applicable to a mathematical equation as it is to a state of motion.

Observe carefully what now happens, *centripetal* force reaches its maximum and begins to die, and *centrifugal* force takes over. Look again at the top diagram in Fig. 9 and carefully note that the four rings of the inert gas are like the four rims of wheel placed within each other, with one common hub. Now note that these four rings become the hub when they are compressed and extended. Observe, also, that the extensions cause the appearance of cones as centripetal force winds the cone bases into a sun at the apex point of collision. Observe this effect also in figures 10 and 11.

Now for the reversal. If you look again at A - A in fig. 9, you will note that the center of the inert gas is the point marked zero in both cathodes. These two points now become the apices of cones instead of the center of cone bases. The shaft of gravity which runs through from zero to zero now begins to open up at the center of the sun (or earth—or cell of your body) and cause it to expand at its equator and flatten at its poles. Rings are then thrown off from the equator which are the bases of cones *whose apices are the zero centers of the cathodes*.

Now look again at these zero points in A - A of Fig. 9. Note when we have indicated cone apices there by faint white tones. If you can now imagine yourself opening up that shaft of gravity in the center of any spherical cell, whether sun or carbon atom, so that the center of the sun becomes the center of cone bases, instead of being their apices, *you will have begun to comprehend a secret that the world has never yet known about the transition from life to death*.

Can you now see how centrifugal force of desire to return to the zero universe of rest, is unwinding that which has been compressed out of it, to let it come back into it? Can you now comprehend the loops of force in an electric current, or giant nebula, as shown in figure 2 and 3?

Figure 10: Complete life-death cycle as manifested in the electric current

Figure 11: Complete life-death cycle as manifested in the heavens

If you now study the ring nebulae of the heavens you can see numerous examples of dying suns. Perhaps the editors will be kind enough to present some within these pages. The Owl Nebula is a very interesting example of an "unwinding" sun. It has a big hole clear through it. The Ring Nebula in Lyra is also interesting to note because what was left of a sun regenerated at the center to repeat throwing off rings until nothing is left. Figure 12 & 13.

Figure 12: All matter from microscopic cells to majestic suns, "unwind" spirally and centrifugally by ejecting rings from the planes of their equators

Figure 13: The centering shaft, around which suns rotate, again compresses another sun into its vortex to repeat the process until its mass disappears as rings. Lyra and Hydrae nebulae are good examples in the stellar system and Saturn exemplifies how planets in our solar system disappear into their zero

A complete explanation of this great pulsing movement, which motivates the universe, need volume instead of mere pages, but if you will follow carefully what is given herein you will have the essence of the profound mystery of the life-death movement of the creation, which the senses of man have not yet fathomed and it will be sufficient to your needs. Scientist will have enough more in-depth detailed information to fill their needs as well, for the ones who are intended to garner the information will find great and abundant information for which they petition. To assist in visualization of the whole process, however, instead of just its parts, I share Fig. 14 which shows a whole carbon octave wave, rather than the electric current confined to a wire. The more you study these diagrams the more you will comprehend them. New thinking is not readily grasped in one reading. Meditation and repeated reading finally reaches your omniscience, *for your Mind really knows all things*, and need but to be awakened to recollect that which it has always known. If you are not yet aware of this fact you will be some day, and the more deeply you desire the coming of that glorious day, the more quickly it will come.

Figure 14: Complete octave of the carbon rings, as manifested in the wave

Figure 15: Every thought and action in this universe is centered by its energy Source, which controls its actions and thoughts from within and balances them from without by two extensions of that center. These extended poles are the ends of gravity shaft around which all masses rotate under true circular control. A – represents a spinning top, B – the Earth's orbit, C – a wheel with a shaft off center, D – a seesaw. See text.

The most important and direct reason why mankind should comprehend the way the Creator works in this respect, is because this book is being written to demonstrate that man cannot violate God's orderly, rhythmic processes of nature without paying a price which is equal in measure to the violation. Atomic fission is a violent abnormalcy for the rhythm of the environment necessary for man. This we must show electrically, chemically and in other ways which man understands by laboratory work, for morals in Nature do not have a metaphysical basis, nor even an ethical one. The behavior of all creating things is determined by their Source in the zero universe. These are the things which man, who believes in free will to do so as he chooses, must know. For this reason, we must convincingly show him how close to

God man is *without having known it*. That we must do in language and diagrams which are familiar, and acceptable, to science. A metaphysical or emotional language used with moral persuasion, in a plea to cease this terrific violation, would have no effect upon industry, government or science whose need for a life-saving fuel is great, unless accompanied with scientific conviction that such procedure is in defiance of Cosmic law, which will not allow such defiance. This volume is necessarily too brief for expanded detail. Since we must, therefore, keep to the point at issue, we will save much space by telling you briefly right here what the following pages are to reveal in respect to vital knowledge, which no man on earth today even suspects, and, to our knowledge, only one energy entity of all the past ages has fully known and told to a world, which crucified Him because of it. Bear in mind that we shall not deal in abstractions, nor theory, nor affirmations, even though such affirmations may be admitted truths.

The time must eventually come when man must know where God is at every moment in respect to himself. He must completely understand how God controls every action and desire of all living things, from man to fungus cell, or from galaxy to electron, during their entire journeys from their beginnings in Him to their endings in Him. THESE ARE THE UNKNOWN THINGS WHICH UNFOLDING MAN MUST KNOW, BEFORE HE CAN BEGIN TO MANIFEST HIS OWN DIVINE INHERITANCE AS AN OMNISCIANT AND OMNIPOTENT BEING.

2. Conclusions

Electricity is an effect of strain, tension and resistance caused by the energy of desire in the Light of Mind, to divide and extend the balanced unity of the One still Light of Universal Mind into pairs of many divided units of thinking Mind.

The power to cause motion is in the balanced state of rest, so that energy is in the stillness of rest and not in motion, which is effect of cause.

The invisible universe is in absolute control of the visible. The invisible universe dominates and controls all motion by magnetic division into cube wave-fields of zero curvature, beyond which no moving thing can pass. It can, however, repeat itself in neighboring wave-fields, but always in reverse, as mirrors reverse. The geometry of the zero universe is based upon the cube and cube sections. Their planes are of zero curvature and they reflect their forms in matter in crystal structures, which are the only forms of zero curvature in Nature.

All motion in the entire electric universe is curved. The curved universe of matured form is based upon the sphere. The sphere is a compressed cube. The sphere is a series of true circles no matter where it may be divided into sections by cutting through it in one plane, anywhere.

All motion is equally compressed in respect to gravity, therefore, all motion is in true gravity centered circles, which multiply into spheres, and again divide into true circles.

The Source of energy which creates true circles is at their very center. The Source of all energy is the Creator. All motion of every nature, whether of thought or action, spins in true circular control around the omnipotent Creator of that motion and in planes of 90 degrees from a shaft of any extension of motion.

No man, nor creating thing, can in the least way become off-center from God, or can his orbit around God be aught, at any time, than a true circle, even though its seeming orbit is an ellipse. We think of orbits of planets as being elliptical. And so they seem, but such illusions in Nature are multitudinous, and must be overcome by comprehension. See Fig. 15. Man's body is compressed motion, which encircles man's invisible Mind-Source in true circles. He can never depart from these true circles. His thinking and his forming body cells encircle them without knowing that he is but manifesting his own immortal Self, or without knowing that the immortal Self which centers him is continually whispering to whatever of Mind-awareness has yet unfolded within him. The noise and turmoil of outer-sensing drown out those inner whisperings for long aeons, but there comes a day in his unfolding when he begins to hear that Inner Voice. More long ages pass before he knows that the Cosmos of all that IS is speaking to him and that he IS that Cosmos. Gravity controls the moving universe but man has never known, nor even suspected, that his own immortality and gravity are ONE in their centering of his sensed-body. Nor has he ever known that gravity extends to a shaft as his body extends from thought-ring planes to mass, and as equators divide to become pairs and unite to lose their division. These things man must know together with the omnipresence of gravity which but seems to the senses to extend into shafts made up of many points, which are all ONE. When man overcomes this illusion of the senses he, likewise, outgrows the possibility of forming sensed-conclusions such as the nuclear atom, which violates all principle of this electric universe, which Nature is.

Man plainly senses the motion of a plane, or boat, or a speeding bullet and thinks of it as a direction of motion. He sees the motion of a wave, or the vibration registered by a harp string, or the cardiogram of a heart pulsation. His senses also interpret these as motion, and directions of motion, not knowing that they are but registering the curvature of gravity control, and that the direction of motion is ninety degrees removed from that direction of gravity control.

That which cannot be sensed in invisible space is yet to be dynamically known. The mystery of the crystal and its cleavages which divides crystals into units, lies within the knowledge of space geometry, which can be scientifically organized into Mind-visibility, as bodies in motion can be scientifically organized into sense-visibility. There is nothing in nature which the senses can feel that the Mind cannot know.

The great mystery of all of the mysteries of matter lies hidden within the inert gases of the wave. The nature and structure of these keys to motion has never been known. It is time that they must be known.

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia). 1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: “Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas”. 1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jülich (Germany).

1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover self and to discover and learn the God’s principles and laws of creation. After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God’s creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet. I am a pioneering with the New Conscious Energy and building a new civilization without electricity. I’ve developed the QUANTUM RADIATION BALANCER – the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation. Thanks to the consistent pursuit of my Leitmotif “The Authority of Truth rather than the Truth of Authority” I have experimentally proved the true atom, cell and particle “ATON” concept. According to the “ATON” concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of the new science that is based on the knowledge of the cause.

I wrote two books: “GOD IN THE ATOM” and DODECA 101 LOVE ENERGY which are available on my website: <http://www.teslatype101.com>
