

A Master Experiment - Irresistible Experimental Proofs of the true “Aton” Atom Concept

Ilija Lakicevic

MarslaTita 91/12, 21460 Vrbas, Serbia

Abstract: Atom is made of rings of light spinning around the centering black hole where God Aton sits centering His/Her creation form within and borrowing energy to the light rings so that they can move – that is the true “Aton” atom concept. Period.

Keywords: “Aton” atom concept, God Aton, Human being

1. Introduction

All scientific concepts are opposite of the true concepts due to deception of human senses which deliver us inverted picture of the truth. The official scientific model has not even that virtue – it violates all laws of God Aton and all laws of His/Her creation [1-25].

2. The True Nature of Electricity and Gravitation

Every effect of motion, whatsoever, in this universe is an electric effect. **Electric EFFECTS are multiple projections from One Magnetic Light CAUSE.** As there is no other force which creates this miracle of Creation there can be no theory of motion, or of construction of matter, which is outside of the electric process. This entire electric process is completely demonstrated on just one cycle of the electric current. One cycle is the centripetal journey of a pair of divided units from their zero cathode to its multiplied amplitude, where pairs are united, and the return centrifugal journey to their cathode for rest.

That is all there is to the creative process. **That process is the same whether in microcosmic or macrocosmic scale.** There is not one process for atoms and another for stellar systems. That same process is repeated in every action-reaction of Nature, whether it be the lifting of an eyelash or the explosion of tons of dynamite - or whether it be one's breath cycle, or casting a fish line into the sea. My first step is to depict that simple process which has no variation in Nature, whether its vibratory frequencies are six billion frequencies per second or one frequency in fifty billion years.

Nowhere in the electric current of Nature do we find any justification for assuming that a material nucleus centers the spiral coils which constitute the universe. Instead of that we find the opposite. Nature so stoutly resists having the holes in her coils filled with density that she generates a terrific heat to demonstrate that resistance. That is how suns are made. Resistance to compression generates a terrific heat, which cools as suns expand to hole-centered rings, such as shown in the Dumbbell Nebula.

Figure 1: Dumbbell Nebula

The same thing will happen in my laboratory if I wind coils too densely. Every electrical engineer knows that he is limited in the amount of current he can send through a coil by the size of the hole he leaves in it. If a physicist or electrical engineer places a solid core at the center of his coils it will heat and polarize, but not strengthen the current. If he places iron filings there they would not remain in the center, nor could they be compelled to remain there. They would either line the inside of the coil or extend to its poles. If they were tied there they would become incandescent if the current was strong enough. (1) That proves that the core of electric motion is intensely resistant to any attempt to disturb its zero rest condition. (2) It also proves that Nature never creates material nuclei for her spiral cyclones, which constitute the electric current or electric waves of Nature. (3) It also proves by the very fact of the heat which is generated there, that it resists instead of attracts, for heat is the basis of all outward explosion [1-25].

The entirety of this electric universe of motion is expressed in spirals. Every spiral in Nature is centered by a hole. Every spiral is a continuity of rings. All Nature is made up of spiral sections, or rings. The coils of the laboratory are spirals. Every section of a laboratory coil is a ring with a hole in it. Even if one puts a steel rod in the core to polarize its ends there is still a hole of stillness within the rod, for the electric current spirals the surface of the rod only.

There is no precedent in Nature, whatsoever, to justify Rutherford or Bohr in assuming that the atom is centered by a material nucleus. Likewise, Nature gives no precedent for concentric shells of satellites revolving around primaries in eccentric orbits of many planes. Satellites become eccentric, and their planes of revolution vary quite markedly from the equatorial planes of their primaries, but they do not start that way. They begin as rings thrown off from equators and gradually become off-center and off-plane. The three rings of Saturn illustrate this beginning.

Figure 2: Saturn's rings

The orbits of all planets and suns are rings with holes in them. The outer satellites, which have wound up from rings, illustrate the progression of rings on their journey to disappearance as motion. I am going to prove by the following very simple experiments that there is no justification for the assumption of a nucleus in an atom, which is held together by some mysterious Cosmic "glue" - the descriptive name given to it by eager searchers.

3. My Master Thought Experiment in many Steps

May I remind you that Tesla said: "Everything worked in laboratory as in my thoughts". My laboratory is in the higher dimensions of imagination and I'm not going to prove my master experiment by measurements in 3D, but I'm inviting all laboratories around the world where this experiment can be performed to do it and to publish their results to prove the exactness of my master thought experiment. I thank all of you in advance and invite all of you to join me in bringing truth and knowledge to this planet of lie and mysticism (lack of knowledge).

Step 1. Let me imagine a straight copper wire of 30.48m length connected to a car battery of 12-24 V DC electric potential and a Ams, depending on the type of a battery. Not with a multimeter with camps I measure electric current of b Ams.

Let me now in my thoughts wind the 30,48m of copper wire into a circle and pass the current through it leaving a large hole in that ring. The moment I bend the wire I also make the loops of force, which surround it, come closer together within the hole, than outside of it. In other words I make them radiate from a center instead of being parallel to each other. Consequently the new measure value of the electric current c will be higher than b .

I bear in mind that the loops of force which are spinning around the wire are creating potential. There is no potential at all in the core of the wire. That wire is an axis of gravity around which electric potential is being multiplied. That electric potential is being multiplied by fast motion around its stillness. In the gravity center of that 30,48m coil I will not feel an easily measurable amount of heat resistance to the compression being acted upon it.

Step 2. Now in my thoughts I wind that 30,48m of copper wire cylindrically into eight rings. Those widely separated loops of force, which spin around eight wires instead of one, are reaching outward radially toward cold, and are reaching inward radially toward heat at the center of gravity, which centers my coil as the eye of a cyclone centers its similarly spinning loops of force.

The inner rims of rings, which constitute those loops of force, are coming closer together, **which multiplies heat, electric potential and density, because of the outward explosive resistance to that compression.** The new measure value d of the electric current will be higher than the value b . Now I test the hole for heat in the axis of the cylinder with a thermometer and I can quite easily measure it. Also, I test the hole for electric potential by measuring with the multimeter electric current at different distances from the cylinder axis and I will find that density increases in the direction of the center, for resistance increases in that direction. Now, I test the hole for polarity and I will find that a very thin needle on the end of a thread will seek two points of stillness where gravity is being divided, and electric potential is being multiplied at 90 degree angles from its axis – not along the axis!

Step 3: Then I do the same thing with sixteen rings, then thirty-two. I still have a hole in the middle and will find that heat, potential, polarity and density constantly increases as I make my spinning radial rings smaller, by winding my coil with more and smaller turns.

Then I put a steel rod (soft iron) through the 32 rings and I will find that I need two needles, instead of one, when I had but one ring. I will find that as I extend my rings I also extend electric potential. Gravity immediately divides into pairs when electric potential extends from its Magnetic zero, and electric potential multiplies by so doing. **Polarity is that effect in Nature which is caused by dividing one point of Magnetic stillness into pairs of still points.** A zero shaft is thus produced around which electricity spins its rings to create the electric potential, which is so casually referred to as "matter."

Step 4. To make a more comprehensive test, and to also convince myself that the needles are seeking stillness in the eye of the electric cyclone which I have created, instead of being attracted there by an inward pulling force, I make a ONE coil in the shape of two cones, base to base - BICONE. If I now try my needles I will find that it is impossible to make them seek the center of any of its rings other than at its very extremities. If I try to have one seek my central ring it will forcibly resist it. If I hold two at that point, just a half inch apart, I will find that each one will seemingly repel the other. They are not doing this, however. They are each seeking a point of stillness which is maximum in gravity resistance to the electric potential, which has multiplied to its maximum power of compression at that point. Instead of being attracted there they are compressed there as they point out the direction of increasing density and electric potential. **This is proof, also, that the effect upon the needles is an electric effect - not a Magnetic one.**

I am still not sufficiently convinced by this experiment and I make two conical coils and put both apices together. If they could meet at a sharp point I would need but one needle to find one common center of gravity. If I now spread the cones apart and put some fine iron filings there, I will find that they will gather together in a ball, and my needle will point always in the direction of increasing density in that ball. I need but one needle now, for two will do the same thing.

I will also find that the steel rod has no current at its center, but only at its surface, except where it is concentrated at its poles. If I now test it for density, electric potential and heat I will find that each increases in the direction of its center, which is exactly what I would find if I could test the sun in the same way.

Now I pull my cones apart far enough to elongate my sphere into a spheroid. I can now use two needles, for I have again divided gravity.

For a last convincing experiment, I take my needles to the holes in the bases of the coils. I turn the coils on end and lower one of the needles where the electric potential is strong. I will find that the needle will follow the gravity shaft and point directly toward the eye of the vortice, as indicated in the cyclone.

These familiar experiments should convince me that there can be no nucleus to a mass which is being compressed into an unwilling and resistant center. Where is there any evidence of a material group nuclei in these atoms which I am thus creating?

It is necessary that I fully understand that all matter is explosive and that every body of matter thus compressed against such resistance is desirous of exploding. Cold alone imprisons matter into dense solids, liquids or gases.

Step 5. I try this experiment also. I pump air into a deflated tire. The more I pump the more I compress. At first it is like having one turn of wire around a big hole. The more I pump the greater the potential and heat I create. The pressure I put into it desires to escape. It, therefore, forms a dense ring inside the tire but my first thrusts of pressure seek the outside of the rim in their desire to escape. The more I compress, the greater the density, heat and potential. Its increase is in the inward direction. I bear in mind the fact that I am compressing from the outside inward. I am not attracting it from the inside. The inside is always explosive.

It does not require two forces to compress or expand anything. If I wish to compress air into my tire, I compress it with a force exerted in one direction which is inward from the outside - the same as with a child's balloon. The greater the force that I use in that direction, the greater the multiplication of pressure within my tire as compared with the pressure outside of it. That is the way God Atoncreates all matter. His force is exerted from the outside-in to create matter, which then returns to zero by an inward-outward expression of the same force without the aid of another kind of electricity to help it escape from its bondage. It will seek its equilibrium level without another kind of force to help it. The universal vacuum is that universal equilibrium. Any departure from that state is a forced departure which causes a tension or strain.

The zero universe is without strain or tension. All of the wave universe of motion is under constant strain. All matter is imprisoned by compressed motion. It is in exactly the same condition as my tire is which I have compressed into a strained tense condition from which it constantly exerts its own strength of desire to escape from its prison into the

universal equilibrium.

It will help me to better comprehend the meaning if I stretch a piece of elastic from its normal equilibrium condition of rest. It takes force for me to stretch it but it will return to its normal condition without another kind of force being necessary. In stretching the elastic, I have the created strains and tensions of an abnormal, unbalanced condition. The zero universe is balanced. Everything in Nature which becomes unbalanced by the exertion of any force will eventually find balance because of the force of vacuum which is the one normal balanced condition of space.

I wonder how it was that earlier investigators decided that there were two **opposite** kinds of electricity instead of one.

It was because the two opposite conditions of living and dying-growing and decaying-heating and cooling-polarizing and depolarizing, and all other effects of motion are expressed in opposite directions by seemingly opposite forces.

Their thinking was influenced by their senses. They did not take into account the fact that motion is an abnormalcy which has been created by a disturbance of stillness. Motion is a creation which emerges from the Creator's vacuum and returns to it. **Likewise, life is a creation which emerges from the Creator's eternal life condition and returns to it.** So, also, heat emerges from the eternal cold, and sound emerges from eternal silence and returns to it without any aid from an opposite kind of force. **The return journey to zero is a relaxation of the compressive force.**

Let me make sure that I understand this vital fundamental of Nature which has so grossly deceived the greatest minds of centuries. I will return to the tire that I **compressed**, by using force, into a very much higher pressure than that of its environment. That pressure is held in the tire by a sealed casing, but it is difficult to entirely seal it against slow leakage from some part of it.

That leakage is the same effect as radiation from matter. My tire is sealed by a casing, but all matter is sealed by freezing. Every particle of matter is either solid or liquid because it is frozen by the vacuum of space. To be frozen means that it must first be compressed into dense solids or liquids, and compression heats. Heat helps matter escape from its prison just as heat helps air to leak from my tire.

I know that my tire wants to explode outward. So does the battery in my car. It also wants to explode outward. We do not use the word "explode" for that effect, however, for we now use the word "discharge". Leaking, radiating, discharging, depolarizing and exploding are all the same effect. So, also, are decay, death and combustion. So, also, are radioactivity and fission.

When I compress my tire, I at once begin to create an explosive condition, for I am creating rings of motion around a resisting hole. The increasing pressure is first collected together on the inside surface of the casing, just as a wave current does likewise when compressed into a wire. The more I compress the tire, the more I close up the hole.

The resistance to that compression causes heat, so if I compress long enough, and fast enough, to close up the centering hole, I will generate enough heat to explode that tire even if it were made of steel. In that case my body would end up at Moon.

Every action I perform causes motion-and all motion is wave interchanging which moves spirally-and every spiral is a series of rings around holes. Also, I cannot cut a section through any wave current anywhere without producing rings which spin spirally around holes.

The time must eventually come when man must know where God Aton is at every moment in respect to himself. He must completely understand how God Aton controls every action and desire of all living things, from man to fungus cell, or from galaxy to electron, during their entire journeys from their beginnings in Him to their endings in Him. These are the unknown things which unfolding man must know, before he can begin to manifest his own divine inheritance as an omniscient and omnipotent Being!

4. Centeredness

We have been told that ignorance of The Laws is suitable reason for God Aton's understanding. However, refusal to learn when information is present to overcome ignorance is "excuse" and is not acceptable - for God Aton is sending/bringing Truth and Man is expected to do his CHOOSING well. And, no, it is not alright to just turn back "part way" and continue in other breaking of Laws intentionally, and yes, if we stand by and "allow" stoning of our brothers who bring that word, by those who set themselves up as Truthbearers but are false, we are as guilty of the stoning as are they. We may denounce the words we bring until the bitter ending and it will make not one iota of difference in the Truth herein. But the children shall be gathered unto the shepherd for they are unknowing and without blemish.

Not one action of motion man or Nature - in all the universe - can escape from the absolute centering of its action by the Controller of all action. Anything, or any man who tries to escape from it, or use his "free will power" to do as he chooses, may exercise that privilege, even unto destroying himself by so doing. He will not escape, however, from the perpetual control of his universal energy Source. No matter what he does, to upset the universal balance, he will find that the Creator of Creation always centers him, and his own unbalanced orbit is still on center with his unbalance, and is perpetually in a plane of 90 degrees from the shaft upon which its circling turn.

Figure 3: Every thought and action in this universe is centered by its energy Source, which controls its actions and thoughts from within and balance then from without by two extensions of that center. These extended poles are the ends of gravity shafts around which all masses rotate under true circular control. A – represents a spinning top, B – the earth, C – a wheel with a shaft off center, D – a seesaw. See text.

Consider a top, for example, which is spinning true upon the planet's axis of gravity. See Fig. 1-A. All motion around that axis is in true circles, and in planes of 90 degrees from that axis. The time comes when the top can no longer spin fast enough to keep its spinning's centered by the earth's axis. As it slows its speed its axis inclines. Every turn of the top still spins true to the now wobbling axis. That wobbling axis is compelled to revolve around its Source of balance, however, and in doing so it inscribes true circles around its gravity Source, and they, likewise, are in planes of 90 degrees from that axis, as illustrated in the diagram A-1 and A-2. Consider the earth's orbit, for another example - see B-1 and B-2. When the earth was where Mercury now is, there was but one common center of gravity, and one equatorial plane for the earth, and for the sun. The earth has now left that position of perfect balance between itself and its source and set up an equator of its own, which is at an angle of 23 degrees from the sun's equator. Its axis has a similar variation to that of its source. It has not escaped God Aton-control, however, for the sun's gravity still controls it by centering a larger circle, which includes its entire wanderings around two centers instead of one. Fig. 1-C illustrates this principle in an off-center flywheel which will turn with uneasy and uncomfortable oscillations if slow enough, but would shake itself to pieces if turned very fast. This example is a good symbol of *our present civilization, which is ever turning faster in its eccentric orbit, and ever approaching its dissolution.*

Man must someday learn that every cell of his body must be in tune with the universal rhythm in order to keep his body in balance, and every thought and action, which controls his body, should be within as close a circular orbit as possible to reach within to the divine Source of all things where omnipotence and omniscience awaits all men. In this way only, and through such knowledge only, can Man know the meaning of that Silent Voice which has tried to reach through his senses for ages upon ages. A continued effort to thus decentrate from concentrated movement to universal stillness, gradually unfolds one's spiritual and intellectual nature. Decentration invites meditation and meditation opens

wide the doors for inspiration. Don't be too impatient regarding how to reach through in that meditation for if we can learn to totally relax into communion it will be fine. It requires no special "methods", in fact prescribed "methods" only end up being far more distracting than helpful.

The geniuses of the world are those who have learned to talk with God Aton by transcending their senses and becoming Mind-Beings. In this still very early stage of the unfolding of the Man idea he is very conspicuously body-conscious and but faintly Mind-conscious. God Aton's intent for man is that he should manifest Mind-not body. The signs of the times tell us, that more and more Mind-conscious humans are coming into their fruition stage, but mass-Man is still body and-sensation-conscious. That is why such chaos is spreading over the face of the earth. Culture is dying because sensation shuns culture. A Wagner or Mozart is worth billions, and should be nourished. The Wagner's and Mozart's of today can be found trying to survive by playing in night clubs, or selling vacuum cleaners. We have no pennies to spare for the arts of peace while so many billions of dollars must be spent upon the arts of war, and in extolling those who kill. Man has chosen to upset his own balance by seemingly violating the inviolate. In the battle of civilization for body-supremacy over Mind, it may well be that *the moral, mental and spiritual decline of the last half century* will continue into another degrading Dark Age. Time is naught, however, in Nature, and Man will again arise through the efforts of the few among the many who are now becoming more and more Mind-conscious.

Scientifically, what is happening to mankind at the present time is that he has chosen to distort his balanced circular orbit around his Creator. His free will, supported by his ignorance of his unavoidable close relationship to God Aton, and his unawareness of his dependence on God Aton, has influenced him to choose transient body-sensation, body-comforts and body-values instead of eternal Mind-values. It is not possible for Man to continue to distort true circular orbits of Man around God Aton, by choosing eccentric orbits or by unbalanced interchange in his human relations. No Man, or nation, is powerful enough for that. Fear is the product of such unbalance. *Neither Man, nor nation, can survive fear. The universe is founded upon love and Man must some day become aware of the meaning of love as related to human survival. And to have love - we must let go of fear.* Our present civilization is hurting itself by building its own agonies and ills. It has become *physically scientific instead of spiritually scientific*. It has no living philosophy to overcome the philosophy of death which is now threatening the world. War has taken forty million lives in forty years, but radioactivity can very easily take four hundred million lives in four hours. This bears some serious contemplation, friends. Worse, this can be done even if war does not occur.

Eighty years ago there was less than three pounds of radium above our earth, yet people are dying today from slow accumulations of that little over the years. Today we are creating over 15,000 tons or more of uranium salts each year which is ever so much more deadly. Not only that, we have some million tons of uranium ore above ground. Who today can tell what the price will be that we must pay for that in

human lives and deformed births? Who today can tell the price we shall be forced to pay in the future years if there are future years to be considered, for there are so many other toxins abounding in our place which are almost as deadly as the so-called "nuclear" substances. The concrete containers which house this deadly material and wherever they might be placed become radioactive monsters to raise up and devour us. We cannot know for another decade or more what that price will be if just that loosed in the past, but if the intervening decade multiplies the amount of killer metals, which will be above ground, in the ratio of its present increase, it is quite possible that the doom of the human race is then inevitable without other happenings.

All of the above has been written to show that Man cannot transcend Nature, or violate its tonal rhythms, by attempting to travel outside of the orbit ordained from Him. By so doing he has extended his orbit in the direction of death by expanding his circle to take him farther away from God Aton. Fig. 1 will clarify that for us. Note the orbit of the earth. Its potential was maximum when its orbit was a true circle around its source. An elliptical orbit, and a straying from its plane of balance with the sun, not only widened its circle of control, but unbalanced its relations with its source by dividing its power by perihelion and aphelion positions in its orbit. The orbits of all the planets plainly mark out the road of death, which all dying things must follow. Can it be that Man prefers to choose such a path, or is it because he just does not know?

How long must it be before mankind will know his universe and his Creator sufficiently well to live in love instead of in fear? *The answer to that is dependent upon the length of time it will still take for Man to know his universe, and to know God Aton who centers it and him. As long as Man chooses to think, or act, out of balance and close control with the Magnetic Light which centers his every cell as well as his Soul-Identity, he but weakens himself by distancing himself from his Source of power. In so doing, however, he does not escape from its absolute control and watchful care over him, no matter what he does to hurt himself.*

All of the examples given in Fig. 3 illustrate the principle of balanced control of all creating things by their Creator. It also illustrates the principle of multiplied power which Man gives to himself by ever drawing the circles of his body in closer circles of balanced relationship with his Maker in order to become a mind-Being primarily, and a body, secondary. The secret power, therefore, for any man, does not lie in his ability to *create* motion. It lies in his ability to knowingly *control* it. *A little knowledge is more powerful than a mammoth cyclotron.*

5. Conclusions

1. The invisible universe is in absolute control of the visible. The invisible universe dominates and controls all motion by magnetic division into cube wave-fields of zero curvature, beyond which no moving thing can pass. It can, however, repeat itself in neighboring wave-fields, but always in reverse, as mirrors reverse. The geometry of the zero universe is based upon the cube, and cube sections. Their

planes are of zero curvature and they reflect their forms in matter in crystal structures, which are the only forms of zero curvature in Nature.

2. All motion in all the electric universe is curved. The curved universe of matured form is based upon the sphere. The sphere is a compressed cube. The sphere is a series of true circles no matter where it may be divided into sections by cutting through it in one plane, anywhere.

3. All motion is equally compressed in respect to gravity, therefore, all motion is in true gravity centered circles, which multiply into spheres, and again divide into true circles.

4. The Source of energy which creates true circles, is at their very center. The Source of all energy is the Creator. All motion of every nature, whether of thought or action, spins in true circular control around the omnipotent Creator of that motion, and in planes of 90 degrees from a shaft of any extension of motion.

5. No man, nor creating thing, can in the least way, become off-center from God Aton, or can his orbit around God Aton be aught, at any time, than a true circle, even though its seeming orbit is an ellipse. We think of orbits of planets as being elliptical. And so they seem, but such illusions in Nature are multitudinous, and must be overcome by comprehension.

6. Man's body is compressed motion, which encircles man's invisible Mind-Source in true circles. He can never depart from these true circles. His thinking and his forming body cells encircle them without knowing that he is but manifesting his own immortal Self, or without knowing that the immortal Self which centers him is continually whispering to whatever of Mind-awareness has yet unfolded within him. The noise and turmoil of outer-sensing drown out those inner whisperings for long aeons, but there comes a day in his unfolding when he begins to hear that Inner Voice. More long ages pass before he knows that the Cosmos of all that IS, is speaking to him and that he IS that Cosmos.

7. Gravity controls the moving universe but man has never known, nor even suspected, that his own immortality and gravity are ONE in their centering of his sensed-body. Nor has he ever known that gravity extends to a shaft as his body extends from thought-ring planes to mass, and as equators divide to become pairs and unite to lose their division. These things man must know together with the omnipresence of gravity which but seems to the senses to extend into shafts made up of many points, which are all ONE. When man overcomes this illusion of the senses he, likewise, outgrows the possibility of forming sensed-conclusions such as the nuclear atom, which violates all principle of this electric universe, which Nature is.

8. Man plainly senses the motion of a plane, or boat, or a speeding bullet and thinks of it as a direction of motion. He sees the motion of a wave, or the vibration registered by a harp string, or the cardiogram of a heart pulsation. His senses also interpret these as motion, and directions of

motion, not knowing that they are but registering the curvature of gravity control, and that the direction of motion is ninety degrees removed from that direction of gravity control.

9. That which cannot be sensed in invisible space is yet to be dynamically known. The mystery of the crystal, and its cleavages which divides crystals into units, lies within the knowledge of space geometry, which can be scientifically organized into Mind-visibility, as bodies in motion can be scientifically organized into sense-visibility. There is nothing in nature which the senses can feel that the Mind cannot know.

10. The great mystery of all of the mysteries of matter lies hidden within the inert gases of the wave. The nature and structure of these keys to motion has never been known. It is time that they must be known. All of these mysteries have been briefly touched upon herein for the express purpose of giving enough knowledge of the true nature of the atom to prevent it being used to endanger the human race.

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia).

1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: "Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas".

1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak

UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jullich (Germany).

1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover and learn the God Aton's principles and laws of creation.

After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God Aton's creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet. I am a pioneer, creating with a New Conscious Energy and building a new civilization without electricity.

I've developed the TESLA RADIATION BALANCER –the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation.

Thanks to the consistent pursuit of my Leitmotif “The Authority of Truth rather than the Truth of Authority” I have experimentally proved the true atom, cell and particle “ATON” concept. According to the “ATON” concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of a new science that is based on the knowledge of the cause.

I wrote two books: “GOD ATON IN THE ATOM” and “DODECA 101 LOVE ENERGY” which are available on my website.

I use to practice sport very gladly and am a unique tennis coach.
