Physical Body Does Not Die

Ilija Lakicevic

MarslaTita 91/12, 21460 Vrbas, Serbia

Abstract: There is no death physical body but there is life-death cycle. There is no part of this journey of the tree from its appearance to its disappearance, that you could call life without as appropriately and truthfully calling it death. Nor is there a part of it that you could call its beginning or its end. Nor is the fulcrum which the tree used to extend itself into a tree any different from the fulcrum you use to extend yourself into a man. Nor are you freed from your roots underground because you can walk away from them, for you are as much bound to them as the tree is.

Keywords: continuity of motion, life-death cycle

1. Introduction

All bodies are the result of desire of Soul in Mind for expression of one idea of creation through continuous unfolding and refolding of the idea bodies. Desire of Mind is eternal – therefore all bodies are eternal in their continuity. They are not eternally repetitive – for “repetition” is suggestive of discontinuous intervals between each repetition. The Soul of the disappeared body still IS – and in that Soul is the same desire that made the disappeared body appeared. That desire of the Soul to unfold the form of an idea will cause it to reappear, again to unfold, forever and forever as continuity which is forever changing but never ceases.

2. Continuity of Motion

Continuity is the immeasurable quality of CAUSE that is simulating through continuous interchange of equal and opposite EFFECTS.

Each interval of time between the disappearance and reappearance of any body is not a discontinuance of the body – it is merely a “blackout” of our senses. When things disappear from the range of our sense experiencing (seeing, tasting, smelling, hearing and feeling), they have not ceased to be. They are not “dead”. And when they reappear within the range our sense experiencing, they are not reborn to life. They have but again merely come within the range of our sense experiencing. Each interval of time between the disappearance and reappearance of any body is not a discontinuance of the body – it is merely a “blackout” of our senses.

These facts are true to Natural Law, and we are not correct when we use the terms death – birth – disappearance – repetition – reappearance – or reincarnation. How can we be correct in the use of such terms when we know that there is a continuity of such bodies – only their dimension and their polarity have changed in them?

3. Cause and Effect

CAUSE is the desire-energy within Mind to manifest Mind-Idea by extending light-waves of thought from centering fulcrum points.

EFFECT is manifested Mind-Idea expressed by motion of extended light-waves of Mind-thinking. God - the Creator - is CAUSE. The created universe is EFFECT.

The foregoing defines the very simple foundation for higher knowledge which man needs for the unfolding of his spiritual nature. Without this higher knowledge needed by man for the unfolding of his inner vision, he will still remain barbarian in thought and practice. He can never progress toward happiness, peace and prosperity while he is physically dominated and limited to sensed effect, for world history shows that the increase in material power of expression, unbalanced by spiritual power, is always accompanied by a multiplication of crime, wars and immorality, with increased sex and cultural degeneracy.

Every time a material civilization has prospered by the vicious methods which have made all past civilizations prosper, it has fallen low into the dark for long centuries and has recovered only through the agonies of tears shed for deep suffering. Our present civilization is in its eleventh and a-half hour, preceding a similar fall and for the same reason, as everyone must now come to know.

The only way that mankind can save this present degenerating civilization is to throw off all that is barbarian and ungodly in him through acquiring the higher knowledge necessary for his inner, spiritual unfolding.

The only way that mass-man, who constitutes a civilization, can acquire that higher knowledge is through mass-teachers, and there are no such teachers in any of your scientific, educational or religious institutions. None of them has made any attempt to fulfill this requirement for bringing God and man together in close communion and companionship. In fact, every one of these presumably man-building organization has done just the opposite, which has retarded the unfoldment of the spiritual nature of man. This is indeed unfortunate for some hundreds of thousands of advanced thinkers have freed themselves from the anchors of traditional material concepts and are seeking earnestly for the Light of higher knowledge which will eventually illumine them into Cosmic Consciousness.
When I utilize the term "barbarian", I define as: possessing of characteristics of a cultural level more complex than primitive savagery but less sophisticated than advanced civilization--mercilessly harsh and cruel and without refinement.

When I utilize the term "pagan", I define as: a follower of a poly (many) theistic religion (as in Ancient Rome); one who has little or no religion and who delights in sensual pleasures and material goods; an irreligious or hedonistic person.

READ THAT "PAGAN" AGAIN. YOU ONES GO ABOUT CALLING THE NATIVES AS IN "NATIVE AMERICANS" AND PRIMITIVE TRIBESMEN - PAGANS. WHERE DO YOU COME BY SUCH SMUG CONDESCENDING INFORMATION? THE NATIVE DOES HONOR UNTO THE DIFFERENT RELATIONS AND SHOWS HONOR UNTO THE SEASONS. THE WINDS AND THE BROTHERHOOD OF LIFE--BUT HAVE YOU NOT HEARD OF, YOU OF IGNORANCE - THE GREAT SPIRIT? WELL, THE GREAT SPIRIT - THE WAKAN TANKA, IS GOD BY ANY LABEL. Moreover, this ONE God has the same offspring in recognition as do your traditional Life-streams. It is time you ones learned that which is your own language - for you speak things that have no meaning in FACT. The primitive "natural" natives have less interest in that which is physical and material than any species on Earth - THEY ARE NOT PAGANS! YOU HAVE BECOME PAGANS!!!!!

Can you now comprehend how it works with the adversary? You are told a thing and without question you hop on the bandwagon of denouncement, etc. You know not anything of value for you have been told the opposite of Truth for such a long time that you even reverse the meanings of your own language words. YOU HAVE BECOME THE PAGANS - NOT THE NATIVE INDIANS. THEY, IN FACT, SPEAKING OF THE NATIVE AMERICAN "INDIANS" WERE ONLY LABELED "INDIANS" BECAUSE THE EUROPEANS THOUGHT THEY HAD REACHED THE INDIES. THE NATIVES, IN THEIR OWN LANGUAGE, CALLED THEMSELVES "THE PEOPLE" OR "HUMANS". YOU HAD BEST LOOK A BIT INTO HISTORY AND TRUTH - AND PERHAPS YOU MAY LEARN SOME SHOCKING FACTS.

4. Analysis of Life Death Cycle

When I write these immortal words of our Father-Mother while in the Light with Him, I am fully aware of their dynamic meaning and the mechanics of His thinking processes by means of which He manifested His idea in formed bodies which come, and go, and come again forever.

I fully know that any idea which comes and goes is ONE in both its coming and going. In my full knowing I cannot differentiate one from the other, therefore I cannot differentiate life from death nor death from life.

To me the morning light of day which walks toward noon is the same light which walks away from noon to again be the morning light to walk again toward noon. Knowing the cause of undivided light of the sun which has no morning, noon or night in its eternal unchanging oneness, and knowing that the divided, ever changing day of earth is but extended from its undivided cause, I know both life and death for what they were, and not for what they seemed to be.

To you, however, who read these immortal words without that knowing, they are but words until your Soul knows their meaning in God's plan which simulates eternity by dividing all idea of His into pairs of opposite expressions which eternally repeat their opposite expressions to create an illusion of continual change.

That is what confuses you and all mankind. You see the continual change in every moment of the day, and every form in it, and of every event in It. Something is moving and changing during your whole day and night of life to force you to think complexly. You cannot evade that confusion while your senses record naught but changing.

Confusion of the senses disappears through knowing the changeless Source of all illusion. To the extent that you KNOW the Source the confusion of senses will disappear.

In order to give you that knowing you must discard age old concepts which your senses have built up from the confusion of change and replace them with new concepts formed from knowing the changeless Source of undivided Oneness from which the divided universe of many changing, moving forms extend.

In order to build these new concepts we must become thoroughly familiar with the way God extends all changing forms of divided idea from their changeless Source in His Light. We will do that by the repeated use of diagrams and word pictures of simple examples of forever changing things which manifest eternal Life by Life's division into seeming life and death.

In beginning to explain the principle which lies behind life and death let me remind you that Creation is the extension of God's One Whole Idea divided into countless many FORMS of many ideas imagined by Mind thinking.

The form of any idea is not the idea thus extended. It is but the material body of the idea.

Idea is undivided and changeless. Idea has no body. Thinking takes idea apart and gives it thought bodies which are then manifested in material bodies.

Idea does not come and go. It is but the bodies of ideas which come and go. It is but the formed bodies of ideas which appear, disappear and reappear in what we call life, death and rebirth. These transient bodies simulate idea by form and motion but transient moving form cannot be the eternal idea which it manifests in forever repeated cycles.

Remember then, that it is the repeated cycles of manifested ideas which confuses you into thinking life and death, and not the idea itself. Idea is eternal and has no cycles. The BODIES of ideas only are pressed in cycles.
Cycles come and go - they begin and end, and begin again where they end - they appear and disappear to reappear - as bodies of PATTERNED thoughts.

It will clarify this life-death mystery to go through the process of building bodies from the eternal zero in the Light of their beginning, through the cycle of their appearance, and back into their disappearance in their eternal zero of equilibrium from which they emerged.

We will first build the body of a tree from its beginning as a part of God's One Whole Idea of Creation.

We plant an acorn seed in the ground. In that seed is a million years of repeated life-death cycles. In that seed is the record of every stage of unfolding of that idea from its beginning as a mold, or fungus, up through the stages of desire to become what it desired to be which was in that seed a million years ago.

Examine it with the finest microscope and you will not see one trace of the body of an oak, yet out of it comes the full grown oak of many branches and leaves, no two of them alike.

That seed is the undivided father-mother idea of the eternal oak which is about to be divided into pairs of opposite father and mother conditions which produce bodies by interchanging their conditions.

All creating bodies begin from a zero point of balance which become their equators, extend to allotted measures limited by desire - and return to the zero of their equators to give back the bodies they have borrowed from each side of it.

Let me impress upon you the fact that the seed is but the Soul record of Mind idea. It has no material body but it has a thought body which is patterned in the image of the thought. It is the Mind concept of an oak tree not yet conceived as a body in its mother's womb.

By saying that it is not yet conceived in its mother's womb I mean that it has not yet begun to be divided from its spiritual ONENESS of FATHER-MOTHERHOOD into its physical manifestation of The Divine Trinity as expressed by the division into father and motherhood.

Fig. 1 represents the beginning of this division by planting the patterned seed in the womb of mother earth.

Fig. 2 represents the static measure of desire for extension which is in the seed. The zero of the seed centers the two equilibrium zeros extended from it. The seed is the still fulcrum from which the tree will borrow its power to become a tree, as the lever likewise borrows its power from its fulcrum.

It must be thoroughly known and comprehended that the dimensions of the full grown tree, including the duration of its life cycle, are as meticulously recorded in its seed as are the patterns of its wood and foliage. That which appears to exist in the visible universe really exists in the invisible universe. The invisible idea is eternal.

The moment the division of the seed takes place the dimension of its former "incarnations" are already surveyed by the magnetic Surveyor of Creation and invisibly marked out for it upon both sides of its equator.

Fig. 40, therefore, represents the dimension of the two-way dynamic diameter extending at 90 degrees from the static diameter of earth. The dynamic diameter is the equator which is being prepared in earth and space which divides, balances and reverses the halves of the growing body. To review this idea in your mind turn back to Fig. 4.

Fig. 5 represents the two extended static diameters which bound the predestined dimensions of the tree in accord with the dimensions of desire which have been registered in its seed. It can go beyond these dimensions if new desire is added to the seed, such as extra favorable soil, and weather conditions. This added desire can be given to it by man who adds his desire for a better tree to that of the desire of the tree.

In Fig. 5 the division has already taken place and the newborn tree has extended from its womb in the negative direction of motherhood toward space while its roots have extended in the positive direction of gravitation toward fatherhood.

The important facts for you to take note of at this stage are these.

1) The division which begins to take place in the seed by the electric pumping action develops a negative and positive (polarized) condition above and below the equator where the division begins.

2) The positive direction of concentration is inward toward gravity. The roots of the tree follow that direction. The negative direction of decentralization is outward toward space. The growing tree follows this outward direction.

3) Now carefully note the fact that positive electricity and negative electricity turn their backs to each other and pull away from each other as hard as they can to divide a static condition into a dynamic one. This is a very important point for you to take note of because science believes just the opposite of what Nature so obviously and plainly demonstrates. In fact the Coulomb electric law states that opposites attract and likes repel. As we proceed you will see how utterly unlike Nature that law is.
Electricity is the divider of one balanced, unchanging condition of stillness into two unbalanced conditions of ever changing motion which interchanges constantly to balance those unbalanced conditions to express LIFE—and to void them to express DEATH.

Positive electricity and negative electricity are diametrically opposed to each other. Positive electricity charges by multiplying motion into higher potential to manifest LIFE, and negative electricity discharges that potential by dividing it to manifest DEATH.

The workings of electricity have been grossly misunderstood, which is very strange, for man has known how to use it wonderfully, but has practically no knowledge of what it is or the WHY of it.

It is just as necessary for YOU to fully understand its workings as for the greatest scientist in the world, because electricity is the pump which motivates your body—and it is what you use to think with.

Electricity manifests the basic principle of Creation - the LOVE principle of equal giving and regiving—which is the principle of balance upon which your every thought and action is based.

4) As the tree grows two ways to manifest life it is gradually approaching the two points marked A in Figs. 5 and 9 where that which we call life ends and death begins.

5) As the tree grows by unfolding outward from its seed it simultaneously refolds inward toward its seed. The pattern of every action of the tree is recorded in the magnetic Light of its seed. Later on you will marvel at this miracle of God's recording system by means of which every unfolding idea is carried over from one body to another for ages. This recording system will be explained in detail in later lessons.
6) In the divided universe one half of every creating thing is on the positive side of its equator and the other half on its opposite side. Each of these is dependent upon the other. That part of the tree which is under the ground interchanges with the part which is above ground. This is as true of a man, or planet, or industrial plant as it is of a tree.

7) The underground half is the forming body in the womb of earth and the upper half is the forming seed pattern which returns to the womb of earth for reborn.

8) When the full grown tree (or man or planet) has reached the limits of its generating powers it then begins to degenerate. To generate means to increase its polarizing power. To degenerate means a gradual depolarization.

Figures 10 and 11 represent this gradual depolarization which takes place as desire weakens to manifest idea in body form. Fig. 12 represents the complete refolding of the idea of that tree into its seed. Depolarization is complete. That desire to divide the undivided is now at rest in the patterned record of its seed, just as it was in Fig. 1.

5. All Bodies are Two

We must revise our concepts concerning bodies. It is commonly believed by every man that his body is that organism which is contained within his skin. That is a totally wrong conception and must be revised.

Your actual body reaches a long way under the earth, and very high into the heavens above the earth. You are seemingly separated from that other visible and invisible part of your body, but actually you are not, for what you think of as your body could not survive five minutes if severed from its extensions from earth and space.

You are separated from your extensions by equators only. Half of what your visible body needs is on the other side of the equator which divides your electro-positive visible body from its electro-negative invisible mate. Conversely, half of what your invisible body needs is within you.

It is absolutely imperative that each half of your body constantly give to the other half, and it is as certain that each giving shall be regiven as that night will be followed by day.

What you think of as your body is a patterned extension of the earth, to which you are inescapably rooted, and it is also an extension of space surrounding the earth, within which you are temporarily compressed. It is merely a small nucleus of a very extended dual body which is hundreds, if not thousands of times larger than your visible body.

Figure 13 exemplifies the dual electric wave-field which encloses every body-pair. The low electric potential which surrounds every visible body is equal to that of its dense center but unequal in volume, the outer decoated half being thousands of times greater in volume than the concentrated inner half.
between the right and left lobes of his brain. MAN’S SENSING and THINKING is an electric interchange in waves which concentrate and decentralize in varying intensity in obedience to the sense demands of his body or of the spiritual desires of his Mind.

6. Conclusions

If you will now re-read God’s words at the beginning of this chapter, you will understand them better because of these diagrams explaining the growth and decay of a tree.

Meditate deeply upon this subject and you will find that there is no part of this journey of the tree from its appearance to its disappearance, that you could call life without as appropriately and truthfully calling it death.

Nor is there a part of it that you could call its beginning or its end.

Nor is the fulcrum which the tree used to extend itself into a tree any different from the fulcrum you use to extend yourself into a man. Nor are you freed from your roots underground because you can walk away from them, for you are as much bound to them as the tree is.

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia).

1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: “Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas”.

1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jullich (Germany).

1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover and learn the God Aton’s principles and laws of creation.

After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God Aton’s creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet.

I am a pioneer, creating with a New Conscious Energy and building a new civilization without electricity.

I’ve developed the TESLA RADIATION BALANCER – the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation.

Thanks to the consistent pursuit of my Leitmotif “The Authority of Truth rather than the Truth of Authority” I have experimentally proved the true atom, cell and particle “ATON” concept. According to the “ATON” concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of a new science that is based on the knowledge of the cause.

I wrote two books: “GOD ATON IN THE ATOM” and “DODECA 101 LOVE ENERGY” which are available on my website.

I use to practice sport very gladly and am a unique tennis coach.
