

Immortal Teslasyle101 of Creation in Seven Steps

Ilija Lakicevic

MarslaTita 91/12, 21460 Vrbas, Serbia

Abstract: *Tesla is truly an outstanding example of enlightened genius who set a level of brilliance – the immortal Teslastyle101 in seven steps – that should be the model to which all scientists, geniuses and intelligent people strive. In the long run, it is not his amazing inventions and the breakthroughs which should be considered the greatest contributions Tesla made to mankind, as spectacular and as important as they are. Far more important is the Teslastyle101 he set for scientific thinking and discovery.*

Keywords: Tesla style of creation, seven immortal steps, God Aton's way of creation

1. Introduction

Albert Einstein was once asked what it was like to be a genius. His response was "I don't know! **Go ask Tesla!**"

2. The Level of Brilliance

Let me start here with citing the Divine Wisdom:

"Sadly, many of Tesla's best ideas never went beyond the experimental stage. A world occupied with its mundane concerns could not appreciate the treasures of Tesla's transcendental thinking while he was alive, and did not adequately support his work financially. Indeed, late in life, Tesla had hardly any funds to finance his scientific investigations. Yet he kept pursuing new understandings, even though the majority of his insights would not be applied.

Few are able to reproduce his thinking and understanding of scientific principles and those who come close practice at greed and self-proclamation of inventor status just as took place in his lifetime.

This is worth musing on. **In the long run, it is not the inventions and the breakthroughs which should be considered the greatest contributions Tesla made to mankind, as spectacular and as important as they are.** Far more important is the style he set for scientific thinking and discovery. Tesla is truly an outstanding example of enlightened genius who set a level of brilliance that should be the model to which all scientists, geniuses and intelligent people strive.

To Tesla, thinking was a process which bridged the objective, physical world with several subtle realms, where ideas and concepts exist almost like fish in an ocean, waiting to be caught by the inquiring human mind. He was not satisfied with speculating about ideas and theories; he pushed beyond speculation and learned to deal with ideas and thoughts in their own realm, where they can be fully perceived.

In other words, Tesla used the mind to link heaven with earth. He is certainly not the first person ever to do this, but most other geniuses who do learn to bring heaven to earth do it in religious, philosophical, or creative ways.

While their contributions are valuable, they are almost always couched in vague words and intangible feelings about life, light, and beauty. Tesla, by contrast, focused the ideas of the mind toward scientific discovery. He translated his ideas not into vague precepts and lovely thoughts, but into turbines, lighting systems, broadcasting towers, and electrical machinery. In his hands, the light of heaven literally became light on earth. **Tesla is incredible – not just a mind – but an incredible creative and creator sense – incredible, but yet ahead of his time.**

Mankind always takes unto himself these thoughts and projections and changes them somehow to suit self. In Tesla's case, it does not work so efficiently as in the some other world, for if we do not utilize Tesla's concepts quite purely, we will not be producing a functioning machine. We must know, however, that his ideas have been stolen from inception through this day".

3. Seven Immortal Steps of Creation

Let me honor Nikola Tesla who mastered these steps to perfection and this great man designed everything he produced, first, in the dimension of thought. He was able to relate so clearly to each detail and working part that he could actually operate the apparatus and literally study the "wear" areas. He was so vivid in his inner vision that he would be shocked that those about him saw nothing.

Let me, therefore, build body ("body" means manifestation of the idea, concept) of the idea of my BALANCED body (not to HEAL, since BALANCING means dealing with the CAUSE and HEALING means dealing with the EFFECT), step by step, and as I build it let me fix within my consciousness the fact that I build all other bodies in exactly the same manner. **That manner is God Aton's way of doing it and there is no other way - no variation of the process, whatsoever, whether it be a solar system built by God Aton, a top which a boy builds for spinning, or an industry built by man.**

1) First comes desire of my Mind. Desire is timeless. The desire of myMind to create comes like a flash of inspired Light from knowing-Mind. Desire to create always means a desire to give out from the centering Soul. Desire to create is spiritual and a spiritual creation always GIVES out from a centering point of Omniscient, Omnipotent Light. Do not confuse the spiritual desire to create bodies with the physical desire to TAKE

something to continue the growth of a creating body. Desire of the senses for the survival of sensed-bodies is the process of lawfully receiving that which is regiven or of unlawfully taking it for self alone.

- 2) The desire of my Mind to conceive an idea of Mind is existent for every separate idea is a part of God Aton's One Whole Idea. Therefore, I KNOW that my desire is already existent as a mental conception because the WHOLE IDEA, of which my idea is a part, is already existent in the undivided universe of Mind.
- 3) I now divide the idea by setting my concept in motion. To set it in motion is to THINK it. To think it is to separate what I want from the WHOLE. I do not desire the WHOLE - I want only a part of the WHOLE. All I want, and have asked for, is to produce mybody from the stillness of the whole universe by building my balanced body for senses to sense and Souls to feel.
- 4) The moment I extend what I KNOW to my divided lights which THINK what I know into thought-forms, I begin the WORK of building my body for my desire. I remember always that God works WITH me and not FOR me. I am a unit of His Creation. My Soul is God Aton's Soul. My hands are God Aton's hands. I am aware of this fact and I am manifesting God Aton by being UNIVERSAL MAN and UNIVERSAL SOUL. Whichever I IM shows in my work. The thought-imaged bodies I create in my imaginings have in them MY IMMORTALITY.
- 5) My concept now has a pattern, a thought-pattern which is a thought-body. It is like the formless seed of a rose from which the full blown flower unfolds. I must now give my idea a material body and that can be done only through my action. So I repeat: my desire has already been fulfilled for that which I have desired already stands before me. God Aton has created it for me by creating the firmament which is His own body. It is already existent, awaiting me. But I must reach forth and receive that which He has given me to fulfill my desire for "thy desire shall not walk the way to thee unaided by thy strong arms"!
- 6) Now comes the necessity for my bodily action. I reach forth for the material to make mybody balanced. From now on, the more I will keep before me a realization that EACH ACTION BURNS ITS OWN REACTION, the easier becomes my task of building my balanced body or of for the moving of a mountain. The simultaneity of action and reaction may be likened to a light projected into a mirror which is simultaneously reflected from the mirror. Every particle of matter is a mirror which reflects its reverse image into another mirror - a perfect holograph in every fragment.

The recoil of a gun is the simultaneous reaction to its explosive action. A powerful discharge has powerful recoil. My powerful thoughts, likewise, bring powerful reactions. Every reflection or reaction is in reverse of its action, for it is by the simultaneous action-reaction of desire that the universal equilibrium is divided.

Just as I cannot polarize one end of a magnet without polarizing the other end simultaneously, I cannot perform any action which divides the undivided without creating both the action and its reaction simultaneously. To walk, I

must divide my balance. I lose it to find it for again losing it, but that which I have lost is always awaiting me for I created both action and reaction simultaneously. That which I have lost is already **mine**. "All **down the ages it has been thine without thy knowing even though thou hast but just asked for it**".

I may walk to the ends of the earth WITH God Aton; WITHOUT Him I can do nothing. **He will not do it FOR me WITHOUT ME**. That is what is meant by working knowingly WITH God Aton. He has prepared the way for me. He has made the path for me up my own mountain **but I must work with Him for the fulfillment of my desire to reach my mountain top**. The first step motivates me for the next step by rebornng desire for me for the next step. If I look to the top of the mountain which I desire to climb, I may have much fear and doubt about surmounting it but I do not fear to take the first step, and many first steps taken without fear will take me gloriously to the very top of my own high mountain. I only have to **take one step at a time**.

And so I put the material together, action by action given and reaction by reaction regiven, until I have created my balanced body I desire. **There it is. I can now see it and feel it - but all down the eons it has always been there awaiting my DESIRE, followed by my ACTION, to bring it into seeming being. Do I realize this fact? Yes I do, so I KNOW that anything else which I wish to bring into seeming being by giving it a transient body is within my limitless power**. There is my balanced body I desired. My balanced body is one step toward completing other balanced bodies. **There it is!**

- 1) **Now I am ready to fulfill the last step of my desire, that of building my balanced body**. Again I repeat the fact that my desire is already fulfilled, for I KNOW the harmony of balanced bodies. I not only KNOW them but can imagine them as thought bodies to life. Until I act to give my idea a material body, it will still be existent as undivided IDEA but will not be expressed in the divided universe of moving bodies.

Figure 1: Human body

4. Conclusions

Much meditation on the above thoughts leads me to great conclusions. The fact that God Aton will immediately grant my desire seems unbelievable. And it IS unbelievable to those of us who misunderstand His way of *working with us*. ***If I interpret it to mean that whatever I desire will come to me full grown and without effort on my part, then I do not understand how it is that God Aton works WITH me and not FOR me.*** If I do understand His manner of working WITH me, step by step, then I must take that first step WITH Him in order to be given the power to take the next. I whose desire has built a balanced body can become a master of balanced bodies if my desires are of that measure, and then become leader of the masters of balanced bodies if my desires and my knowing are sufficiently intense. ***If I have any limitations, whatsoever, I have myself set them for myself. The universe is infinitely extended and I am the universe.***

I wrote two books "GOD IN THE ATOM" and "DODECA 101 LOVE ENERGY" which are available on my website: <http://www.teslastyle101.com>

Author Profile

I was born on August 6, 1950 in Grab, Montenegro (former Yugoslavia). 1982 – Acquired my PhD in the field of atomic and plasma physics, at the same Faculty, under the title: "Regularities and Systematic trends of Stark Width and Shift Parameters of Spectral Lines in Plasmas". 1985 -1987 Spent two years as fellow of the Alexander von Humboldt Foundation from Bonn (Germany) at the University Düsseldorf developing plasma UV-spectroscopy at the tokamak UNITOR and performing measurements of the plasma instabilities in the scrape-off layer at the tokamak TEXTOR in Jullich (Germany).

1987 – 1991 Worked as the guest scientist at the Max-Planck-Institute for Plasma Physics in Garching by Munich (Germany) performing measurements of the magnetic field configuration at the stellarator W7AS as well as the measurements of the limiter heat load.

1991 – 2000 Was working in the Institute of Physics in Zemun (Serbia) on investigations of the plasma force-free configurations and in 1995 I acquired the Research Professor degree.

2000 – At the end of 2000 I chose to leave the Institute of Physics and went on my own way to discover and learn the God's principles and laws of creation.

After 18 years of the progression toward that sacred goal, I finally succeeded and now I know many of the God's creational principles and laws (unknown until now) and can apply them for the simple and efficient creations which make the basis for a new life quality on this planet.

I am a pioneer, creating with a New Conscious Energy and building a new civilization without electricity.

I've developed the QUANTUM RADIATION BALANCER – the genuine product in form of a self-adhesive sticker certified by the Hado Life Institute of Dr. Masaru Emoto which 100% balances radiation from any device, if attached to it, protecting the human body and environment from its harmful effects and eliminating with time the damages already caused by the radiation. It can be successfully applied to: cell phones, computers, laptops, microwave ovens, cordless phones, tablets, wireless monitors, Wi-Fi routers, TV-sets, Radios, and any other source of radiation.

Thanks to the consistent pursuit of my Leitmotif "The Authority of Truth rather than the Truth of Authority" I have experimentally proved the true atom, cell and particle "ATON" concept. According to the "ATON" concept, atoms, cells and particles are made of light which are spinning around the centering Mind (Spirit) points (the black holes). Nature expresses energy as electric potential in only one way, which is the same way both for the atomic and for the stellar scale: by projecting mentally the rings of visible light which are spinning around the centering Spirit points. This amazing beauty of creational simplicity is the basic fundamental truth of the science that is based on the knowledge of the cause.
